CERF Watch

The Coastal Education & Research Foundation [CERF] and the Journal of Coastal Research (JCR) Jointly Launch a New Website

http://www.CERF-JCR.com

Don’t be a serf, surf the Net with CERF! Our new multipurpose website primarily serves CERF members and JCR subscribers but additionally provides JCR editors with editorial services. The website is designed for modern large-monitor screens and advanced platforms such as Windows 95, 98, and NT. The CERF-JCR site features many services and interactive windows which we hope will encourage electronic access to many of the routine procedures that are required to run an international journal. Contributors and authors are, for example, encouraged to track the status of their manuscripts from the initial letter acknowledging receipt of the paper through the peer review process to final publication. The database, which can be accessed by author name or manuscript number, reports each stage of manuscript processing making this information instantly available to interested authors.

On the CERF-JCR website you can:

- Contact the Editor-in-Chief (EIC), Associate Editor (AE), or any other JCR editor
- Become a member of CERF
- Subscribe to the Journal of Coastal Research (JCR)
- Order CERF publications - CERF Books, JCR Regular Issues, JCR Special Issues
- Track the status of your own manuscript, from receipt to publication
- Download JCR's Instructions to Authors
- Search JCR abstracts and titles by key words
- Download International Coastal Symposium (ICS98) contents and papers, Volume 2 (only)
- Look up forthcoming journal contents
- Order copies of JCR papers via UnCover
- Discuss JCR paper contents in the CERF Forum, a chat room for authors and researchers
- Find coastal meetings in the JCR

Other attributes of the CERF-JCR website include sound bits, animation, coastal feature of the quarter, editorial update forms, and much more. Save time, save postage, save FAX costs, obtain information electronically - communicate with us at:

✉️ http://www.CERF-JCR.com
The Coastal Education and Research Foundation (CERF) is a nonprofit corporation dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of CERF is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages faculty, students, and staff at various institutions span a wide and diversified range of interrelated topics that are relevant to solutions of today's dynamic problems. It is hoped that these combined attempts to better understand the nature of coastal processes will help forestall what may become contentious issues of tomorrow.

Because CERF is concerned with broad environmental issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. CERF thus aims to stimulate awareness of coastal (marine and freshwater shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

CERF members provide a basis for cooperative investigation of biophysical resources found in open and naturally protected coastal regions, estuaries, large inland bodies of water bounded by shorelines, wetlands, and other coastal environments. Joint investigative efforts by faculty, students, and staff at various institutions span a wide and diversified range of interrelated topics that are relevant to solutions of today's dynamic problems. It is hoped that these combined attempts to better understand the nature of coastal processes will help forestall what may become contentious issues of tomorrow.

CERF Quarterly Journal:
Journal of Coastal Research (JCR) (ISSN 0749-0208).

JCR Special Issues and Reports:
No. 1 (1986): Late Quaternary Sea-Level Changes and Coastal Evolution (out of print)
No. 3 (1988): Dune/Beach Interaction, Norbert P. Petry (ed.). [$US 45.00]
No. 4 (1988): The Effects of Seawalls on the Beach, N. C. Kraus and O. H. Pilkey (eds.). [$US 45.00]
No. 5 (1989): High Concentration Cohesive Sediment Transport, A. J. Mehta and E. J. Hayter [$US 45.00]
No. 7 (1990): Rational Design of Mound Structures, N. Kobayashi and M. A. Losada (eds.). [$US 45.00]
No. 9 (1990): Proceedings of the Skagen Symposium (September 1990) [out of print]
No. 12 (1994): Coastal Hazards, C. W. Finkl (ed.). [$US 60.00]
No. 16 (1992): International Bibliography of Coastal Geomorphology, D. Sherman (ed.). [$US 45.00]
No. 18 (1993): Coastal Wetland Loss in Louisiana, D. F. Boesch (ed.). [$US 45.00]
No. 23 (1996): Understanding Physical Processes at Inlets, A. J. Mehta (ed.). [$US 45.00]
No. 24 (1998): Island States at Risk, S. P. Leatherman (ed.). [$US 45.00]
No. 27 (1998): Environmental Impacts of Europipe, M. T. Delafontaine et al. (eds.). [In Production]
Journal of Coastal Research

