

Our company's last 4 presidents began with us as talented engineering graduates.

Now, we'd like to talk about your future.

If you are exceptionally talented in your engineering or scientific specialty, Standard Oil Company of California or one of its Chevron Companies can make you a surprising job offer: the opportunity to grow faster than you ever thought possible.

We're researching in virtually every area of energy production, earth sciences, and petrochemicals. We're building on-shore, off-shore, in the United States, and throughout the world at the rate of \$300,000,000 per year.

We offer you the opportunity to think big, handle something big, and move on to something bigger. We offer you the opportunity to broaden into related fields, to modify your career to

take advantage of your individual abilities and interests as they emerge, and to aim for the top.

Engineers now serve as our President and Chairman of the Board. And since 70% of our top 1800 people will retire within 15 years, your upward movement could be rapid.

If you have both the talent and the guts to take on this kind of opportunity, we'd like to talk to you before you make your job decision.

Contact our recruiter when he calls at your campus. Or write directly to Coordinator Professional Employment, Standard Oil Company of California, 225 Bush Street, San Francisco, California 94104.
