

Sponsored Student Program

EVALUATION OF SIDEDRESS FERTILIZATION FOR CORRECTING NUTRITIONAL DEFICITS IN LETTUCE

JAMES SHREFLER
university of Florida
Gainesville 32611

Lettuce production on organic soils in south Florida commonly requires fertilization with nitrogen (N), phosphorus (P) and potassium (K). Soil testing is used to determine nutrient status of soil prior to planting. Soil test calibration was developed based on the use of preplant fertilizer application. Because growers can not always obtain soil test results as

early as desired there are times when it would be convenient to apply fertilizers as a sidedress after the crop is planted. This paper presents results of the evaluation of sidedress fertilizer application to lettuce. It was determined that P could not be effectively applied to establish lettuce through sidedress application. Sidedress applications of N and K did not have a positive effect on lettuce yield either. Phosphorus was the most limiting nutrient under the conditions of the study. Evaluation of sidedress application of N and K under a more severe deficit of these nutrients still needs to be evaluated.

INFLUENCE OF ENDOSULFAN SPRAYS AND SILVER-COLORED MULCH ON SWEET POTATO WHITEFLY POPULATIONS, DISEASE SYMPTOMS, AND YIELDS OF ZUCCHINI SQUASH AND TOMATOES

EVA M. POHNER
IFAS, University of Florida
Gainesville 32611

C. A. Powell and P. J. Stoffella in Ft. Pierce conducted an experiment during the spring to determine the influence of (1) no silver mulch, no endosulfan sprays, (2) no silver mulch, endosulfan weekly sprays (0.31 oz/gal), (3) silver mulch, no endosulfan sprays, and (4) silver mulch and weekly endosulfan sprays on SPWF populations on squash and tomatoes, as well as disease symptoms and fruit yields.

For the squash, endosulfan sprays delayed the SPWF population buildup until 85 days. The incidence of squash silver leaf symptoms was less for those receiving endosulfan but within 85 days all the plants had symptoms. Squash yields

(693-744 bu/acre) were not impacted significantly by any of the treatments.

For the tomatoes, those plots receiving endosulfan sprays had a delayed population buildup (until 95 days), higher marketable yields (1531-1593 25 lb. boxes vs. 456-488 boxes), and less irregular ripening symptoms. The silver mulch did not have any significant effect on yield. The difference in yield may be due to other insects than SPWF. Leafminer, fruit worm damage as well as secondary fungal infections were found in the untreated plots.

One important factor to consider when evaluating these results is that the SPWF population levels in the experimental plot may have been 10 to 1000 times less than those in commercial fields.

CONTROL OF PAPAYA RINGSPOT VIRUS AND COLOR EXTENSION OF LICHEE

KEITH BIRKHOOLD
IFAS, University of Florida
Gainesville 32611

The commercial application of cross protection for the papaya ringspot virus was presented by Dr. R. T. McMillan during the Krome Memorial Institute Section. Inoculation of the avirulent papaya ringspot virus mutant into seedlings was achieved with a 98.7% success rate using a spray gun to apply the mutant virus extract and an abrasive. Although this method slows the spread of the virulent virus, it must be applied to every seedling planted, and cross protection may eventually fail if the site of infection for the virulent strain is apical meristem. The isolation and introduction of a gene

which codes for the virus coprotein appears to overcome these limitations, since once a papaya plant has this gene in its genome the resistance to heritable and protection is conferred even to the apical meristem.

Retention of external color with lichee is a problem, since browning of the peel naturally occurs several days after harvest. Besides refrigeration, several other color extension methods were suggested while talking with Craig Campbell. An approach which he currently employs is the prevention of dehydration through the use of ventilated polyethylene bags. Other methods include a one minute hot water bath dip (50-52°C) which contains 1% Benomyl, or placing fruit into a room with burning sulfur.

EFFECT OF NITROGEN AND LIGHT LEVEL ON GROWTH OF GOLDEN POTHOS

GRAHAM WRIGHT
IFAS, University of Florida
Gainesville 32611

The objective of the experiment was to determine the optimum levels of fertilization and light intensity for the production of Golden Pothos at two different times of year. Light levels of 2000, 3500 and 5000 foot-candles and nitrogen levels of 14, 42 and 70 mg N l⁻¹ were used in the first experiment, while levels of 3000, 4500 and 6000 foot-candles were used in the second experiment. Nitrogen fertilization levels in

the second experiment were 42, 70 and 98 mg N l⁻¹. The experiments were conducted on 23 April 1990 (Spring) and 19 June 1990 (Summer).

Best variegation and color grade in the first experiment were, while in summer, observed at 3500 foot-candles, with 42 mg N l⁻¹ significantly better growth was achieved at 6000 foot-candles with 70 mg N l⁻¹. High N levels led to an increase in the number of chlorotic leaves and an increase in vine length. Under low light intensities, nitrogen toxicity was found.

