

as for his generous donation of several types to the National Museum of Natural History. Much of the material received for study from Mr. Kimball was collected by Mrs. Spencer Kemp of Key Largo, Florida. For similar reasons, I wish also to express my gratitude to Sherry L. Kitto of the State of Florida Department of Agriculture, Division of Plant Industry. I am grateful to Drs. Christopher Wilkinson of Vrije Universiteit, Amsterdam, Netherlands and Bert Gustafsson of the Naturhistoriska Riksmuseet, Stockholm, Sweden, for their comments regarding the 2 new genera proposed herein. Finally, I wish to acknowledge the assistance of the Smithsonian Research Foundation, which has materially supported my research on leaf-mining Lepidoptera. The illustrations for this paper were by Ms. Ann Szymkowicz, Ms. Biruta Akerbergs, Ms. Elaine Hodges, and myself.
