

332 of our people left their jobs last year.

We're proud of that record.

Job hopping is something we encourage through our Internal Placement Service.

We happen to believe our most valuable corporate assets are people. The more our people know, the stronger company we are. So just over a year ago we initiated IPS. In the first year, 332 Sun people changed jobs within the system.

Here's how it works. Say you're an engineer. You'd like to broaden your experience and feel that you'd make a contribution in Marketing. You check the weekly job opening notices. When there's an

opening in Marketing you think you can fill, you apply—and get first consideration.

You have freedom to experiment and move around at Sun. You learn more and you learn faster.

You want to learn more right now—about Sun and IPS? Ask your Placement Director when a Sun Oil recruiter will be on campus. Or write for a copy of our Career Guide. SUN OIL COMPANY, Human Resources Dept. CED, 1608 Walnut Street, Philadelphia, Pa. 19103. An equal opportunity employer m/f.

A Diversified Energy and Petrochemical Company
