*This GUIDE TO AUTHORS will be revised and published every year in back of the Proceedings of the Florida State Horticultural Society, dated reprints of which will be available to the Program Coordinator, Vice-Presidents, Co-editors, others, from the Program Coordinator's office, Citrus REC, Lake Alfred, Fl. 33850-2299; (941) 956-1151; e-mail jkgu@icon.lal.ufl.edu. Please destroy out-dated guides.

INTRODUCTION

The purpose of the Proceedings of the Florida State Horticultural Society is to communicate the results of applied and technical research and teaching relevant to the needs of horticulture in the state. The following policies have been developed by the Editors of the Proceedings and approved by the Society's Executive Board.

I. Submission and Acceptance of Manuscript

- A. The SENIOR AUTHOR *must* be a member of the Society, and the person presenting the paper *must* be registered at the annual meeting (except for invited papers) for papers to be accepted for the Proceedings. Papers not presented at the meeting will not be published.
- B. Acceptances of abstracts for presentation at the meeting does not imply acceptance of manuscripts for publication in the Proceedings.
- C. *Completed Manuscripts* in final form, including any figures and tables, **hard copy and disk (p. 429) ARE DUE AT THE TIME OF YOUR ORAL PRESENTATION.** Editors will be pressing this demand. If your paper is unavoidably late, check with your Section Associate Editor, or Norman Childers, Editor and *plan to submit it the following year for printing if it is more than a month late.*
- D. **STUDENT PAPERS** are due 3 weeks before the annual meeting at the Editors office, Rm 2115 Fifield Hall, Univ. of Florida 32611.

E. IFAS papers must have a Journal Series No. See base of page 428.

II. Subject Matter Encouraged. Prior Submission Policy (In-coming Program Vice-presidents should read carefully.)

- A. Papers encouraged:
 - 1. Results of applied research directly applicable to Florida horticulture.
 - 2. Results of observation, experience, or research by growers, industry or extension workers that present something of interest to Florida horticulture.
- B. Papers discouraged.
 - 1. General reviews.
 - 2. Trip reports unless a unique insight of a relevant subject.
 - 3. Research with no direct bearing on Florida horticulture.
 - 4. Papers promoting a commercial product.
 - 5. Popular articles with information largely available elsewhere.
 - 6. Technical papers presenting one's beliefs or opinions without scientific backing.
- C. Publication of previously released information:
 - 1. The Society places preference and publication priority on original, unpublished material. However, information published elsewhere and/or submitted to other journals, or news media may be published in the Proceedings provided (a) the subject matter is Florida-oriented; and (b) the manuscript is not a verbatim copy.
- D. Paper republished elsewhere:
 - 1. A paper may be reproduced in another publication only after presentation of the paper at the FSHS meetings. Proper credit should be given to the Society with the date and place of presentation at bottom of first page.
- E. Guide for growers, industry, Extension authors.
 - 1. These papers are encouraged. You do not need to follow the procedure for technical research papers. Simply give your paper title, your name(s) and address(es), an abstract or summary of your paper, an introduction, a discussion broken into headings if desirable and cite any references you may wish. Try to limit your paper to about 4 to 6 double-spaced typed manuscript pages with any graph(s) or photograph(s). The Vice-President of each of six sections (citrus, ornamentals, garden and landscape, krome, processing and handling, vegetables) will seek these papers in early summer for the published program, reply with your paper title, then prepare your paper following the general style in a former Proceedings. After your presentation in November, turn the paper over to your Section Vice-President monitoring the meeting. The editors then will edit and process your paper for the Proceedings. Papers promoting a commercial product or company cannot be accepted.

III. Manuscript Review and Publication Costs

A. Review

Papers presented for publication in the Proceedings are generally published with minor editorial changes. However, editors may request revisions if manuscripts are verbose, unclear, not in the proper style, or contain extraneous or improperly documented statements. The Society reserves the right to reject papers or to publish them as abstracts only as determined by the Section Associate Editor with concurrence of the Editor. In a case where the Editor does not concur with the Associate Editor, he shall notify the Associate Editor of his reason in writing. In addition to these changes, the Editorial Committee requests that the *Program Coordinator* instruct the incoming *Section Vice Presidents* of the types of papers that are encouraged and those that are not encouraged for presentation and publication.

