

ENH-100 (revision)

Response of Turfgrass and Turfgrass Weeds to Herbicides¹

J. B. Unruh and B.J. Brecke²

Weeds are seldom a serious problem in a well-managed, vigorous turf. Encroachment of weeds into turfgrass is usually a sign of a weakened stand due to such factors as insects, diseases, nematodes, inadequate watering, improper mowing, poor fertilization, incorrect pH, etc. Herbicides may temporarily remove the weeds; however, unless the basic cause of the weakened turf is corrected, the weed will continue to return as a problem.

If a herbicide is needed, the following tables can serve as a guide in deciding which one to use. The first step is to determine which herbicide can be safely used on the turfgrass species. Table 1 and Table 2 list the expected turfgrass tolerance to certain herbicides. Table 3 and Table 4 list the effectiveness of preemergence and postemergence herbicides in controlling common weeds found in turf. Since no single herbicide will control all weeds, accurate weed identification is essential before selecting a herbicide. *It is important to note that the information contained in the tolerance tables refers to the turf's tolerance to a single application of the named compound when applied alone (or in mixtures as noted). Chemical "cocktails" where two or more herbicides are mixed together may result in increased turfgrass injury, and caution should be taken when using such mixtures.*

Read the label of the herbicide selected to be certain the herbicide is labeled for the desired use. All herbicides are not labeled for use in home lawns. Accurate calibration and application are critical.

Excessive overlaps may result in turfgrass damage, while failure to obtain proper overlap may result in strips without weed control. Preemergence applications should be made before weed seed germinate. In general, for summer grass weed control, application should be approximately February 1 in south Florida, February 15 in central Florida, and March 1 in north Florida. Because adequate soil moisture both prior to and following application is necessary for effective weed control, avoid spraying during times of drought. Do not use a weed and feed type product every time the lawn is fertilized and be careful not to apply over the roots of sensitive ornamentals and trees.

Postemergence applications should be made when weeds are small. For hard-to-control perennial weeds, multiple applications are usually most effective but these may be damaging to turfgrass. Warm temperatures (70-80°F) generally increase activity, but yellowing may result when applications are made when temperatures are hot (greater than 85°F). To ensure good coverage, herbicides should be mixed with 25 to 30 gallons of water per acre per application. Two applications, using the low rates suggested on the label, spaced 7 to 10 days apart, are often most effective. Read the label and follow suggested rates and use restrictions.

The information in the following tables is not to be considered as recommendations for use of herbicides on turfgrasses, but as resource material to enhance the understanding of turfgrass responses to herbicides.

crabgrass	<i>Digitaria sp.</i>
crowfootgrass	<i>Dactyloctenium aegyptium (L.) Willd.</i>
cudweed	<i>Gnaphalium sp.</i>
dallisgrass	<i>Paspalum dilatatum Poir.</i>
dandelion	<i>Taraxacum officinale Weber</i>
dayflower, spreading	<i>Commelina diffusa Burrm. f.</i>
dichondra	<i>Dichondra micrantha Urban</i>
docks	<i>Rumex sp.</i>
doveweed	<i>Murdannia nudiflora (L.) Brenan</i>
Florida betony	<i>Stachys floridana Shuttlew</i>
geranium, carolina	<i>Geranium carolinianum L.</i>
goosegrass	<i>Eleusine indica (L.) Gaertner</i>
ground ivy	<i>Glechoma hederacea L.</i>
hawkweed	<i>Hedera acanthophylla L.</i>
henbit	<i>Lamium amplexicaule L.</i>
hop clovers	<i>Trifolium aureum Pollich</i>
knotweed	<i>Polygonum aviculare L.</i>
lespedeza	<i>Lespedeza striata (Thunb. Ex Murray) Hook. & Arn.</i>
mallow	<i>Malva rotundifolia L.</i>
mock strawberry	<i>Duchesnea indica (Andreus) Focke</i>
mouseear chickweed	<i>Cerastium vulgatum L.</i>
mugwort	<i>Artemisia vulgaris L.</i>
mustards	<i>Brassica kaber (DC) L. Wheeler</i>
parsley piert	<i>Alchemilla arvensis (L.) Scop.</i>
pennywort (dollarweed)	<i>Hydrocotyle sp.</i>
pepperweed, Virginia	<i>Lepidium virginicum L.</i>
perennial ryegrass	<i>Lolium perenne L.</i>
pigweed	<i>Amaranthus sp.</i>
plantains	<i>Plantago sp.</i>
purple nutsedge	<i>Cyperus rotundus L.</i>
sandbur	<i>Cenchrus sp.</i>
seashore paspalum	<i>Paspalum vaginatum Sw</i>
shepherdspurse	<i>Capsella bursa-pastoris (L.) Medikus</i>
spurges	<i>Euphorbia sp.</i>
spurweed (burweed)	<i>Soliva pterosperma (Jussieu) Lessing</i>
St. Augustinegrass	<i>Stenotaphrum secundatum (Walter) Kuntze</i>
tall fescue	<i>Festuca arundinacea Schreber</i>
thistles	<i>Cirsium sp.</i>
torpedograss	<i>Panicum repens L.</i>
Virginia buttonweed	<i>Diodia virginiana L.</i>
violets	<i>Viola sp.</i>
white clover	<i>Trifolium repens L.</i>
wild garlic	<i>Allium vineale L.</i>
wild onion	<i>Allium canadense L.</i>
yellow nutsedge	<i>Cyperus esculentus L.</i>
yellow woodsorrel	<i>Oxalis stricta L.</i>