EFFECTS OF RECLAIMED-WATER ON MINERAL COMPOSITION AND FRUIT QUALITY OF CITRUS

MICHAEL MAUER
IFAS, University of Florida
Gainesville 32611

Irrigation of mature citrus with reclaimed-water was evaluated for a 3 year period in the Conserv II project. Observations were made on 9 control sites with well water, and 21 Conserv II sites using reclaimed-water. High pH was observed in Conserv II mainly due to high nutrient levels in the re-

claimed-water. Increases in total dissolved solids, N, P, K, Ca, Mg, Fe and Na were seen in Conserv II sites, but nutrient levels remained below toxic concentrations. Manganese and zinc levels were lower in Conserv II as compared to the controls. In general, soil moisture levels were higher in Conserv II than the controls. Fruit quality was decreased in Conserv II by a reduction of soluble solids, however overall yield was increased.

PLANNING COLD PROTECTION STRATEGIES

SCOTT KERR
Citrus Institute
Florida Southern College
Lakeland, FL 33801

J. David Martsolf discussed various cold protection strategies. Location, type of freeze and length of freeze are all influential factors in determining cold protection strategies. The most practical type of cold protection is irrigation. Irrigation serves for both cold protection and relieves

drought conditions. Various cold protection methods need to be considered to best suit the topography. If frost is not often a threat, one might consider less expensive methods of cold protection. In more severe locations combined methods such as heater pots and microsprinklers might be used harmoniously to lessen the damage to the grove. Future observations must be made to consider the ultimate cold protection for your individual grove, considering costs of protection and whether it will be justifiable in spending the additional money for the protection.

SCAFFOLD BRANCH IRRIGATION FOR FREEZE PROTECTION

RICHARD J. CRAWFORD
Citrus Institute
Florida Southern College
Lakeland, FL 33801-5698

A scaffold branch irrigation system was installed for freeze protection on five year old 'Washington' navel and 'Owari' satsuma trees. The system was in operation during the 1989 freeze at the LSU Citrus Research Station. Temperatures of -6.7°C or below for 20 continuous hours, and 0°C or below for 80 continuous hours were recorded. The low temperature was -11.1°C.

Trees that were irrigated by the scaffold system had an average tree survival rate of 93.6%. Approximately three-quarters of the scaffold branches survived and 8.6% of the canopy survived. The average amount of trunk damage was low, whereas average shoot regrowth after pruning was fairly high. Trees without irrigation were completely killed.

Scaffold branch irrigation achieved positive results as a means of freeze protection. Majority survival of the scaffold branches allowed quick regrowth of the tree canopies. Variables such as emitter pattern, height, and output are important to the success of this freeze protection method.

EFFECTIVENESS OF SCAFFOLD BRANCH IRRIGATION FOR FREEZE PROTECTION OF LOUISIANA CITRUS DURING 1989 FREEZE

ADAM BUNCH
Citrus Institute
Florida Southern College
Lakeland, Florida 33801-5698

Elevated microsprinklers were used in this experiment to determine the effectiveness of scaffold branch irrigation for freeze protection. The goal in this experiment was to spray the main scaffold branches of 5-year-old Washington navel and Owari Satsuma trees with water. The microsprinklers were placed just above the crotch of the tree to achieve this.

The experiment, conducted at the Louisiana Agricultural Experiment Station by W. J. Bourgeois and A. J. Adams, proved very successful. The average tree survival rate, using this technique, was 93.6%, and the scaffold branch survival

rate was 75.6%. The survival rate of non-protected trees was zero. Post freeze photographs of the trees showed healthy new growth on the scaffold branches where irrigation water was used, with the remainder of the canopy dead in most cases. These trees were pruned in such a way that left the main scaffold branches intact. This enabled the trees to re-grow their canopies much more quickly.

The objective of this experiment was not to protect the entire canopy, but only the scaffold branches. The experiment proved successful in this regard. By providing a healthy tree structure for new growth to occur, young citrus trees can recover more quickly from the devastating freezes that have been common in recent years. While not achieving total tree canopy protection, this technique is one of the most promising because of its usefulness in most young citrus plantings.

A SECOND LOOK AT USING HEATERS TO PROTECT CITRUS TREES

WILLIAM JAMES
Citrus Institute
Florida Southern College
Lakeland, FL 33801

After 5 major freezes in Florida in the past 10 years a tremendous amount of highly productive citrus land has been virtually abandoned. When the cost of fossil fuel skyrocketed in the 70's, the use of grove heaters became too expensive. In the following years when petroleum fuel did not continue

to have sharp increases in price, the practice of using grove heaters seemed antiquated. Because of this attitude many growers faced freezes with little or no freeze protection. Due to changing work markets and the price of fuel the cost of saving a producing tree with heaters is beginning to look more economically sound, when compared with the price of replanting and waiting for the trees to come into production. It may be possible in the future to design a cleaner burning and more efficient grove heater.

EFFECTIVENESS OF SCAFFOLD BRANCH IRRIGATION FOR FREEZE PROTECTION

ROBERT WINFREE
Citrus Institute
Florida Southern College
Lakeland, FL 33801

During the 1989 freeze, scaffold branch irrigation was used by the LSU Citrus Research Station to protect citrus trees. This proved to be most effective. Temperatures dipped below 11°C for 20 consecutive hours.

Post freeze damage revealed a 93% tree survival rate with a 75% survival of the scaffold branches and an 8.6% survival of the canopy. The non-protected trees were 100% killed and had to be removed. This method has proved to be useful to growers as a new method of cold protection and will help with the expansion of the Florida Citrus belt.

