

We pledge ourselves to your future

250 scientists are engaged in vital projects at this vast agricultural research center. Their goal is to find new chemicals and techniques that will help farmers to produce more, higher quality crops and livestock at lower cost. / New products, new ideas—renowned names like Malathion insecticide... Aureomycin[®] antibiotic... Cabvac[®] canine vaccine... Aero[®] fertilizers. These, and many more developed by our research workers have made Cyanamid what it is today... one of the largest and most highly respected agricultural chemical producers in the world. / Our staff is proud to dedicate its future endeavors to you, the men and women who are constantly looking for new “tools” to use in increasing and improving our farm productivity. For, truly, Cyanamid serves those who make a business of agriculture.
