

CHEMICAL ENGINEERS

Rohm and Haas Company is a major U.S. chemical company with an excellent record of innovation and growth. We produce over 2500 products that are used in industry, agriculture and health services . . . and we're poised for significant growth both in the immediate and long-term future.

Immediate openings exist for entry-level chemical engineers in the following areas:

PROCESS ENGINEERING

Develop processes for new products and improve processes for existing products. Will plan and execute pilot plant studies for batch and continuous operations, including preparation of cost estimates, design proposals for large-scale equipment, environmental and safety considerations. Positions require a BS/MS degree in chemical engineering. Philadelphia and Bristol, PA locations.

ENGINEERING DESIGN

Will be responsible for design of new plants, and for production startup, including development of process flow charts, specifications for equipment, and plant testing to determine optimum design. Will also prepare cost estimates for capital investment and products, and supervise startup operation. Experience in computer technology would be preferred. A BS/MS in chemical engineering is required for these openings. Bristol, PA location.

PRODUCTION

Responsible for startup operations in the introduction of new processes, products and equipment; optimize productivity. Other duties include process improvement studies, troubleshooting and energy conservation. These positions require a BS/MS in chemical engineering. Houston, TX; Louisville, KY; Knoxville, TN; Philadelphia and Bristol, PA locations.

MARKETING

Openings for individuals with a BS/MS in chemical engineering or chemistry plus an aptitude for sales. A three-phase training program includes company and product orientation in the Philadelphia area, followed by assignment to a sales office, working under the direction of a district manager. Upon completion of training, individual is assigned to a sales territory as a technical representative.

We offer an excellent compensation and benefits program, and an outstanding opportunity for career development and advancement.