PLEASE WALK ON THE GRASSES

BRADY STARLING
Citrus Institute
Florida Southern College
Lakeland, FL 33801

Grass plays a drastic role in today's society. It is not only used as a landscape item, but used more for its biological controls.

Aeration and cooling are the two primary uses of grass in a commercial environment such as fleamarkets and shopping

malls. At fleamarkets it is used as a parking area which also acts as an aeration system when cars drive upon it. On the other hand, at shopping malls it is used as a cooling device to compensate for the extreme heat given off by the massive amounts of black top.

Grass is a definite factor in the construction of complexes and residential areas. And even though people think grass is just a cosmetic feature, its scientific values are of more importance.

NITROGEN CARRIER AND RATE EFFECTS ON FIELD-GROWN LAUREL OAK AND JAPANESE LIGUSTRUM

ORRINA R. SPEESE
Citrus Institute
Florida Southern College
Lakeland, Florida

A comparison of two nitrogen carriers, controlled release and water soluble, was made on field-grown laurel oaks, *Quercus hemispherical*, and on field-grown Japanese ligustrum, *Ligustrum japonicum*. The trees received three or six pounds N/1000 sq ft/year of Nutricote 40, 180, and 360 or of ammonium and calcium nitrate. Height and trunk caliper were measured. The duration of the experiment was seventeen months.

Results were unequivocal. Supplemental nitrogen affected oak growth only with one exception. There was a slight increase in height associated with the application rate of six pounds N/1000 sq ft/year. There was no difference among carriers. Ligustrum demonstrated improved growth rate with supplemental nitrogen fertilizer, and those receiving three pounds N/1000 sq ft/year were smaller than those receiving the six pound rate. There were no differences among fertilizer carriers. Fertilizing field-grown ligustrum will hasten growth rate, but will not improve the growth rate of laurel oaks.

RELATION OF PHOTOSYNTHESIS, GROWTH, AND ROOTING DURING POINSETTIA PROPAGATION

BONNIE L. COY
University of Florida
Fort Lauderdale Research and Education Center
3205 College Avenue
Fort Lauderdale, FL 33314

Use of high light intensities on poinsettia cuttings in relation to photosynthesis and adventitious rooting was studied by Drs. Sven E. Svenson and Fred T. Davies, Jr. For rooting stem tip cuttings of poinsettia, light recommendations in the

past have been as high as 3000 foot candles and as low as 900 foot candles. This experiment showed that at high and low light intensities photosynthesis was low and remained low until root primordia were formed. After root emergence, photosynthesis increased steadily with increasing light levels. Dr. Svenson recommended use of lower light levels prior to root initiation since there is no increase in the photosynthetic rate until visible roots are formed. At the onset of root emergence higher light levels could be established for maximum root growth with less threat of water stress.

A COMPOSITE REPORT ON TURFGRASS

DAVID E. WEDGE
IFAS Ft. Lauderdale REC
Fort Lauderdale, FL 33314

Turfgrasses are plants that have undergone natural selection for thousands of years. Animal grazing provided a primary selective process and the need for high light environments further encouraged variation of species. Through further selection by man, turfgrasses have undergone a high degree of directional selection to enhance aesthetic qualities. Turfgrasses are used primarily as highly adapted ground covers for lawn, road and utility rights-of-way, recreational fields, public parks, and extravagantly maintained sports turfs. The physiological stresses placed on grass plants in these varying functional environments influence the final selection of species and their associated cultivars.

Lawn turfs serve not only a decorative function, but also provide atmospheric cooling through transpiration and also convert radiant energy to chemical energy in photosynthesis.

A thick carpet of turf around a home or office building can provide a variety of environmental benefits. Utility turfs exist primarily for soil stabilization along roadsides, airport runways, ski slopes, golf course roughs, and other minimum-use areas. Recent research by Dr. Philip Busey showed that in south Florida, utility turfs can function quite nicely as temporary parking lots while still allowing active infiltration of rainwater, evaporative cooling, and flexibility for future use. Dr. A. E. Dudeck demonstrated that on both clay and sand soils St. Augustine grass had faster establishment rates for 4-inch plugs versus 2-inch plugs. It is clear that turfgrasses must provide acceptable visual appearance, be functional, and have permanence in the landscape. The testing of turfgrasses can help the consumer in the same way as does the evaluation of other products. Knowledgeable prediction of turfgrass performance characteristics, specific needs, and resources required is essential. Turfgrass testing is an ongoing process which can provide useful knowledge for previously released varieties as they are exposed to new environments.

Constitution

Article I—NAME—This organization shall be known as the Florida State Horticultural Society.

Article II—OBJECTIVE—The objective of this Society shall be the advancement and development of horticulture in Florida.

Article III—YEAR—The years shall begin January 1 and close December 31.

Article IV—CLASSIFICATION OF MEMBERSHIP—There shall be four classifications of membership, all of which carry voting privileges:

- A—Annual
- B—Patron
- C—Student
- D—Honorary

Nothing in this article shall be construed as operating against or canceling the privileges of Life Members accepted as Life Members prior to the adoption of this constitution.

