

From the Editor

The Florida Geographer is the official publication of the Florida Society of Geographers and is distributed free to members of the society. It is a statewide journal with coverage of social and physical geographical topics. Most articles are related to the state, or feature Florida figures as an important component.

Papers are welcomed from all who feel they have research worthy of dissemination. Authors should not be dissuaded from submitting articles for review because of format considerations. It is requested that authors follow the following guidelines when submitting their manuscripts:

- All manuscripts should be sent in electronic form. Text should be submitted as a Microsoft Word document (*.doc) or as a rich text file (*.rtf). Authors should submit the final copy on an IBM compatible disk, a CD, or emailed to the editor.
- Figures and maps, if submitted separately from the text, should be sent as a JPEG (*.jpg) or graphical image file (*.gif). Tables may also be submitted in Excel or Quattro Pro format. Please note that all images will be printed in black and white, and as such should be sent as either black and white or gray-scale images. Please include the figure (table) number, title, and source .
- It is the author's responsibility to ensure that none of the materials used in the paper are copyright-protected.
- Headings, paragraphs, and references should be consistent in their style.
- Please use in-text citations; footnotes will not be accepted. Endnotes should only be used sparingly.

Please send manuscripts, comments, style guide requests, and questions to:

Kevin Archer