B. Publication costs, length limitations

Two printed 8½ × 11 pages (in Proceedings) including tables and figures will be published without charge if the senior author is a paid-up member and has paid the registration fee at the respective annual meeting. Additional pages will be allowed at a charge of \$100.00 per printed page in ¼ page increments. About 5 pages of

double-spaced typing with the usual number of tables and figures will equal about one printed page in the Proceedings. Excessively long papers will be returned for shortening.

- C. *Senior authors must register* and pay registration and membership at the respective annual meeting to get their paper printed.

INSTRUCTIONS TO AUTHORS

- a) Check a recent edition of *FSHS Proceedings* for format and style of papers similar to yours.
- b) Submit one clear, legible, typed manuscript with disk version (see p. 429)*. at time of oral presentation of paper.
- c) Use 8½ x 11 standard weight bond, no printer borders or line numbers.
- d) Leave 1¼-inch margins around text for editorial comments.
- e) Double-space throughout—legends, footnotes, tables, and abstracts.
- f) Number all pages upper right corners.
- g) Put figures, tables after *Literature Cited*.
- h) No hyphenated words on line endings.
- i) Only *IFAS authors must* obtain a Journal Series Number from office of Dean for Research, Gainesville. Send two paper copies with transmittal form (from Department Chairman's office) *BEFORE PAPER IS PRESENTED*. (Journal Series Number is in footnote on first manuscript page). The copy will be returned to you with a Jr. Ser. No. The Dean tries to keep a record of all abstracts, papers, etc. of each faculty member to be referred to in considering promotions and your advancement.
- j) *Manuscript should be reviewed by 2 or more peers before submission.*

*The accompanying disk will help reduce printing charges appreciably.

Top of first page

Proc. Fla. State Hort. Soc. 19____ Paper No. _____
Business phone _____ Program section _____

Title

Capitalize first letter of each key word, as "Induction of Bulbing in Onion by Ethephon". Make title as short as possible but inclusive of key information.

Author(s)

John Doe
Horticultural Sciences Dept.
University of Florida, IFAS
Gainesville, FL 32611

- a. No academic titles needed, as "Assistant Professor."
- b. Authors may be grouped within the same department and institution.
- c. Other authors are listed individually with address.
- d. Underline business affiliation and address.

Additional Index Words

Underline *Additional index words*. Do Not indent. Use key words not listed in title. If none, ignore. Examples: fruit volatiles, rootstocks. No caps unless proper noun. Include scientific name (in *Italics*) of organisms (without authority) that are not in the title.

Abstract

Don't indent. Underline *Abstract*. First sentence on same line. Make results clear, concise, only 3-5% of paper length. Use scientific names (*Italics*) with the authority for organisms. A line, as shown below, should separate the abstract from the manuscript text.
(18 space line)

Footnotes

Footnotes that are referred to from the title or authors' name should be placed at the bottom of the first page even if the *Abstract* is continued to the second page. The first footnote should not be numbered. It should include, when applicable, the Experiment Station Journal Series Number, acknowledgments, and disclaimers. Other footnotes are referred to by raised Arabic numerals in sequence. Typical *Footnotes* would be:
(18 space line to separate text from footnotes)

Florida Agricultural Experiment Station Journal Series No. _____. This project was supported by the "ABC" Foundation.

Proc. Fla. State Hort. Soc. 110: 1997.

¹Retired (followed by address).

Footnotes after title page should be typed at the bottom of the respective manuscript page. Footnotes should be kept to an absolute minimum and are permissible for explanatory material not appropriate for inclusion in the text or tables.

Introduction and Review of Literature

The introduction and review of literature can be combined without separate headings following the abstract. Firstly, state clearly purpose of work. Keep literature brief. When appropriate, cite a published paper with the more detailed review. Use the Harvard system: Jones (1998), (Jones, 1998). See also "Literature Cited" section, which is a centered main bold face heading.

