

CHECKLIST OF BROMELIACEAE OF MINAS GERAIS, BRAZIL, WITH NOTES ON TAXONOMY AND ENDEMISM

LEONARDO M. VERSIEUX* AND TÂNIA WENDT

Universidade Federal do Rio de Janeiro, CCS, IB, Departamento de Botânica, Ilha do Fundão,
21941-590, Rio de Janeiro-RJ, Brazil. Email: lversieux@yahoo.com.br

ABSTRACT. Bromeliaceae diversity in Minas Gerais state, Brazil, is discussed, and a checklist is provided of the 27 genera, 265 species, and 18 infraspecific taxa found there. The total number of bromeliad genera in Minas Gerais exceeds that of all other Brazilian states and even of all other South American countries. A total of 98 species (37%) are endemic to the state. The exceptional floristic richness observed is attributed to the environmental conditions found solely in Minas Gerais that allow the evolution of different genera and species. The checklist is based on herbarium specimens, the botanical literature, and field observations. Data are presented for type specimens, habitat, elevation range, habit, geographical distribution throughout Brazil and Minas Gerais, phenology, and synonymy and taxonomic commentaries when pertinent.

Key words: Brazil, Bromeliaceae, checklist, Minas Gerais

INTRODUCTION

Brazil is a mega-diverse country and plays a key role in the conservation and maintenance of earth's genetic diversity. Consequently the importance that the state of Minas Gerais (MG) has for biodiversity preservation is notable, since it occupies ca. 7% of Brazilian territory and shelters a diverse flora among complex vegetation that ranges from xerophytic-dry to evergreen forests (Costa et al. 1998, Mittermeier et al. 2000, IBGE 2004). The Bromeliaceae Juss. family is well represented in Brazil. Although an updated count for the country is lacking, the Atlantic Forest, covering part of eastern Brazil and the eastern and southern portion of MG, is said to be the center of diversity for subfamily Bromelioideae (Smith 1934, 1955; Benzing 2000). Some genera are known to be endemic or characteristic of the Atlantic Forest, such as *Canistrum*, *Nidularium*, and *Wittrockia* (Leme 1997a, 2000); and many species of *Aechmea*, *Billbergia*, and *Vriesea* are abundant in this vegetation. Studies of the flora of MG have been concentrated along the *campo rupestre* (rocky field) vegetation of the Espinhaço mountain range. This range and elevated areas of the Mantiqueira mountain range covered by Atlantic Forest or *campo de altitude* (high altitude grassland) are important habitats for endemic Bromeliaceae (see Giulietti et al. 1987, Martinelli 1989, Wanderley & Forzza 2003).

Extensive mining, agriculture, and urban development have reduced the two major biomes of Minas Gerais, mainly Atlantic Forest and *Cerrado* (savanna), to just 4–25% of their former extents. The status of MG as a biodiversity

hotspot is demonstrated by the large number of bromeliads and members of other plant families described for the state during the past few decades. Although Smith and Downs (1974, 1977, 1979) listed 167 species and 11 infraspecific taxa for MG, additions since their monographs are numerous. For example, 22 new species for subfamily Bromelioideae alone have been added, averaging one per year (Luther & Sieff 1994, 1997; Luther 2001). This report lists all Bromeliaceae recorded for MG, updating records of their distribution, habitat, and phenology. The checklist also identifies groups of taxa that remain poorly known.

METHODS

Study Area

Minas Gerais state, located in the southeast region of Brazil, has boundaries with seven other states (Bahia, Espírito Santo, Goiás, Distrito Federal, Rio de Janeiro, São Paulo, and Mato Grosso do Sul). MG, with an area of 586,528 km², is partitioned into 853 municipalities (IBGE 2004; FIGURE 1). Lying completely within the intertropical convergence zone, MG is characterized by a pronounced hilly relief with a topographical variation ranging 79–2890 m. The state has two ranges that serve as major habitat for endemic flora and fauna: the Espinhaço and the Mantiqueira mountain ranges (Costa et al. 1998).

