

# *Congratulations from Butterworths*

The Editor and Advisory Board of Butterworths Series in Chemical Engineering wish to congratulate **Professor Daniel Rosner** of Yale University, winner of the 1988 ASEE Meriam/Wiley Distinguished Author Award for his book

## **TRANSPORT PROCESSES IN CHEMICALLY REACTING FLOW SYSTEMS**

*"A significant advance on all existing treatments of the general subject. . . A unique and invaluable contribution for everyone concerned with reacting flows."*

*American Scientist*

*"This book covers an enormous amount of material in a precise, rigorous manner in 540 pages. Professor Rosner has written an important and useful book. . ."*

*Chemical Engineering Progress*

Series Editor: **Howard Brenner**, MIT

Advisory Editors: **Andreas Acrivos**, City College

**Robert A. Prud'Homme**, Princeton

**James E. Bailey**, Cal Tech

**Manfred Morari**, Cal Tech

**E. Bruce Nauman**, RPI

### **New Titles in the Butterworth Series in Chemical Engineering**

#### **Chemical Process Equipment Selection & Design**

Stanley M. Walas  
1988 776 pp \$89.95

#### **Viscous Flows Practical Use of Theory**

Stuart W. Churchill  
1988 624 pp \$52.95

#### **Granular Filtration of Aerosols and Hydrosols**

Chi Tien  
1988 416 pp \$52.50

#### **Fundamental Process Control**

David Pretz & Carlos Garcia  
1988 264 pp \$39.95

#### **Physicochemical Hydrodynamics**

Ronald Probstein  
1988 400 pp \$65.00
