COASTAL PHOTO BY DAN COVELLO

---

Shinnecock Inlet, November 29, 1993. Aerial photographic view to the north of Shinnecock Inlet, Southampton Town, New York. This photograph was taken following a strong northeast coastal storm which impacted this area of the shoreline the day before. Note the turbulence created as the outgoing tide interacts with the powerful, incoming groundswell and the offset between the west and east sides of the inlet. The cranes visible on the jetties are part of jetty reconstruction work being completed by Gates Construction Company. (Photograph by Dan Covello, First Coastal Corporation, Postal Box 1212, 161 Sunset Avenue, Westhampton Beach, New York 11978.)