Article V—ELIGIBILITY FOR MEMBERSHIP—Any individual, firm or partnership interested in the development and advancement of horticulture in Florida shall be eligible for membership.

Article VI—DUES—Dues shall be paid annually according to classification at rate as prescribed in By-laws.

Article VII—ANNUAL MEETING—The Society shall hold an annual meeting each year in accordance with the By-laws unless prevented from doing so by causes beyond its control.

Article VIII—SECTIONS—The Society shall be divided into sections representing various horticultural interests as provided in the By-laws.

Article IX—OFFICERS—The officers shall consist of a President, a Vice-President from each section, a Secretary, an Editor, a Program Coordinator, and a Treasurer, which officers shall be elected by a majority vote of the membership present at the annual meeting and shall assume their respective offices as designated by the majority of the Executive Committee. The Editor, Program Coordinator, Secretary and Treasurer shall each be elected for a five year term, and no member shall serve in these offices more than two such terms. To provide continuity, the Executive Committee shall, insofar as practical, arrange that no more than two of these offices terminate at the same time.

Article X—SUCCESSION—In the absence of the President or his inability to serve temporarily the Vice President of the Citrus Section shall serve instead. If the position of President is vacated, the Executive Committee shall designate his successor.

Article XI—EXECUTIVE COMMITTEE—The Executive Committee shall consist of not more than 15 persons including the immediate Past President and all Officers above named, the others to be selected at same time and in same manner as prescribed in Article IX. The immediate Past President shall be chairman of the Executive Committee. The Executive Committee shall have authority to act for the Society between annual meetings.

Article XII—MEETINGS OF THE EXECUTIVE COMMITTEE—The Executive Committee shall meet upon call of the Chairman at such time and place as may be approved by a majority of the Committee. A majority of the Committee shall constitute a quorum. The Committee may be canvassed by mail and vote by ballot in like manner.

Article XIII—COMMITTEES—The Chairman of the Executive Committee shall, with the approval of the Executive Committee, appoint all standing or special committees as provided in the By-laws.

Article XIV—DUTIES OF OFFICERS—The *President* shall be the official head of the Society and preside at the general session of the annual meeting. He shall be directly responsible to the Executive Committee and may be removed from office for cause by an affirmative vote of a majority of the full Executive Committee.

The *Vice Presidents* shall be members of the Executive Committee. The Vice President of the Citrus Section shall assume the duties of the President in the temporary absence of the President. The Vice Presidents of the various sections shall preside over the particular sections of which they are representatives at the annual meeting.

The *Secretary* shall record all records of all meetings of the Executive Committee and shall be responsible except as may otherwise be designated in the By-laws for recording and keeping proceedings of the annual meeting. He shall likewise issue and mail out statements of dues to the membership, notices of meetings and perform such other duties as ordinarily accrue to that position.

The *Editor*, and the *Program Coordinator* shall perform such duties as may be prescribed and authorized by the Executive Committee.

The *Treasurer* shall be responsible for all funds paid into the Society and shall issue and countersign all vouchers paying bills or accounts against the Society. The Treasurer shall be placed under bond in an amount determined by the Executive Committee, premium on which shall be paid by the Society.

Article XV—AMENDMENTS—This Constitution may be amended at any annual meeting upon the recommendation of a majority of the Executive Committee when approved by a majority vote of the membership present.

Article XVI—EFFECTIVE DATE—This Constitution shall become effective immediately upon approval by a majority vote of the membership at the annual meeting in October 1951.

This Constitution was revised at the annual meeting in November 1963, in November 1967, November 1973, November 1986, November 1988.

1. The Society's year shall begin January 1 and end December 31.
2. Dues—dues shall be paid annually for the current year and shall be payable to the Treasurer of the Society. Dues shall be as follows:

Annual Membership	\$ 25.00
Patron Membership	\$100.00
Annual Membership (student)	\$ 5.00
3. Annual Meetings—the Society shall hold an annual meeting in the fall of each year at a place and time selected by a majority vote of the Executive Committee. The order of business at the annual meeting shall be determined in advance each year by the Executive Committee.
4. The meetings of the Society shall be devoted only to horticultural topics, from scientific and practical standpoints, and the presiding officer shall rule out of order all motions, resolutions and discussions tending to commit the Society to partisan politics or mercantile ventures.
5. SECTIONS—The Society shall consist of the following sections:
 - Citrus Section
 - Vegetable Section
 - Krome Memorial Institute
 - (Tropical and Deciduous Fruits)
 - Ornamental Section
 - Handling and Processing Section
 - Garden and Landscape Section

Other sections may be added on recommendation of a majority of the Executive Committee when approved by a majority vote of the membership present at an annual meeting.

By-Laws

COMMITTEES

Nominating Committee—The President shall appoint a Nominating Committee consisting of not less than 2 persons from each section, 1 of whom shall be the most recent past Sectional Vice-President able to serve. This committee shall, at each Annual Meeting, make nominations for officers and other members of the Executive Committee for the ensuing year, provided the members representing various Sections shall seek advice of each Section in open meetings concerning the nomination of Vice-President for that Section. Such nominations by the committee, however, shall

not preclude nominations from the floor. The President shall designate a member of this committee as Chairman.

