## Aims and Scope of the Journal

Journal of Coastal Research, an International Forum for the Littoral Sciences, is dedicated to all aspects of coastal research. These include geology, biology, geomorphology (physical geography), climate, littoral oceanography, hydrography, coastal hydraulics, environmental (resource) management, engineering, and remote sensing. Although each field functions effectively within its own purview, the cross-disciplinary nature of coastal studies requires familiarity with other fields as well. Hence, the scope of topics is necessarily broad in order to address the complexity of coastal biophysical and socio-economic interactions. Because of the wide range of interrelated topics, the journal invites original contributions and manuscripts dealing with theory, methodology, techniques, and field or applied topic studies on interdisciplinary coastal issues.

The journal encourages the dissemination of knowledge and understanding of the coastal zone by promoting cooperation and communication between specialists in different disciplines. Natural scientists, for example, are encouraged to collaborate with professionals in other fields to prepare contributions relating to the coastal zone that foster increased appreciation of coastal environments and processes. By means of this journal, with its scholarly and professional papers, systematic review articles, book and symposia reviews, communications and news, and special topical issues, an international forum for the development of integrated coastal research is provided.

## SUBSCRIPTION INFORMATION

The **JOURNAL OF COASTAL RESEARCH** (JCR), official publication of the Coastal Education & Research Foundation (a non-profit corporation), acts as a basic world publication for coastal research. The journal publishes original contributions that deal with theory, methodology, techniques, and field or applied studies on inter-disciplinary topics. All aspects of coastal research are considered in the fields of **biology, geology, oceanography, environmental (resource) management, engineering, and planning**, among others. JCR is surveyed in: *Aquatic Sciences and Fisheries Abstracts; Current Awareness in Biological Sciences; Civil Engineering Hydraulics Abstracts; Current Contents/ Agriculture, Biology and Environmental Sciences; Ecology Abstracts; FLUIDEX (British Hydromechanics Research Association); GeoAbstracts; USSR Institute of Scientific Information; FAO Marine Science Contents Tables; Oceanic Abstracts; Oceanographic Literature Review; Physics Abstracts, and Pollution Abstracts.*

**Published quarterly in about 1200 volume pages. Special issues available separately.**  
ISSN No. 0749-0208.
