

would you like to plan a plant in Puerto Rico?

Too late, the plant is planned! In fact construction is already beginning on Sun Oil's new \$125 million refinery complex and harbor at Yabucoa.

But the project at Yabucoa is simply one indication of Sun on the move. We're geared for growth and we need people. Maybe you?

Perhaps you'd like to work for the company that also recently boomed into the 2 billion dollar class through the merger of Sun and Sunray DX; that's pioneering a new fertilizer

plant on the island of Martinique; that operates a new Computation Center in Philadelphia; that sponsors winning teams and cars in major road racing championships in the United States and Canada—to mention just a few exciting projects.

We need men and women to grow with us and build the future. We have openings in Exploration, Production, Manufacturing, Research and Development, Engineering, Sales, Accounting, Economics and Computer

Operations. Locations—Philadelphia, Toledo, Tulsa, Dallas and many other areas.

Write us for an appointment, write for our book "Sunoco Career Opportunities Guide," or contact your College Placement Director to see Sun's representative when on campus. SUN OIL COMPANY, Industrial Relations Department, CED, 1608 Walnut St., Phila., Pa. 19103.
