Want to get a fast-start to teach chemical engineering topics, addressing diversity, equity, and inclusion in the classroom, and to facilitate the best projects and teamwork possible? Want to excel in grant-seeking, scholarship, and mentoring graduate students? Want to network with other engineering instructors and form lifelong bonds?

### What is Chemical Engineering Summer School?

The Chemical Engineering Summer School is a week-long in-person program that helps new faculty get on track for a successful career in the academy. Workshops address pedagogy, course content, safety, diversity and inclusion, scholarly development, professional development, and service. This event gives newer faculty the opportunity to network with peers nationwide to last throughout their careers.

### Who should attend?

Faculty within the first five years of their instructional appointment, both professional and tenure track.

### How much is it?

One attendee per US ChemE program, nominated by the chair or department head, may register at no cost. Additional participants from each department may register at-cost (anticipated ~\$1000) as long as space is available.

### How do I sign up?

Visit [aiche.org/summerschool](https://aiche.org/summerschool) for updates.

**DIVERSITY,  
EQUITY, AND  
INCLUSION**

**COURSE  
CONTENT**

**SCHOLARLY  
DEVELOPMENT**

**NETWORKING**
