
COASTAL PHOTOGRAPH BY FRED E. CAMFIELD

PHOTO 161. *Coastal wetlands, Duck, North Carolina.* Coastal wetlands on the landward side of the barrier islands are threatened by rapid development of the islands. As a matter of interest, this photo was taken from the end of a shopping arcade that was constructed over the wetlands. (May 1990; Fred E. Camfield, Coastal Engineering Research Center, 3909 Halls Ferry Road, Vicksburg, MS 39180-6199).
