

# YOU AND UNION CARBIDE A STRONG PARTNERSHIP

Join forces with a company making products used in areas ranging from sports equipment and cosmetics ... to the Columbia space shuttle and the Lear Fan aircraft. Consider linking your talents with Union Carbide, the pioneer of the petrochemicals industry.

Becoming partners with Union Carbide means identifying yourself with:

- the maker of leading product lines such as *Glad* trash bags, *Energizer* batteries and *Prestone* anti-freeze;
- the largest U.S. supplier of industrial gases, cellulosic casings for processed meats, and tantalum capacitors;
- the inventors of the *Unipol* process which efficiently produces the world's most widely used plastic, polyethylene ... to name a few.

At Union Carbide, our continued leadership depends upon the innovations and efforts of scientists, engineers and other professionals ... like you.
