Many health conditions can be improved with better eating.

Eating three or more times a day helps your body stay healthy.

Eating few fruits and veggies limits your intake of important nutrients.

Drinking water and non-alcoholic and low-sugar beverages keeps you hydrated.

Mouth pain makes it hard to eat and difficult to digest food.

People tend to eat less when alone. Try eating with friends or family.

Figure 1. Sharing a meal with a family member, friend, or neighbor can make mealtime pleasant and improve food intake.
