

By any other name...

®META-SYSTOX-R insecticide works just as great in your lawn or garden.

®META-SYSTOX-R enjoys wide popularity as a primary ingredient in lawn and garden insecticides sold by other companies.

And we feel that's a pretty strong endorsement of our product's performance.

As a foliar spray, it's extremely effective for insect control on all kinds of flowers, shrubs and trees.

Its principal targets are aphids, birch leaf miners, holly leaf miners, leafhoppers, mites, thrips and whiteflies. And its protection is long lasting.

As a systemic, META-SYSTOX-R

works inside the plant. So, once absorbed, it doesn't destroy beneficial insect populations.

But its value extends beyond the limit of your yard. Under the Chemagro label, field crops, vegetables, fruit trees and melons receive outstanding protection from insect damage with this popular pesticide.

META-SYSTOX-R. It works so well we couldn't keep it to ourselves.
