The Seventh Symposium on Coastal and Ocean Management

Hyatt Regency • Long Beach, CA • July 8-12, 1991

Sponsored by the U.S. National Oceanic and Atmospheric Administration, the American Society of Civil Engineers, and over 40 other government agencies and private organizations.

Coastal Zone 91 will be a multi-disciplinary conference for professionals, decision-makers, and interested citizens to exchange information and views. Conference goals are to: present the latest state of the art in coastal and ocean technologies, provide a forum for discussion and resolution of divergent point of view on coastal and ocean policies, and emphasize the need for greater public understanding and involvement in ocean and freshwater issues.

Additional information and conference brochures are available from:

Delores Clark, Vice Chair, CZ 91

THE COASTAL EDUCATION AND RESEARCH FOUNDATION

4310 NE 25th Avenue
Fort Lauderdale, FL 33308, USA

Officers of the Foundation

Founded in 1983 by: Charles W. Finkl, Sr.,
Charles W. Finkl, Jr., Rhodes W. Fairbridge,
and Maurice L. Schwartz.

President & Executive Director:

Charles W. Finkl, Jr.

Vice President:

Rhodes W. Fairbridge

Secretary-Treasurer:

Charles J. Miller

Board of Directors

Per Bruun	Roy R. Lemon
Donald R. Coates	Robert E. Murdoch
Robert Dolan	Maurice L. Schwartz
Rhodes W. Fairbridge	Andrew D. Short
Robert Huff	Ian Watson
Larry Klingler	

The Coastal Education and Research Foundation (*CERF*) is a nonprofit corporation dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of *CERF* is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages field and laboratory studies on a local, national, and international basis. Through the medium of scientific publications, television, and radio *CERF* brings accurate information to the public and coastal specialists on all aspects of coastal issues in an effort to maintain or improve the quality of shoreline resources.

Because *CERF* is concerned with broad environmental

issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. *CERF* thus aims to stimulate awareness of coastal (marine and freshwater shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

CERF is associated with the Department of Geology at Florida Atlantic University in Boca Raton, Florida 33431. This association provides a basis for cooperative investigation of biophysical resources found in open and naturally protected coastal regions, estuaries, large inland bodies of water bounded by shorelines, wetlands, and other coastal environments. Joint investigative efforts by faculty, students, and staff span a wide and diversified range of interrelated topics that are relevant to solutions of today's dynamic problems. It is hoped that these combined attempts to better understand the nature of coastal processes will help forestall what may become contentious issues of tomorrow.

CERF MEMBERSHIP

Members are individuals, institutions, and corporations that support the aims of the Foundation through personal and group efforts or by donations. Memberships are available in different categories with privileges.

Publications of the Foundation:

CERF Quarterly Journal:

Journal of Coastal Research (JCR): An International Forum for the Littoral Sciences (ISSN 0749-0208).