Membership Coordinating Committee—The Chairman of the Executive Committee shall appoint a Membership Coordinating Committee that shall consist of a Chairman, the Chairman of the Student Affairs Committee and one other member.

Within each section, the Sectional Vice-President shall appoint a Sectional Membership Committee and designate a chairman thereof. The chairmen of the Sectional Membership Committees shall work closely

with the Membership Coordinating Committee to develop plans for soliciting new members throughout the year and assuring that the needs of the membership are being met by the services and activities of the Society.

The Chairman of the Membership Coordinating Committee shall meet with the Executive Committee when requested by the Chairman, and shall make recommendations to the Executive Committee on membership enlargement, participation and related activities.

Program Committee—The Vice Presidents of the various sections shall constitute a program committee of which the President shall be the Chairman, the Program Coordinator, the Vice Chairman, and the Secretary and Treasurer shall be ex officio members.

Student Affairs Committee—The Chairman of the Executive Committee shall appoint a Student Affairs Committee comprised of 1 member each from the faculties of all educational institutions in the State of Florida offering a 4 year horticultural program leading to a Bachelor's degree, 2 members representing different industries, and 2 student members from different institutions. Membership of this committee shall be initially appointed for 1 to 3 year terms and designated on a rotating basis so after the third year all members will be appointed for a 3 year term with no more than one third of the members renewed any given year. The Chairman of this committee will be the Student Affairs Coordinator, and he shall report to the Executive Committee when invited by the Chairman. This committee shall coordinate all affairs of the Society related to student activities, including distribution of patron funds for support of student attendance at meetings, recognition of students at meetings, reports of students and other student-related activities.

Editorial Committee—The Chairman of the Executive Committee shall appoint an Editorial Committee consisting of one Associate Editor from each of five Sections, and the Editor who will serve as Associate Editor for the sixth Section. This Committee shall meet with the Editor as called, and assist him in the editing and preparation of manuscripts for publication in the Proceedings as needed. Names of nominees for Associate Editor positions shall be presented to the Executive Committee along with brief resumes of their background and qualifications. Associate Editors shall then be appointed by the Chairman with the approval of the Editor and the Executive Committee. Such appointments shall be for a 3-year term with option for renewal.

Auditing Committee—The President with the approval of the Executive Committee shall appoint an auditing committee which committee shall confer with the Treasurer in preparing an audit to be presented by the Treasurer at the annual meeting. The President shall appoint such other committees as may be deemed advisable and approved by the Executive Committee.

Awards Committee—There shall be separate committees on awards, as follows:

(1) **Presidential Gold Medal Award Committee**—The Presidential Gold Medal Award Committee shall consist of the Chairman of the Executive Committee, who shall act as Chairman, and three or more other members of the Society appointed by the President.

The Presidential Gold Medal shall be awarded to one individual who has contributed most to Florida horticulture through work published in the *Proceedings* over the preceding time period since the given section was last eligible. The award will rotate each year from section to section with the Citrus Section eligible in 1975 followed in order by the Krome Memorial, Garden and Landscape, Vegetable, Ornamental, Handling and Processing Sections.

The award will consist of a gold medal suitably inscribed, a printed certificate, an honorarium of \$500.00, and hotel expenses for the recipient and spouse while at the annual meeting.

(2) **Best Paper Award Committees**—The Best Paper Award Committees shall be appointed by the President annually from each of the Society's sections. Each Committee will consist of three members who a) most recently have served as vice-president of the respective sections, but b) who were not authors of papers in that volume of the *Proceedings* from which the selection is being made, and c) who remain members of the Society. If less than three members qualify for appointment in any section, the President may appoint members lacking qualification "a)" above. Membership of these committees will not be announced.

Each sectional Best Paper Committee will select the best and most meritorious paper as printed in the previous year's *Proceedings* for its respective section.

This award shall consist of a medal and printed certificate suitably inscribed, and an honorarium of \$200.00.

(3) **President's Industry Award Committee**—The selection of the paper qualifying for the President's Industry Award will be made by a committee consisting of a least one member from each section of the Society, appointed by the President. The award will be presented to the author of the single best paper given at the Florida State Horticultural Society's annual meeting by an industry author. An industry author is defined as anyone other than a staff member of an academic institution or a government agency. In those instances where there are both senior and junior author or authors, all must meet the qualifications of industry authors. The senior author of the paper must be a member of the Society. Any paper which receives recognition as the best paper in a Section will also be eligible for the President's Industry Award if other qualifications are met. The award shall consist of a plaque suitably inscribed and presented at the President's discretion.

(4) **Council Memorial Tomato Research Award**—This award shall be presented based upon \$2,500, donated to the Society by Mrs. Emmett H. Council, Council Farms, Ruskin, Florida. The award shall be continued until the fund and earnings from investments are exhausted. The Award Committee shall consist of the Chairman of the Executive Committee, and four other members of the Society appointed at large by the President whose names will not be announced. The award shall be given to the individual or group who have done work with the most potential to further the fresh market tomato industry in Florida through advances reported in any single publication in any scientific or technical form. Such publication must have been published during the two previous calendar years. The senior author of the publication upon which the award is based must be an active member of FSHS. At the discretion of the Chairman, the award may not be presented in any given year when there does not appear to be suitable nominees.