Materials and Methods

This is a main heading, centered, and will be printed in bold face. Describe in general terms the methods, equipment, materials used. Avoid repeating highly technical procedures, terms previously printed. Describe specific experimental design used where appropriate.

Results and Discussion

A main heading, printed in bold face, centered.

Clarity and brevity are paramount in text, tables, graphs, charts, and photographs.

Use either table or graph, not both for the same data. Graphs preferred.

Try to avoid long detailed tables.

Avoid unsupported theories and speculations.

Literature Cited

A main heading, centered, bold face.

Citations are given at the end of the text, listed by author alphabetically with multiple senior author listed chronologically.

Use the Harvard system within the manuscript: (Jones, 1998) or (Jones and Brown, 1998). For research previously reported, cite the original paper.

For each citation: List author(s), date published, title, publication, volume, page numbers.

List senior authors in alphabetical order, then secondary authors also alphabetical.

For multiple citations same author, list chronologically. Repeat author names, don't use underlines.

If no author, use "Anonymous" or the publishing agency.

Use "In press" at end of citation if manuscript has been accepted for publication.

Do not italicize bulletins, circulars, or journals.

Cite only published materials. Mimeographed reports, letters, personal communications should be included in parentheses in the text, as (J. Jones. University of Florida, personal communication). Some examples follow.

Periodical

Ones, J. P., J. W. Scott and J. P. Crill. 1989. Fusarium wilt of tomato in Florida before and after an overseasoning period. *Proc. Fla. State Hort. Soc.* 102:358-360.

Abstract

Verkade, S. D. and G. E. Fitzpatrick. 1990. Efficacy of solid waste compost as a propagation medium. *HortScience* 25(9):1107 (Abstr.).

Book

Jackson, L. K. 1990. Citrus growing in Florida. 3rd ed. 293 p. Univ. of Fla. Press. Gainesville.

Book Chapter

Locascio, S. J., W. J. Wiltbank, D. D. Gull and D. N. Maynard. 1984. Fruit and vegetable quality as affected by nitrogen nutrition. 617-626. In: R. D. Hauck (ed.). Nitrogen in crop production. Amer. Soc. Agron. Madison, WI.

Bulletin

Koo, R. C., C. A. Anderson, I. Stewart, D. P. Tucker, D. V. Calvert and H. K. Wutscher. 1986. Recommended fertilizers and nutritional sprays for citrus. *Fla. Agr. Expt. Sta. Bul.* 536D.

Thesis

Wernett, H. C. 1990. Genetics and breeding of postharvest longevity in cut flowers of *Gerbera X hybrida* Hort. Ph.D Diss., Univ. of Fla., Gainesville.

Extension Circular

Hochmuth, G. J. 1996. Commercial vegetable fertilization guide. Fl. Coop. Ext. Serv. Cir. 225D.

Most accepted abbreviations can be found in the *Literature Cited* sections of papers published in the Proceedings. Following are common:

Agr.	Agriculture	Entomol.	Entomology
Amer.	American	Expt.	Experiment
Anal.	Analysis	Ext.	Extension
	Analytical	Hort.	Horticulture
Ann.	Annals	Inst.	Institute
Annu.	Annual	Intern.	International
Austral.	Australian	J.	Journal
Bot.	Botanical	Physiol.	Physiology
Bul.	Bulletin	Proc.	Proceedings
Cir.	Circular	Res.	Research
Conf.	Conference	Rpt.	Report
Congr.	Congress	Rptr.	Reporter
Coop.	Cooperative	Sta.	Station
Dept.	Department	Soc.	Society
Dis.	Disease	Tech.	Technical
Eng.	Engineering		

In the *Literature Cited*, names of institutions should use standard abbreviations, i.e. U.S. Dept. Agr. (not USDA); Inst. Food Agr. Sci. (not IFAS), and Agr. Res. Center (not ARC).