Table 6. Common and Trade Names of Turf Herbicides

Common Name	Trade Name(s)
Atrazine	Aatrex, Atrazine Plus, Purge II, + others
Benefin	Balan, Crabgrass Preventer, + others
Benefin & oryzalin	XL 2G
Benefin & oxadiazon	RegalStar
Benefin & trifluralin	Team 2G
Bensulide	Betasan, Pre-San, Bensumec 4, Weedgrass Preventer, + others
Bentazon	Basagran T&O, Lescogran 4L
Bentazon & Atrazine	Prompt
Bispyrabac	Velocity
Bromoxynil	Buctril 2L
Carfentrazone	Quicksilver/Aim
Carfentrazone + 2,4-D + MCPP + Dicamba	SpeedZone, SpeedZone - Southern
Carfentrazone + MCPA + MCPP + Dicamba	Power Zone
Clethodim	Envoy
Clopyralid	Lontrel T&O
2,4-D	Many
2,4-D+Clopyralid + Dicamba	Millennium Ultra 2
DCPA	Dacthal 75WP, Garden Weed Preventer, + others
Dicamba	Vanquish 4L, K-O-G Weed Control, + others
Diclofop	Iloxan 3EC
Dithiopyr	Dimension Ultra
Diquat	Reward LS
DSMA	Ansar 6.6
Ethofumesate	Prograss 1.5L
Fenoxaprop	Acclaim
Fluazifop	Fusilade II
Fluroxypyr	Spotlight
Foramsulfuron	Revolver
Glufosinate	Finale 1L
Glyphosate	RoundUp, Touchdown PRO, Glyphomaxx
Halosulfuron	Sedgehammer 75DG / Sandea 75DG
Imazaquin	Image 70DG
Isoxaben	Gallery 75DF
MCPP	Mecomec 4
MCPP, 2,4-D + dicamba + MCPA and/or 2,4-D	Trimec Southern/3-Way Selective/Eliminate DG/33, others
Metribuzin	Sencor 75DF
Metolachlor	Pennant Magnum
Metsulfuron	Manor
MSMA	Daconate 6, Bueno 6, others
Napropamide	Devrinol 50DF, Ornamental Herbicide 2G
Oryzalin	Surflan AS
Oxadiazon	Ronstar 2G, 50WP
Pendimethalin	Pre-M, Pendulum, Southern Weedgrass
Prodiamine	Barricade 65WG, 4FL / ProClipse
Pronamide	Kerb 50WP
Quinclorac	Drive
Rimsulfuron	TranXit GTA
Sethoxydim	Vantage
Simazine	Princep Liquid, others
Sulfentrazone	Dismiss
Sulfentrazone + 2,4-D + MCPP + Dicamba	Surge Broadleaf Herbicide
Sulfometuron	Oust
Sulfosulfuron	Certainty
Triclopyr + clopyralid	Confront
Trifloxsulfuron	Monument