The different geomorphological conditions associated with soil and climate varieties contribute to the existence of several distinct vegetation types. Three biomes are highlighted: the Atlantic Forest that occupies east, southeast, and south portions of MG; savanna that covers the central-west and northwest portions; and low drought-

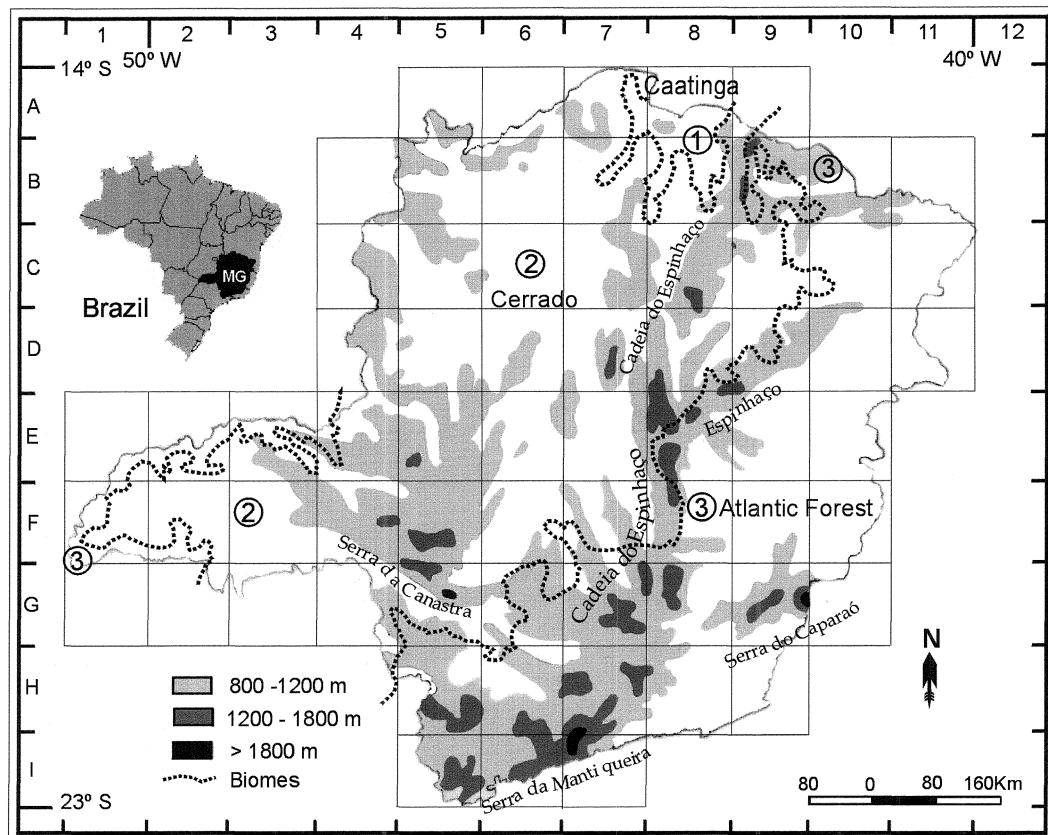

FIGURE 1. Map of Minas Gerais state showing the limits of the biomes, elevations, and main mountain ranges.

deciduous forest (*caatinga*) in the extreme north of the state (Costa et al. 1998).

Included in parts of these biomes are other vegetation types that occur only in restricted conditions, such as the rocky fields (*campos rupestres*) that lie at 800–2000 m. Found mainly along the Espinhaço range, they are characterized by shallow and sandy soils, and by a high degree of plant endemism (Giulietti et al. 1987, Pirani et al. 1994). Also relevant are the high altitude grasslands (*campos de altitude*) that occur above 1100 m in parts of the Mantiqueira range. This open habitat is characterized by thin soils and vegetation adapted to high humidity, wind, solar exposure, and low temperatures (<12°C) during winter (Martinelli 1989, Safford 1999).