The award shall consist of a certificate suitably inscribed and \$200.00 honorarium.

DEPOSITORY

The Executive Committee shall have authority to select a depository or establish a trusteeship for funds of the Society as it may deem in the best interest of the Society.

"All uncommitted funds shall be invested by the Treasurer in Federally-insured investments approved by the Executive Committee. For prudent operation and financial security of the Society, funds in the amount at least 1.5 times Annual Budget shall be maintained whenever possible, and such Reserve Funds shall not be allowed to exceed 2.5 times Annual Budget. Deviations from these practices may be authorized by a majority vote of the Executive Committee."

APPROVAL OF BILLS

All bills before being paid shall be approved by the President, Secretary or Treasurer, and vouchers drawn to pay such bills shall be signed by the President or in his absence the Vice President of the Citrus Section and countersigned by the Treasurer.

RESOLUTIONS

Resolutions may originate either in the Resolutions Committee or in a regularly scheduled sectional business meeting. In the latter case, the resolutions must be supported by a majority vote of those members present and voting. All resolutions will be evaluated by the Resolutions Committee and transmitted with its recommendation to the Chairman of the Executive Committee. He will place them before the full Executive Committee by either (a) calling a special meeting of the Executive Committee or (b) instructing the Secretary to poll the members of the Executive Committee. Those resolutions approved by at least eight members of the Executive Committee will be presented by the Chairman of the Resolutions Committee to the membership at the annual business meeting for action by the Society as a whole.

HONORARY MEMBERS

Any individual who has rendered especially meritorious service to the Society and to the advancement of horticulture in Florida may be designated by a two-thirds vote of the full Executive Committee of the Society as an Honorary Member of the Society. Such honorary members shall not be required to pay dues.

EXECUTIVE COMMITTEE MEMBERS-AT-LARGE

For service in 1987 one of the Members-at-Large of the Executive Committee shall be elected for a two-year term and one for a one-year term.

For service in 1988 and thereafter, one Executive Committee Member shall be elected each year for a two-year term.

REPORT OF EXECUTIVE COMMITTEE, 1990

MOTIONS PASSED AND IMPORTANT DISCUSSIONS OF THE FIRST EXECUTIVE COMMITTEE MEETING, LAKE ALFRED, FLORIDA JANUARY 18, 1990

The first meeting of the 1990 Executive Committee (EC) of the Florida State Horticultural Society was held on January 18, 1990 at the Citrus Research and Education Center in Lake Alfred. Chairman William H. Krome presided. Guidelines for selection of the best student paper were presented by Gary Wilfret. Discussion followed regarding importance of scientific merit of papers in the selection process. It was agreed that the guidelines be refined and brought for consideration before the next EC meeting. Editorial Committee report was presented by Norman Childers. The committee is dealing with excessively lengthy papers and with authors who have not submitted manuscripts for publication. The 1989 Proceedings will be published by May 1. The color cover will be provided by David Buchanan of the Ft. Lauderdale Research Education Center, on behalf of the Ornamental Section.

Publication of an "Abstract Booklet" for the annual meeting was discussed. Gary Wilfret estimated that it would cost \$4.40 each to print. Use of camera-ready abstract forms for the abstract booklet also was discussed. Final discussion on both issues was deferred to next EC meeting when Gary Wilfret will report on cost and mechanics of publishing the abstract booklet.

The 1990 meeting will be held December 17, 1990 at the Grosvenor Resort, Lake Buena Vista (Orlando) due to conflict with the American Society for Horticultural Science meeting in November. July 1 was established as the deadline for the abstracts. The Newsletter will be issued three times in 1990. Motion by Norman Childers that the concept of establishing an Endowment Fund was approved. A committee on Horticultural and Environmental matters will be appointed by Mr. W. H. Krome to provide assistance to the legislators and government.

Guidelines for papers intended for publication in the FSHS Proceedings were discussed. Gary Wilfret will have the guidelines ready for discussion at the next EC meeting. President Tom Sheehan moved that the salary of the Society clerk, Mrs. Wanda Leonard, be increased from \$12,000 to \$12,600 annually.

Next EC meeting will be held in Lake Alfred at 10:00 AM, May 9, 1990.

MOTIONS PASSED AND IMPORTANT DISCUSSION OF THE SECOND EXECUTIVE COMMITTEE MEETING, LAKE ALFRED, FL MAY 9, 1990

The second meeting of the Executive Committee was chaired by W. H. Krome at the Lake Alfred Citrus Research and Education Center on May 9, 1990. Paid membership was reported at 1575. A revised publication policy and instructions to authors documents were presented by the editor, Norman Childers. Guidelines for paper publication policy for the Society were discussed and were referred to the editorial committee for resolution.

New and more thorough guidelines for selection of Best student papers were presented by Gary Wilfret and Don Maynard. The committee approved a motion setting the amount of awards at \$100 for first, \$50 for second, and \$25 for third place winners.