VOL. 14, NO. 4 (pages 1187–1436)  
FALL 1998

CONTENTS

Regular Papers

Historical Development of a Foredune Plain at Desperate Bay, Western Australia  
Peta G. Sanderson, Ian Eliot and Michael Fuller 1187

Trophic Relationship within Intertidal Communities of the Brittany Coasts: a Stable Carbon Isotope Analysis  
Patrick Dauby, Abedelhamid Khomsi and Jean-Marie Bouquegneau 1202

Acoustic Backscatter Measurements of Estuarine Suspended Cohesive Sediment Concentration Profiles  
L. J. Hamilton, Z. Shi, and S. Y. Zhang 1213

Least Squares Filtering to Assess Shoreline Change Signatures  
Todd L. Walton Jr. 1225

Coastal Erosion Along the Todos Santos Bay, Ensenada, Baja California, Mexico: An Overview  
Roman Lizarraga-Arciniega and David W. Fischer 1231

Sedimentology and Evolution of Subarctic Tidal Flats Along a Rapidly Emerging Coast, Eastern Hudson Bay, Canada  
Marie-Hélène Ruz, Michel Allard, Yves Michaud, and Arnaud Héquette 1242

Long-Term Beach Profile Variations Along the South Shore of Rhode Island, U.S.A.  
Elizabeth M. Lacey and John A. Peck 1255

A Fractal Approach to Sea-Surge Occurrences in the Northern Adriatic Sea  
José Borrego, Mercedes Lopez, J. Gabriel Pendon, and Juan A. Morales 1276

The Fortaleza (NE Brazil) Waterfront: Port Versus Coastal Management  
Luis P. Maia, José A. Jiménez, Jordi Serra, Jader O. Morais, and Agustín Sánchez-Arcilla 1284

Optimum Geometry for Naturally Armouring Berm Breakwaters  
S. J. M. Sahayan and Kevin R. Hall 1293

Spatial and Temporal Variation of Marine Bacterioplankton in Florida Bay, U.S.A  
John B. C. Bugden, Maria A. Guerrero, and Ronald D. Jones 1304

Application of an Undertow Model to Irregular Waves on Plane and Barred Beaches  
Daniel T. Cox and Nobuhisa Kobayashi 1314

Runup on Coastal Revetments Under the Influence of Onshore Wind  
Donald L. Ward, Christopher G. Wibner, and Jun Zhang 1325

Sedimentological Impact of Artificial Islands and Pits, Measured with Sediment Traps  
Jens R. Valeur and Morten Pejrup 1334

Effects of Exposed Pilings on Sea Turtle Nesting Activity at Melbourne Beach, Florida  

Acoustic Observations of Fluid Mud and Interfacial Waves, Hangzhou Bay, China  
Z. Shi 1342

The Growth of Wind Waves Estimated Using a New Irrotational Finite Amplitude Water Wave Model  
P. D. Cummings 1354

Mudbanks of the Southwest Coast of India. VI: Suspended Sediment Profiles  
Yigong Li and Trimbak M. Parchure 1363

Evaluation of Shorelines and Legal Boundaries Controlled by Water Levels on Sandy Beaches  
Robert A. Morton and F. Michael Speed 1373

Development of a Basin, Doughnut and Font Assemblage on a Sandstone Coast, Western Eyre Peninsula, South Australia  
C.R. Twidale and E.M. Campbell 1385

Summary of the New England Beach Nourishment Experience (1935–1996)  
Tanya C. Haddad and Orrin H. Pilkey 1395

Flushing Characteristics of a Seasonally-Open Tidal Inlet: A Numerical Study  
Roshanka Ranasinghe and Charitha Pattiaratchi 1405

Technical Communication

Phosphatic Microbial Biofilms Cementing Gravels in a Vadose Environment  
C.J.R. Braithwaite and C.D. Gribble 1422

Vertical Mixing by Internal Wave Breaking at the Lutocline, Jiaolong River Estuary, China  
Jiang Jianhua and Eric Wolanski 1426
