

harvest of other shellfish species. many open harvest areas for scallops are not classified for entire scallop, it should be cooked thoroughly because world the entire animal is eaten. If you do plan to eat the eat the white scallop muscle, in many other parts of the and unwanted soft parts. Although most Floridians only shells and cut the white muscle free, discarding the shells oyster knife, or even a teaspoon, can be used to open the holding the shells together relaxes. A scallop, clam, or however, makes them easier to open, because the muscle if fresh water gets into their shells. Placing them on ice, usually die shortly after being placed on ice, especially if they are not kept cold. Even if kept cold, scallops will are quite sensitive to temperature and will quickly die decide to clean the scallops while on the water. Scallops placed on ice in a cooler for the trip to shore unless you When brought to the boat, scallops should be immediately

CARE AND HANDLING

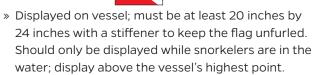

small summer scallops more time to grow and spawn enough meat to make cleaning worthwhile. This also gives bractice because the scallops are large enough to produce least 1.5 to two inches in size is seen as a best scalloping Though not required, collecting scallops that are at

swimsuit. They can pinch! scallops in a mesh bag, rather than in a pocket or in your see you, but they do not swim fast or far. Keep collected neon-blue eyes and may try to swim away when they pottom meets the edge of the grasses. Scallops have many easiest to find in borderline areas where the sand/mud beds, usually lying on their ventral shells. Often, they are Scallops may be spotted on or near the bottom of seagrass

COLLECTING

EQUIPMENT NEEDED

- Swim mask Swim fins
- •Small mesh bag
- Divers-down flag
- (required by law)

- » Tethered to diver; must be at least 12 inches by 12 inches; mandatory when using a mask and snorkel from the beach unless it is a marked swimming area.
- » You must make reasonable efforts to stay within 300 feet of a divers-down flag on open waters and within 100 feet of a flag within rivers, inlets, or navigation

Boat

» Usually required to get to the best scalloping areas. In shallow water, it is possible to wade for scallops in the seagrass, or to collect them from a shallow-draft boat using a dip net or landing net, but these methods are not very productive. Most scallopers go by boat into water 4 to 10 feet deep where they anchor, put up their dive flag, and snorkel over the beds, collecting the scallops by hand.

There are some exceptions listed in the and 65 must have a current Florida saltwater fishing license In general, recreational scallopers between the ages of 16 In Florida, commercial harvest of bay scallops is banned.

LEGAL REQUIREMENTS

RECIPES

FRIED SCALLOPS

Prepare an egg wash by beating 1 egg in 1/2 cup milk. Season wash to personal preference with salt and pepper. Dip scallop meats in egg wash, then coat with any prepared seafood breading or seasoned bread crumbs. Fry quickly (1-2 minutes or until golden brown) in hot, not smoking, grease (375°F). Drain on paper towels.

SIMPLY DELICIOUS SCALLOPS

Sauté 3 pounds Florida scallops in 2 tablespoons melted butter in a large skillet over medium heat. Stir until opaque, about 1 minute. Overcooking makes the texture rubbery. Remove scallops from skillet and set aside.

Wipe out skillet, then melt 1/2 cup butter over medium-low heat; add 2 cloves garlic and salt and pepper to taste. Stir for 3 minutes and add scallops.

Serve immediately over prepared pasta of your choice, such as angel hair. Garnish with fresh dill and season with freshly ground pepper.

Cleaning Your Shells

Be courteous of other scallopers and move your boat away from the scalloping areas first, then anchor. It's no fun scalloping where others are cleaning their catch.

When done cleaning sc allops, do not discard shells in rivers, channels, springs, or in the water at boat ramps or marinas. Shells could fill these areas, incurring costs to remove the shells and causing negative impacts on swimmers, wildlife, and navigation. Discard scallop shells out in Gulf waters, or store shells in a bag and discard at home.