Data Collection

Prominent treatments of the entire bromeliad family served as primary sources for this checklist (Mez 1894; Smith 1955; Smith & Downs

1974, 1977, 1979; Luther & Sieff 1994, 1997; Luther 2001). Sources also included more recent publications specific to Minas Gerais (Wanderley & Martinelli 1987; Forzza & Wanderley 1998; Leme 1996, 1997a, 1997c, 1998, 1999, 2000; Wendt 1997; Paula 1998; Wanderley & Forzza 2003; Forzza 2005).

Collections at 14 herbaria collections were examined (BHCB, BHZB, CESJ, HB, HBR, MBM, R, RB, RFA, SEL, SP, SPF, US, and VIC). Acronyms for these herbaria are according to Holmgren et al. (1990), except for BHZB (Fundação Zoobotânica de Belo Horizonte Herbarium). Additional type specimens housed at B, NY, P, U, and Z were accessed online. Specimens from MG, confirmed using published sources, were photographed with a digital camera (Nikon Coolpix 885, 3.2 megapixels). Information on labels was transcribed to a database created in Brahms software (Botanical Research and Herbarium Management System, version 5.55, Oxford University). The database created

in preparing this checklist is being prepared for posting on the Internet.

The Checklist includes specimens from horticultural sources with documented origins within MG, which are identified with the notation "fl. cult." Only the collector of flowering specimens of these plants and the collection number were maintained, to avoid double numbering; although these specimens were included with wild specimens for the original municipality of collection within Minas Gerais. Specimens lacking municipalities, but indicating the following names of mountain ranges or parks "Serra do Cipó," "Serra do Caparaó, MG" or "Parque do Itatiaia, MG" were attributed to the municipalities of Santana do Riacho, Alto Caparaó, and Itamonte, respectively.

The Checklist presents the following data for each taxon: accepted nomenclature (following Luther 2004); author name; publication; basionym (indicated by a —); synonymy (only those published after Smith & Downs 1974, 1977, 1979); type material, geographical distribution including elevation, native habitat (Atlantic Forest, low drought-deciduous forest, high altitude grasslands, rocky fields, and savanna), and habit (epiphytic, saxicolous, terrestrial). TABLE 1 lists the municipality or municipalities in Minas Gerais where bromeliad records can be found, providing a grid cell number and Roman numeral for each municipality. The Checklist also cites other Brazilian states where the taxon occurs and provides data on phenology related to flower and fruiting, as available.

Geographical ranges within Brazil were obtained from the literature and from the RB herbarium. State abbreviations in bold face indicate that at least one voucher specimen for that state is deposited at RB. State names are abbreviated as follows: Acre (AC), Alagoas (AL), Amapá (AP), Amazonas (AM), Bahia (BA), Ceará (CE), Distrito Federal (DF), Espírito Santo (ES), Goiás (GO), Maranhão (MA), Mato Grosso (MT), Mato Grosso do Sul (MS), Minas Gerais (MG), Pará (PA), Parába (PB), Paraná (PR), Pernambuco (PE), Piauí (PI), Rio de Janeiro (RJ), Rio Grande do Norte (RN), Rio Grande do Sul (RS), Rondônia (RO), Roraima (RR), Santa Catarina (SC), São Paulo (SP), and Sergipe (SE). A taxon is considered endemic to MG only if it is confined within the political boundaries of the state. Abbreviations for authors follow Brummit and Powell (1992), and the literature citations follow Stafleu and Cowan (1976–1988) for books and Lawrence et al. (1968) for journals.

We selected one representative voucher specimen for each taxon. Type specimens, which were seen, are indicated by an exclamation mark. A complete list of all the material exam-

ined as well as a collector index is available from the authors upon request.

RESULTS AND DISCUSSION

The state of Minas Gerais supports 27 genera, 265 species, and 18 infra-specific taxa representing all three bromeloid subfamilies (TABLE 2). These numbers are especially relevant considering that of these 283 taxa, 102 (36%) are endemic to the state (TABLES 2, 3). Data on 2686 specimens were recorded, photographed, and databased; and 98% of them were either verified or identified.

Minas Gerais supports more genera than any other Brazilian state and more than any other Central American or South American country (TABLE 3). The total number of species also is high, amounting to ca. 9% of the entire bromeliad family (Luther 2004). Species diversity (spp/1000 km²), however, is greater in RJ and SC (TABLE 3).