Headings

Main Heading (centered)

Secondary heading, underlined. Indent as for a normal paragraph.

Tables

Tables are typeset, not photographed. Capitalize the first letter of the first word in column headings. Note: Statistical significance is indicated by lower case letters from "a" onward at the 5% level and capital letters at the 1% level. Raised lower case letters from "z" backwards are used for footnotes to tables. Put each table on a separate page at the end of the manuscript following *Literature Cited* section. Avoid cell borderlines in body of table.

Mean separation tests should be cited in the following form: "Mean separation (in rows, columns, etc.) by Duncan's multiple range test, 5% level."

Indicate the Preferred location of tables and figures by marking location (pencil is ok) in the left hand margin of text.

Figures

Abbreviate—Fig. 1, etc., followed by figure legend. All photographs, graphs, and charts are considered figures and are photographed for publication. Legends for figures are typed on a separate page on which the figure is mounted, not on the figure itself, since legends are typeset, not photographed. All figures should be photographs or original line drawings. Photocopies do not reproduce well. *Do not* glue figures to page as they must be separated. Use paper clips. Put manuscript number, author(s) name, and figure number on the back of each figure. Write lightly in ink or use a stick-on label. Pencils or ballpoint pen marks may show through. Where 2 or more photographs are to be combined in a composite illustration, this should be noted. Place figures after tables in the manuscript.

Make photocopies of figures with captions, then place this page properly in the manuscript. Attach original figures and legends in the manuscript. Thus, there will be no doubt about the figures' orientation and captions in the manuscript.

Numbers

All numbers used in the text should be Arabic numbers except at the beginning of sentences or where the meaning would not be clear, and numbers below 10 should be spelled out when not used with a unit of measurement.

Abbreviations

When abbreviating, use the following: (Note presence *or* absence of period.)

about	ca.
acre	spell out
active ingredient	a.i.
afternoon	PM
and others	et al. (no underline)
approximate	approx (table only)
atmosphere	atm (table only)
average	avg (table only)
before noon	AM
bushels per acre	bu/acre
centimeter(s)	cm
concentrated	concd (table only)
concentration	concn (table only)
cultivar	cv. (formal use only)
diameter	diam (table only)
dry weight	dry wt (table only)
experiment	expt. (table only)
	Expt. 1 (text)
feet	ft
figures(s)	Fig.
gallons(s)	gal
gram	g
hectare	ha
height	ht (table only)
hour(s)	hr
inch(es)	spell out
kilogram(s)	kg

miles per hour	mph
milliequivalent	meq
milligram(s)	mg
milliliter(s)	ml
millimeter(s)	mm
minimum	min (table only)
minute(s)	min
month	spell out (May, June, July only)
number	no.
ounce	oz
page(s)	p.
parts per million	ppm
percent	% (with numerals only)
pound(s)	lb
pounds per square inch	psi
relative humidity	RH (with numerals only)
second(s) (time)	sec
solution	soln (table only)
standard deviation	SD
temperature	temp (table only)
that is	i.e.
ton	T (table only)
versus	vs.
volume	vol (table only)
week(s)	wk (table only)
weight	wt (table only)
year(s)	yr

General

1. Scientific names should be italicized (underlined) when used as nouns but not when used as adjective: e.g. "The most common penicillium mold of citrus fruits is caused by *Penicillium digitatum* Sacc." Scientific names of all organisms should include appropriate authorities when first referred to in the abstract or text but not in both. Varietal or cultivar names should be in single quotes as 'Hamlin' except for: 1. rootstocks; 2. when used in the body of a table, or 3. when used with the scientific name, e.g. *Citrus sinensis* Osbeck cv. Hamlin.

2. Pesticides and other chemicals should be referred to by their accepted common chemical names. Use of trade names is discouraged unless there is no other, but can be included in parentheses when the chemical is first mentioned. The complete chemical composition is necessary only for materials without accepted common names such as numbered experimental compounds. Mixtures of materials or compounds with long names should be referred to in abbreviated form after first mentioned, e.g. "2,3,5-triiodobenzoic acid (TIBA)."

