

"Du Pont gives me a chance to use all my professional skills."

J. Susan Morgan BS, Chemical Engineering

"I wanted variety and responsibility, and at Du Pont I got it.

"While still at the U. of Kansas I worked a summer at a Du Pont plant in Delaware and, during my senior year, two days a week at a nearby Kansas plant.

"After graduation, I worked full time for Du Pont in the Engineering Department in Delaware in a Consultants Section on heat and mass transfer problems. I specified equipment and process parameters for new processes and plant expansions.

"From pure engineering I moved to college recruiting. Based in Wilmington, I travelled to college campuses all over, interviewing candidates and speaking to student groups. I also organized programs like the Summer Employment Program I was in at college.

"Now I'm at a photographic products plant in New Jersey on process improvements for a relatively new and exciting product. The tremendous variety in my projects requires daily interaction with people throughout the plant. I use both my engineering and people skills."

Whatever your specialty, you have a big choice of careers at Du Pont. Talk to our campus representative. Or write: Du Pont Company, Room 37755, Wilmington, DE 19898.

At Du Pont...there's a world of things you can do something about.