Richness at the generic rank can be explained partly by the land that MG occupies, where several different climatic types exist, which allow the development of distinct vegetation. *Caatinga*, for instance, and its characteristic species (e.g., *Neoglaziovia variegata*) reach their southern distribution limit in MG. The extreme southern portion of the state, however, has totally distinct habitats, such as high-altitude grasslands where *Fernseea itatiaiae* grows under continuous humid, cool conditions. Another factor is the long boundary that MG has with the Brazilian coastal states (see FIGURE 1). This contour acts as a portal, allowing inland distribution of characteristic Atlantic Forest taxa, many of them from subfamily Bromelioideae. Good examples are *Aechmea alba*, previously known only from the extreme south of BA but now recorded for northeastern MG. Also *Quesnelia strobilispica*, typically an Atlantic Forest species of RJ and ES, now inhabits eastern MG reaching as far as montane forest in the Espinhaço mountain range, its western distribution limit. Noteworthy taxa also occupy presently disjunct distributions. *Vriesea crassa* is an example; this inhabitant of high-altitude grasslands in the Órgãos mountain range (RJ) also can be found in the *campos rupestres* of MG (Martinelli & Vaz 1988).

Subfamily Bromelioideae is the best represented of the three subfamilies within MG, with 19 genera (70% of the total) and 120 species, followed by Tillandsioideae with 4 genera (15%) and 82 species; next is Pitcairnioideae with 4 genera (15%) and 63 species (TABLE 2, FIGURE 2). These numbers distinguish southeastern Brazil as a center of diversification for subfamily Bromelioideae (Smith 1934, Smith &

Downs 1974). Habitat and climate diversity and ancient substrates (derived from crystalline bedrock and known as the Brazilian shield) are suited for saxicolous habits. Together they have favored substantial divergence and frequent high insularity for Bromelioideae in southeastern

Brazil, often involving localized populations (Benzing 2000).

Vriesea, the most diverse bromeliad genus within MG, accounts for 19% of the species followed by *Dyckia* 16%, *Tillandsia* 9%, *Billbergia* 8%, *Orthophytum* 7%, *Aechmea* 7%, *Encholirium* 6%, *Neoregelia* 5%, *Nidularium* 4%, and *Alcantarea* 3% (TABLE 2). Several floristics inventories for MG cite Tillandsioideae (including *Vriesea*) as one of the largest groups (Paula 1998, Marques 2002). According to Costa (2002) and Coffani-Nunes (1997), *Vriesea* and *Tillandsia* exhibit a coastal type distribution consistent with the Atlantic Forest domain. This is reflected in *Vriesea* distribution within MG, where the eastern, southeastern, and southern portions show a concentration of taxa with vegetation similarities to many of the species in the adjacent coastal states. *Billbergia*, *Orthophytum*, and *Aechmea* are the three most species-rich

TABLE 2. Bromeliaceae subfamilies and genera of Minas Gerais (MG), followed by species richness, endemism, and total number of taxa (no. of spp. plus varieties and subspecies).

Sources: ¹ Holst 1994, ² Krömer et al. 1999, ³ Fontoura et al. 1991, ⁴ Espejo-Serna et al. 2004, ⁵ Reitz 1983, and ⁶ Dubs 1998.

genera within Bromelioideae. In MG, *Orthophytum* has its two main diversity centers in the Espinhaço mountain range and northeastern MG, especially the Jequitinhonha river basin. In contrast, *Billbergia* and *Aechmea*, more characteristic of the Atlantic Forest, are best represented in eastern and southern MG, though some species of these genera are more frequent in the savanna domain (e.g., *A. bromeliifolia*, *B. meyerii*, *B. zebrina*).

Endemism is particularly pronounced in several genera, including *Cryptanthus*—six of its species are MG endemics (TABLE 2). *Dyckia* (76% of its species endemic) and *Encholirium* (73%) occur mainly along the rocky fields of the Espinhaço range. *Orthophytum* (68%) is restricted to the rocky fields and to the inselbergs in northeastern MG. Pitcairnioideae exhibits the greatest endemism with 45% (44 species) followed by Bromelioideae with 32% (31 species),

and by Tillandsioideae, with 23% (22 species) (FIGURE 2).

