**PHOTO 108.** A 200 meter deep overwash fan south of Cancun, Mexico resulting from Hurricane Gilbert in September, 1988. The overwash fan probably is located at this point due to a natural break in vegetation on this portion of undeveloped shoreline. (Photo: David M. Bush, E. Robert Thieler, and Orrin H. Pilkey, Program for the Study of Developed Shorelines, Department of Geology, Duke University, Durham, NC 27708).
