

Naugatuck Agricultural Chemicals

product	application	advantages
Aramite miticide	controls mites on citrus and deciduous fruits, cotton, other row crops, ornamentals and vine crops. Also controls poultry mites.	non-hazardous, low cost per acre, highly compatible, harmless to natural predators.
Spergon® seed protectant	controls soil fungi and storage insects (with DDT) on most crop and vegetable seeds.	effective at economical dosages, safe on seed, easy to use, compatible with most other chemicals including legume inoculants, low cost.
Phygon®-XL fungicide	controls fungus diseases on fruit trees and row crops.	extremely low cost per acre, easy to apply, compatible, harmless to pollen and bees.
MH growth retardant and herbicide	inhibits grass growth: controls wild onions and quack grass; prevents tobacco suckering. Pre-harvest application prevents destructive storage sprouting of edible onions and potatoes.	extremely safe on plants; easy to apply: in wild onion control, one spray lasts up to 3 years.
Alanap® pre-emergence weed killer	pre-emergence weed-control for vine, row crops; asparagus and nursery stock. Available commercially for use on vine crops.	safe on recommended crops, relatively non-toxic, easy to apply, favorably priced.
Duraset®-20W flower and fruit-setting compound <small>*U. S. PAT. 2,556,665</small>	a fruit-setting chemical for lima beans, legumes, peppers and various tree fruits.	low dosage per acre, easily applied as a foliage spray.

KELTHANE, the new longer-lasting miticide, is a real boon to any grower who must keep mite populations at a low level. Its success is attested to by growers of many fruits, vegetables, flowers, shrubs and ornamentals.

KELTHANE gives you fast, positive kill of most troublesome mite species, including "resistant" strains. Fewer applications are required, because of its long residual activity. What's more, KELTHANE is harmless to operators, beneficial insects, animals and adjacent crops when used as directed. For minimum mite damage and maximum yields...look to KELTHANE, today's really effective miticide in emulsifiable concentrate, wettable powder, or dust formulations.

VELSICOL

INSECTICIDES

Versatility and lasting residual action have made them useful throughout the world for control of insects that attack homes and gardens, damage crops, and carry disease.

HEPTACHLOR

***...for
soil insect control
in
agriculture!***

In hundreds of soil insect control tests conducted since its introduction, Heptachlor has proven to be a most efficient soil insecticide for use on corn and other major crops.

ENDRIN

***... for
hard to kill
pests
of major crops!***

Endrin is relatively new, but 1960 saw the development of many new uses for this powerful, versatile insecticide. Apples, potatoes, cotton and other crops were extensively treated with Endrin during the past year.

CHLORDANE

***...for termite, public
health, household,
lawn and garden
insect control!***

Chlordane continues to be a most popular insecticide with pest control operators and homeowners. It has an excellent safety and performance record.