High levels of interfertility within *Dyckia* and *Encholirium* suggest recent speciation perhaps encouraged by conditions peculiar to certain elevated habitats, such as the rocky fields and fluctuating Plio-Pleistocene climates that displaced and fragmented life zones (Benzing 2000). Similarly elevated endemism for Pitcairnioideae in Venezuela was observed by Holst (1994) and may reflect the scarcely appendaged seeds with poor dispersal abilities via wind. This region also is located over Precambrian crystalline rock, which is the other ancient shield (Guyanan) in South America. Vicariance may also explain why MG *Dyckia* and *Encholirium* include so many endemic and insular species and have very narrow distribution areas, mainly across the rocky fields. Two genera having appendaged seeds presumably are capable of long-distance

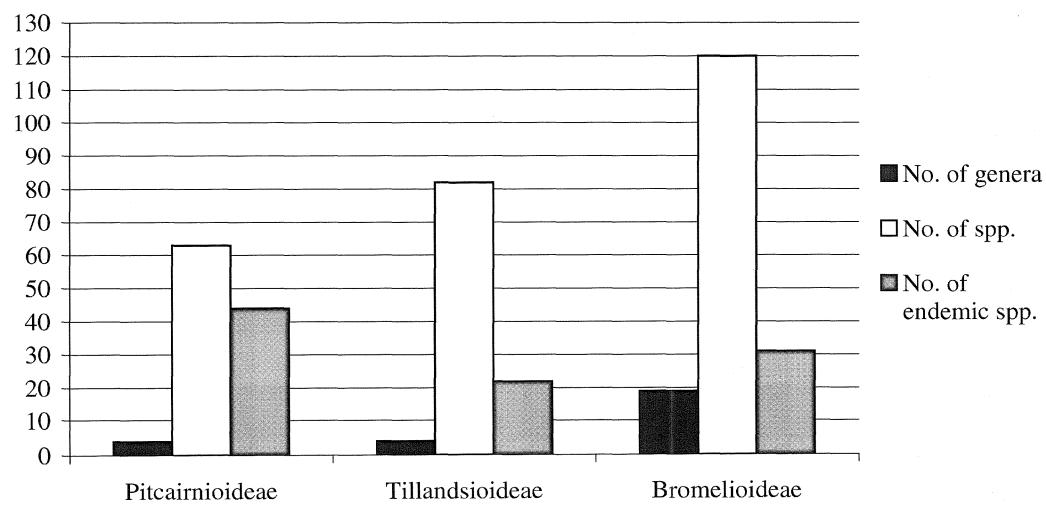

FIGURE 2. Number of genera, species, and endemic species for the three subfamilies of Bromeliaceae within the state of Minas Gerais, Brazil.

wind dispersion (*Alcantarea* and *Vriesea*), but they too exhibit high endemism particularly in upland habitats, suggesting that other factors have contributed to the pattern of endemism. The availability of the appropriate substrate is essential for the establishment of isolated populations. All of these processes together may be responsible for the high level of endemism and large number of species observed in the Bromeliaceae flora of MG. Answers will require extensive study of the relationships, ecology, and reproductive biology of these plants, along with more complete records of their distribution. Studies on the reproductive biology and dispersal strategies of many genera, such as *Cryptanthus*, *Orthophytum*, and *Neoregelia*, need to be encouraged to compile new data on the Bromeliaceae speciation process in MG.

