

YOUR GROWTH LINE.

Growth.

That's what Chemagro
is all about:

The two new multi-million
dollar chemical manufacturing
plants just completed.

The new products recently
registered.

The expanded Research and
Development programs
designed to bring a number
of important experimental
compounds nearer to
registration.

All this activity and
investment is directed toward
one objective: to provide the
world's most productive farmers

with dependable, quality
pesticides to help them be even
more productive at the lowest
possible cost.

Thus, we at Chemagro play
an important role in winning the
struggle against world famine,
and help create a better life.

This is what keeps Chemagro
growing.
