

REQUEST
FOR
FALL ISSUE
PAPERS

Each year, *CHEMICAL ENGINEERING EDUCATION* publishes a special fall issue devoted to graduate education. It consists of

- *articles on graduate courses and research, written by professors, and*
- *advertisements describing the graduate programs at various universities.*

Extra copies of this informative issue are then distributed to the reading rooms and/or AIChE offices of bulk-subscribing universities, to be used as a source of information by those students who are interested in going on to graduate school.

Anyone interested in contributing to the editorial content of the 1993 fall issue should immediately write to CEE (c/o Chemical Engineering Department, University of Florida, Gainesville, FL 32611-2022). Please indicate the subject of the contribution and the tentative date it will be submitted.

Deadline for submissions is June 15, 1993.
