- International Post-Graduate Training Courses on Fundamental and Applied Quaternary Geology (IFAQ) [Brussels, Belgium]

- The Coastal Society (TCS) [Bethesda, Maryland, USA]

Aims and Scope of the Journal

Journal of Coastal Research, an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own purview, the cross-disciplinary nature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary control issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

Subscription Information

Editorial Office: Dr. Charles W. Finkl, Jr., Editor-in-Chief, Post Office Box 2473, Fort Lauderdale, Florida 33303, USA. Telephone: (305) 523-6768.

Published Quarterly (ISSN 0749-0208) Annual Subscription Rate (1985) $US50.00 (Personal) and $US60 (Institutional). Subscribers outside of North America please add $US16 for air mail postage and handling.
As part of our international intention to provide access to the *Journal of Coastal Research* (JCR) in as many widely scattered regions as practical, a number of national libraries have been selected as repositories for JCR. It is hoped that our efforts to supply these select libraries with gratis copies of each journal issue will help establish and broaden our international forum for coastal researchers. In this way we may encourage collaboration on a global scale and specialists near major research centers as well as those in more remote regions may become more quickly aware of other progress in coastal studies.
