

PROVING GROUND. "Sunoco Special" wins 1966 Canadian Grand Prix, Bahamas Cup (Nassau Speed Week), 1967 United States Road Racing Championship, runner-up in 1966 Canadian-American Challenge Cup series. Competition of Sunoco-sponsored cars in major racing events serves as a daring proving ground for Sunoco products.

MONSTER. Giant bucketwheel excavator, earth-eating monster that mines the Athabasca oil sands for Sun Oil's famed Great Canadian Oil Sands Ltd. project in Alberta—a pioneering effort in extending the world's petroleum resources.

GEOPHYSICAL FOUNTAIN. Plume of water from seismic shot typifies Sun Oil Company's search for oil and gas through geophysical surveys in coastal waters of North America, the North Sea, the Persian Gulf and Venezuela.

Projects such as these, plus a \$50 million modernization of the Toledo Refinery, a proposed new \$125 million processing plant in Puerto Rico—all mark Sun Oil Company as a company on the move.

Now a billion-dollar-a-year company, Sun Oil is geared for growth. We need action people for now and for the future. If projects like these challenge you we'd like to talk.

We have openings in Exploration, Production, Manufacturing, Research, Engineering, Marketing. Locations in Philadelphia, Toledo, and Dallas areas.

Sun wants you
