Journal of Nematology (ISSN 0022-300X) is published quarterly by The Society of Nematologists. Periodical postage paid at Marceline, MO, and additional Post Offices. **Postmaster:** Send change of address notification to Society of Nematologists, PO Box 311, Marceline, MO 64658. E-mail: son@hughes.net. Inquiries concerning subscriptions, availability of back issues, or membership in The Society should be sent to the same address. For this and other information, visit: <http://www.nematologists.org>

Mention of a pesticide, cultivar, or commercial or proprietary product does not constitute a recommendation or an endorsement of its use by editors, author(s), their institutions, or The Society of Nematologists. Authors are responsible for statements made in the Journal, whether of fact or opinion.

Printed by The Sheridan Press, 450 Fame Ave., Hanover, PA 17331. The Journal is indexed by Reenah Schaffer, Raleigh, NC.

Cover—Observations in three Australian sugarcane fields suggested that the soil just under the trash blanket (the covering of crop residue that remains on the soil surface after crops are harvested) was suppressive to plant-parasitic nematodes. For more information see article on page 135.