3. Where possible, full versions and abbreviations should appear in the abstract which is often reproduced separately from the text. Avoid use of non-standard abbreviations in the manuscript.
4. Use the English or metric system of measures as deemed appropriate, but do not mix the 2 systems in the same paper.
5. *Fertilizer analyses*. Use elemental terms, not as oxides, as K, not K₂O; P, not P₂O₅.
6. Use dates as 18 Nov. or 18 Nov. 1998.
7. Manuscripts should conform to the editorial policies of the *Journal of American Society for Horticultural Science* or *HortScience* except as noted in this document. These policies are presented in the ASHS Publications Manual which can be obtained from American Society for Horticultural Science, 600 Cameron Street, Alexandria, VA 22314-2562, or, check a late January issue of *HortScience*.

Transmission of Manuscripts after Oral Presentation

DO NOT FOLD. Whether mailed or hand delivered after your presentation, each manuscript should be in a large envelope. If photographs are used, include a "stiffener" and mark envelope clearly: "PHOTOS: DO NOT FOLD." *Submit your manuscript in FINAL form to your respective Section Vice-President at time of Presentation at the meeting.*

Only under special conditions and request to the Editor, can papers be sent to the editor *within a month* after the paper is presented. *If later, the Paper will be returned to you and not be printed in this year's proceedings.* This *must be done* to discourage very late publication of proceedings.

Please note:

We encourage you to record your papers on disks to save the Society considerable printing costs. Most secretaries are equipped to do this today.

Disk Submission Requirements

Combine all **text** and tables into one file. Label the physical disk with the **text file name**, (as it appears in the directory), **publication name**, **paper number** and the **word processing format** of the file. (ex: "**Peaches**", **FSHS**, **#101**, **wp 6.0**) **Graphics** must be proportional to final printing size and allow for no more than 50% reduction. **Avoid small screens, dots, and fine lines that will be lost in reductions.** Label each figure with author name and figure number(s). Graphics submitted electronically should correspond with the appropriate figure number(s). Listing on the label should include name, generation software and file format. (ex: "**fig. 1**", **illustrator**, **tiff**). Submissions in electronic form (Macintosh preferred), must have an appropriate

resolution and file format for printing. Line art should be 600-800 dpi, and photographs 300 dpi. File formats should be either **TIFF** or **EPS**. Use a higher dpi if there is any question and only compress files if necessary. **Any compressed files must be self extracting.** Include a hard copy of your **article and graphics** that represents the **final** editing of the electronic version. Include the **final** electronic version of your article on the diskette. Please **remove any previous versions or erroneous files**. All text submissions should be in IBM compatible word processing files. (ex: WordPerfect, Word etc.) If you use a proprietary based program or if there is a compatibility concern about your files, use an ASCII format. The FSHS printer, E. O. Painter Printing Company, accepts 3.5" or 5.25" high and low density diskettes, 44-88mb SyQuest, zip and 4mm DAT (Retrospect 2.0Bi) and (Deskape t2.0). Diskettes will not be returned.

Galley Proofs and Reprints

As soon as available, galley proofs will be sent by the printer *to the senior author*. Correct all errors *in red pencil* and return immediately (with the original manuscript) *to the Editor*. *If there is any chance you will be away, please so-indicate on the hard copy or make arrangements for someone else to proof read your galley.* Otherwise, confusion, big delay. Galley proofs will not be mailed outside the United States without the Editor's approval. *Foreign authors* should make arrangements for a qualified person within the USA to check your galley proof. *If the senior author is changing address, indicate on the first page of the manuscript to whom the printer should send the galley proof, as, "Send Galley Proof to."*

Instructions for ordering reprints will accompany galley proofs. Cost of reprints for IFAS faculty has been paid by the Dean of Research office, Gainesville.

Peer Review of Papers

Some authors may request their papers to be peer reviewed. The Society voted to do this at their annual business meeting in November 1997. A Board decision has been made to incorporate the practice.