A motion by Don Maynard that an Abstract Booklet be printed and distributed to all registered members attending the 1990 annual meeting on a trial basis was approved.

Report of the Ad Hoc Committee on financial status of the Society was presented and distributed by Will Waters, Committee Chairman. No action was taken.

Al Will was appointed chairman of the Commercial Exhibits and R. R. Reed Chairman of the Site Selection Committee for 1992. Richard Henley was appointed as Local Arrangement Coordinator for the 1990 Annual Meeting and \$1500 was allocated to the committee.

Purchase of Software for indexing the Proceedings and the 10-Year index was approved.

Preregistration fees for the 1990 meeting were set at \$35 for members, \$15 for students, and \$15 for spouses. Cut-off date for preregistration is December 1, 1990. Registration fees at the meetings will be \$45 for members and \$20 for spouses.

Chairman Krome appointed David Hall to chair a committee to consider changes in the By-Laws governing the Membership Committee.

The next Executive Committee meeting will be held October 11, 1990 at Lake Buena Vista.

MOTIONS PASSED AND IMPORTANT DISCUSSIONS OF THE FIRST EXECUTIVE COMMITTEE MEETING, LAKE ALFRED, FLORIDA OCTOBER 11, 1990

The third meeting of the Executive Committee of the Florida State Horticultural Society was held at 11:00 am Thursday, October 11, 1990 at the Grosvenor Resort, Lake Buena Vista, Florida. Membership in the Society was reported at 1651.

The Executive Committee voted unanimously to establish an Endowment Fund and the Society will accept non-taxable gifts.

The Editorial Committee along with the two Members-at-Large, Robert Berry and Donald Maynard, were instructed to examine the Editorial Policy of the Society.

The Executive Committee approved and referred to the general membership a proposed change to the By-Laws which reads as follows:

Membership Coordinating Committee.The chairman of the Executive Committee shall appoint a Membership Coordinating Committee that shall consist of a Chairman, the Chairman of the Student Affairs committee and one other member.

Within each section, the Sectional Vice-President shall appoint a Sectional Membership Committee and designate a chairman thereof. The chairmen of the Sectional Membership Committees shall work closely with the Membership Coordinating Committee to develop plans for soliciting new members throughout the year and assuring that the needs of the membership are being met by the services and activities of the Society.

The Chairman of the Membership Coordinating Committee shall meet with the Executive committee when requested by the Chairman, and shall make recommendations to the Executive Committee on membership enlargement, participation and related activities.

The proposed change was developed by David Hall, Bob Berry, Bill Wiltbank, and Mohamed Ismail.

Proposal by Bill Wiltbank to recognize Patron Members for their contribution to the Society was approved.

The Hyatt Regency Westshore at Tampa International was approved by the Executive Committee as the Society's meeting site for 1992.

Society members will be polled at the 1990 meeting on whether to hold an annual banquet at the 1991 meeting scheduled at the Doral Hotel in Miami Beach.

MOTIONS PASSED AND IMPORTANT DISCUSSION OF THE FOURTH EXECUTIVE COMMITTEE MEETING DECEMBER 17, 1990

The fourth meeting of the Executive Committee of the Florida State Horticultural Society was held at 3:05 p.m., Monday December 17, 1990 at the Grosvenor Resort Hotel, Lake Buena Vista, Florida.

A motion was approved authorizing the Secretary not to record the names of the honorary member candidates whose membership has not received the necessary 2/3 vote of the Executive Committee.

Final preparations for the 102rd Annual Meeting was discussed by Ismail, Wilfret, Henley and Reed. A copy of the new Abstract Book was circulated and Gary Wilfred was congratulated for a good job.

Al Will reported that 15 commercial booths were sold generating gross income of \$4500. Free booths were allotted to the University of Florida and Florida Southern College.

A motion to increase the rental fee for booths was set for \$400 and it will include 2 registrations to the meetings.

The Society has 47 Patron Members who sponsor 13 Florida Southern College and 5 University of Florida students. A motion was approved to increase the stipend for students at the Annual Meeting from \$100 to \$125.

The color cover of Volume 103 of the Proceedings will be sponsored by the Krome Memorial Institute, IFAS Tropical Research and Education Center and J. R. Brooks & Son, Inc.

The make-up of the Editorial Committee and its conforming to the By-Laws was discussed and a motion was approved to change the By-Laws to allow for the appointment of 6 Associate Editors and an Editor. The matter will be brought to a vote before the 104th Annual Business Meeting.

An annual salary of \$13,860 for the Society's Clerk (Wanda Leonard) was approved for the period of January 1 - December 31, 1991.

Respectfully submitted,
Mohamed A. Ismail
Secretary

MINUTES OF THE BUSINESS MEETING OF THE FLORIDA STATE HORTICULTURAL SOCIETY AT THE GROSVENOR RESORT DECEMBER 19, 1990

Meeting was called to order by Chairman Sheehan at 4:30 p.m. A moment of silence was observed for deceased members of the Society.

Mohamed Ismail reviewed minutes of the Executive Committee meetings as published in Volume 102 and reports of the 1990 Executive Committee meetings. Bill Wiltbank moved that the reports be accepted as published and reported. Motion was seconded and passed.

