protect citrus with *KELTHANE*® for top dollar returns

Give oranges and other citrus fruit the proven protection of *KELTHANE* to get the best prices at selling time. This remarkable miticide has the drop on such destructive pests as the citrus rust, citrus red, six-spotted and Texas citrus mites any time they show up in your groves. Safe for foliage or fruit and harmless to beneficial insects. Use it up to 7 days before harvest. Just follow the label. Long residual life against both nymphs and adults. See your farm supply dealer for complete information on *KELTHANE* and its proper application.
