

the
grass
is
always
greener

... on Superior Sam's side of the fence.

Superior *Extra Value* Fertilizers make pastures lusher and greener. You can always count on higher quality to help you upgrade stock for more profits – or help you increase milk production and butterfat content.

Call *your* Superior Pasture Representative to make a detailed study of your fertilizer and grazing rotation needs. Fertilizers will be custom-blended for you and delivered bagged or in bulk when and where you want them.

SUPERIOR SAM SAYS:

FERTILIZE IMMEDIATELY thin strands of grass pastures – then "rest." FERTILIZE NOW for a) early summer hay, b) grass, silage and c) peak summer grazing.

IT'S NOT TOO LATE to seed summer legumes and other temporary crops for silage, hay or grazing.

FERTILIZERS DIVISION

PLANTS: Tampa and Ft. Pierce

No. 1 NAME IN FERTILIZERS AND CHEMICALS SINCE 1936
