

AT PPG, CHEMICAL ENGINEERS ARE A CRITICAL RESOURCE

Since before the turn of the century, PPG Industries has recognized the value of chemical engineers. That's how long we've been in the chemical business.

Our Chemical Division and our Coatings & Resins Division, in particular, rely heavily on chemical engineers to develop, produce, market and manage the high technology products for which PPG Industries has become justly famous. And you'll find these chemical engineers at all levels — from the recent graduate to highest corporate management.

PPG also is a leader in the production of flat glass and fiber glass. We operate a total of 81 manufacturing locations around the world, 47 of them in the United States.

If you would like to know more about PPG Industries, you may receive a copy of our Career Opportunities brochure by writing to: Harold E. Kohlhammer, Director of Professional Employment, PPG Industries, One Gateway Center, Pittsburgh, Pennsylvania 15222.

PPG: a Concern for the Future
