

We're not willing to waste a day of your student's life.

Are you?

It's tempting for a company to stockpile good people. Keep them puttering away at something or other. Often for months.

But we think that's an awful waste of time. At the crucial point in a student's career. The beginning.

So, the day he starts working for Celanese is the day your student starts a productive, meaningful career. No long training programs. No red tape. He'll learn the job as he advances in it. And advance just as fast as he will let us move him along. Frankly, our plans for the future won't let us waste talented people by keeping them stuck in a slot.

Students with a degree in chemistry, chemical or mechanical engineering, industrial engineering or accounting, will find that Celanese has a lot to offer them. Like interesting projects. Rewards based solely on performance. How far they go, of course, depends a lot on them. On their ability, imagination, and a little plain hard work.

If this sounds like a company you'd like your students to work for, tell them about us. And for more about Celanese, please write to: John Kuhn, Manager of University Relations, Celanese Corporation, 522 Fifth Ave., New York, N.Y. 10036.

An equal opportunity employer
