An Innovative new series from Butterworth's!

The Butterworth Reprint Series in Chemical Engineering

The Butterworth Reprint Series in Chemical Engineering provides a solution to the problem of locating important, often classic, titles that have been placed out of print by their original publishers.

These reasonably priced, paperbound republications are produced in their original formats.

Butterworths is pleased to offer this series as a part of our ongoing effort to provide chemical engineers with the most useful and authoritative information available.

The first books to be published in the Reprint Series are:

Elementary Chemical Reactor Analysis

Rutherford Aris,
University of Minnesota

First Published: 1969

368 pp. paper

0-409-90221-7

\$28.95 (est.)

Advanced Process Control

W. Harmon Ray,
University of Wisconsin,
Madison

First published: 1981

384 pp. paper

0-409-90231-4

\$28.95 (est.)

Reaction Kinetics for Chemical Engineers

Stanley M. Walas,
University of Kansas,
Lawrence

First published: 1951

368 pp. paper

0-409-90228-4

\$28.95 (est.)
