COASTAL PHOTOGRAPH BY PRAMOD T. HANAMGOND

Looking west at the southern end of the Belekeri Bay Beach (Harwada), West Coast of India. Note the accumulation of quite large amount of vegetation debris which was brought in from the adjoining Western Ghats through the rivers and inlets. This is seen this year because of high rainfall. The local people are collecting this debris for cooking as a fuel. The arrowmark shows the Belekeri River. Photograph taken on 24th August 1991 between 1400–1405 Hours, Tide at 1057 hour 1.72m and at 1646 hour 0.74 m, Latitude 14°42'30" to 14°44'N and Longitude 74°15' to 74°16' E. (Pramod, T. Hanamgond, Dept. of Geology, Karnatak University, Dharwar 580 003, India.)
