

Shopping for Health: Beans, Peas, and Lentils¹

Lakshmi Mahan, Lauren Foster, and Wendy J. Dahl²

What's the Big Deal about Beans?

Beans, one of the most wholesome foods in nature, provide a wide range of health benefits—they come packed with protein, fiber, potassium, and vitamins.⁽¹⁾ Naturally low in fat, they contain no cholesterol and are very low in saturated fat. Beans rich in color are also high in antioxidants.

Shopping for Beans

Beans, peas, and lentils are also called *legumes* or *pulses*. A wide variety of pulses is found all over the world, each with a unique color, shape, and flavor. Some commonly consumed beans, peas, and lentils are featured throughout this publication.

Beans, peas, and lentils may be available fresh, frozen, or, more commonly, **dried** or **canned**.

Dried Beans

When shopping for dried beans, you should look for beans that are bright in color and uniform in size. Do not purchase packages with cracked or broken beans, as they might have been damaged by insects.

Canned Varieties

Various types of beans come in a canned form, including red kidney beans, white kidney beans, pinto beans, black beans, and garbanzo beans/chickpeas. When choosing canned beans, those that are labeled “low sodium” or “no added salt” are the healthiest choices. For more information

Beans and Nutrition

When deciding what type of beans to buy, consider nutritional content. Most beans have similar base nutritional values, being high in protein and fiber. Table 1 lists some common beans and their protein, fiber, and calorie contents.⁽²⁾

Table 1. Protein and fiber contents of beans with average calorie counts per serving

Beans (½ cup serving)	Calories	Protein (g)	Fiber (g)
Red Kidney	110	7	6
Pinto	120	8	7
Black (Turtle)	120	7	5
Chickpeas	140	7	6
Split Peas	114	8	8
Lentils	110	9	8

Meals with Beans

Beans can be used in a variety of ways, from salad toppings to main course dishes. Table 2 lists some good ways to incorporate canned beans into different dishes. Beans can also be incorporated into desserts, snacks, and convenience foods. For example, canned kidney beans can be mashed and added to canned pasta and tomato sauce, or even used to extend ground beef in burgers and meatloaf. “Low sodium” or “no added salt” canned beans work very well in cake and cookie recipes. See what follows for some great recipes!

Table 2. Adding beans to your meals

Bean Type	Use
Navy	Soups, stews, baked beans, purées
Kidney	Chili, three-bean salads
Pinto	Refried, stews, dips, Tex-Mex dishes
Great Northern	Soups, stews
Garbanzo	Salads, hummus
Lentils	Soups, stews

BLACK-BEAN BROWNIES

1 box brownie mix (plus additional required ingredients listed on box)
1 can (15 ounce) black beans, no salt added, drained and rinsed

Mash black beans with a fork until very smooth. Prepare brownie mix, following directions on the box, and stir in mashed beans as last ingredient. Bake brownies according to box instructions. Enjoy!

BIRTHDAY CUPCAKES

1 box vanilla cake mix (plus additional required ingredients listed on box)
1 (15 ounce) can cannellini beans, no salt added

Mash beans in a separate bowl with a fork until smooth. Prepare cake mix, following directions on the box, adding beans with other required ingredients. Mix well. Bake according to directions. Frost with choice of frosting.

CREAMY BLACK-BEAN DIP

1 container (16 ounce) fat-free cream cheese
1 can (15 ounce) reduced-sodium black beans, drained and rinsed
3 Tbsp fresh cilantro
2 Tbsp chopped tomato (optional)
 $\frac{3}{4}$ cup cheddar cheese, shredded
Salt and pepper to taste

Mash half the can of beans with a fork. Mix mashed beans with the cream cheese and cilantro until smooth. Gently stir in the rest of the beans. Before serving, sprinkle cheese and chopped tomato on top. Serve with tortilla chips or crackers.