R. R. Reed gave the treasurer's report and moved that the report be accepted. Motion was seconded and passed.

Norman Childers reported on the Proceedings for 1989. He also asked that the authors get their papers in as soon as possible. He reported that Volume 102 was published May 30, 1990. He asked that authors cooperate with the vice presidents in getting their papers in and reminded everyone that these men, and the associate editors, had other jobs and that the work they did for the Society was done in their spare time and they were to be commended for the fine work they did.

Editor Childers also reported that an endowment fund had been established and invited anyone who was interested to contribute.

Mohamed Ismail reported that a change in the By-Laws had been published in the Newsletter. He explained why this change in the formation of the membership committee was needed. He stated that a committee of David Hall, Bill Wiltbank, Mohamed Ismail and Bob Berry had been appointed and read the proposed change. Chairman Sheehan asked for a motion. Norman Childers motioned that the change be approved. Motion was seconded and passed.

Gary Wilfret reported on the graduate student papers. Third place winner was Trini Reyes (\$25.00), second place winner was Wilfredo Colon (\$50.00) and first place winner was D. I. Leskovar (\$100.00).

Bill Krome, Mohamed Ismail, R. R. Reed, Norman Childers and the associate editors, Gary Wilfred, Sal Locascio, the six vice presidents, Wanda Leonard, Dick Henley and all other members of the Executive Committee were cited for the good jobs they had done by Chairman Sheehan.

Heinz Wutscher reported that Nomination Committee offered the following candidates for election to the Society's executive committee:

Chairman—Dr. Tom Sheehan
President—Dr. Larry Jackson
Treasurer—R. R. Reed
Secretary—Mohamed Ismail
Program Coordinator—Gary Wilfret
Editor—Norman Childers
Members-at-Large—Wayne Sherman and Don Maynard
Vice Presidents:
Citrus Section—Linda Russo
Garden and Landscape Section—Ed Gilman
Handling and Processing Section—Roy McDonald
Krome Memorial Institute—Jonathan Crane
Ornamental Section—Michael Kane
Vegetable Section—Joan Dusky

Dick Henley moved that the nominations be closed and that the officers selected by the nominating committee be elected. Motion passed unamiable.

Bill Castle suggested that Frank Bouis' remarks be published before the Proceedings are printed, perhaps in the Newsletter. Chairman Sheehan stated that this was under consideration and that they hoped it could be done.

Dick Henley read the rules for the prize drawings and conducted drawings for door prizes. Third prize was won by A. E. Hendry, second by Sal Locascio and first by J. O. Whiteside.

Meeting was adjourned at 5:30 p.m.

Respectfully submitted,
Mohamed Ismail
Secretary

reclaimed waste effects on citrus (Zekri, Koo)		318	Fertilization, nitrogen leaching and growth of young 'Hamlin' orange trees on two rootstocks	30
rootstock influence on flood tolerance of 'Tahiti' lime (Schaffer, Moon)		280	WINSBERG, TED	
waste, grapefruit oil recovery (Ericson, et al.)			See SIMONS	120
WATERMELONS			WOLTZ, S. S.	
cultivar evaluations during storage (Risse, Maynard)		288	See JONES	142
honey bee attraction with bee attractant (Elmstrom, Maynard)		255	YEAGER, THOMAS H.	
transplant age influence on production (Vavrina, Armbruster, Cole)		94	See GILMAN	370
WATERS, W. E.			YELENOSKY, G. and C. J. HEARN	
See HOWE			Reevaluation of heater protection for citrus plantings	67
WEBB, SUSAN E. and JOHN A. MORTENSEN			YIELDS	
Evaluation of bunch grape rootstocks and muscadine varieties for resistance to grape root borer			citrus, tree spacing effects (Whitney, et al.)	50
WEED CONTROL			potatoes, influenced by gelled fertilizer (Locascio, Hensel)	108
cucumber tolerance to herbicides (Stall, Hochmuth)			squash and tomatoes, mulch effects on sweet potato whitefly populations (Powell, Stoffella)	117
herbicides, preemergence, multiple applications in young citrus groves (Singh, Tucker, Futch)			YOKOMI, R. K.	
WEEDS			See ROCHA-PENA	82
flower thrips in south Florida (Frantz, Mellinger)			YOUTSEY, CHARLES O.	
pickerelweed growth in compost (McConnell, Kane, Shiralipour)			See ROUSE	64
WHEATON, T. A., W. S. CASTLE, J. D. WHITNEY, D. P. H. TUCKER and R. P. MURARO			ZEKRI, MONGI and ROBERT C.J. KOO	
A high density citrus planting			Effects of reclaimed wastewater on leaf and soil mineral composition and fruit quality of citrus	38
See TUCKER			ZITKO, S. E.	
See WHITNEY			Outstanding paper award	VII
WHITE, D. RICHARD, JR.			ZOELLNER, JUDITH J.	
Routine citrus juice analyses using HPLC with amperometric detection			See SARGENT	222
WHITEFLY				
sweet potato, mulch effects on populations on squash and tomatoes (Powell, Stoffella)				
WHITESIDE, J. O.				
Prospects for improved control of citrus scab with fungicide spray treatments