New Records for Minas Gerais

The following 23 taxa represent new records for MG: *Aechmea alba*, *A. alopecurus*, *A. pureorosea*, *A. weilbachii*, *Alcantarea odorata*, *Billbergia nutans*, *Hohenbergia augusta*, *H. catingae*, *H. pabstii*, *Neoregelia chlorosticta*, *N. farinosa*, *Nidularium longiflorum*, *Quesnelia arvensis*, *Tillandsia chapeuensis*, *T. globosa*, *T. pruinosa*, *T. aff. sprengeliana*, *Vriesea aff. hieroglyphica*, *V. hoehneana*, *V. itatiaiae*, *V. raciniae*, *V. sazimae*, and *Wittrockia* sp. 1. The first record of *Aechmea alopecurus* is especially relevant, as it answers an old question about the origin of this species, which was first collected by J.E. Pohl during the nineteenth century in Brazil (holotype W) without any further information about its origin. Botanists have attempted to locate natural populations, since Leme (1990) found blooming plants in the Burle Marx collection (with a doubtful origin to Mato Grosso state). The record presented here for MG, however, indicates that the range of this taxon may be within forests of the Atlantic domain.

Poorly Known Species

The following taxa, which lack reliable distribution records and taxonomic information, merit further field study and systematic work: *Aechmea alba*, *A. alopecurus*, *A. burle-marxii*; *Alcantarea hatschbachii*, *A. sp. 1*; *Billbergia leptopoda*, *B. macrocalyx*, *B. minarum*, *B. pohliana*; *Bromelia glaziovii*, *B. villosa*; *Cryptanthus minarum*, *C. warasii*; *Dyckia argentea*, *D. elata*, *D. glandulosa*, *D. goehringii*, *D. granmogulensis*, *D. macropoda*, *D. orobanchoides*, *D. princeps*, *D. sp. 1*, *D. sp. 2*, *D. sp. 3*, *D. sp. 4*, *D. sp. 5*, *D. spinulosa*, *D. warmingii*, *D. weddelliana*; *Neoregelia cyanea*, *N. leprosa*, *N. oli-*

gantha; *Orthophytum duartei*, *O. foliosum*, *O. gurkenii*; *Tillandsia chapeuensis*; *Vriesea densiflora*, *V. modesta*, *V. regnellii*, *V. segadas-viannaiae*, and *V. sp. 1*.

Doubtful Occurrences

Taxa with only one voucher attesting to their collection in MG, and taxa cultivated for many years and then published as new species attributed to MG (but with imprecise localities) are listed but require confirmation: *Aechmea gamosepala*; *Billbergia macrocalyx*; *Dyckia brevifolia*, *D. monticola*; *Encholirium belemii*, *E. brasiliense*; *Orthophytum disjunctum* var. *angustibracteatum*, *O. disjunctum* var. *variegatum*, *O. disjunctum* var. *viridiflorum*; *Tillandsia horstii*, *T. leomaniana*, and *Wittrockia tenuisepala*.

Species Complexes

Several groups of species are particularly difficult to differentiate using dried material and frequently are misidentified in herbaria. Additional fieldwork and study are needed to better define species limits of these groups: *Aechmea alba* vs. *A. chlorophylla*; *A. burle-marxii* vs. *A. ligulata*; *A. organensis* vs. *A. coelestis*; the *Alcantarea extensa* complex including several specimens with different characteristics of coloration, size, and shape of the inflorescence; *Billbergia amoena* var. *carnea* vs. *B. elegans*; *B. distachia* vs. *B. minarum*; *B. pohliana* vs. *B. reichardtii*; *B. porteana* vs. *B. zebrina*; the *B. Saundersii* complex (the synonymy proposed by Read and Philcox in 1985 needs revision); *B. tweedieana* and its varieties separated by sepal length (a variable character even within the same individual); *Dyckia cinerea* vs. *D. bracteata* vs. *D. trichostachya*; *D. consimilis* vs. *D. saxatilis*; *D. lagoensis* vs. *D. minarum* vs. *D. eminens*; *D. linearifolia* vs. *D. tuberosa*; *D. macedoi* vs. *D. brachiphylla*; *D. rariflora* vs. *D. sp. 1*; *D. schwackeana* vs. *D. simulans*; *Orthophytum compactum* vs. *O. mello-barretoi*; *O. disjunctum* vs. its heterotypic varieties; *O. glabrum* vs. *O. maracasense*; *O. mello-barretoi* (appearing to encompass a complex of different species, exhibiting distinct plant sizes, with variable density of trichomes, and petal colors); *Pitcairnia flammea* and its varieties; *Tillandsia arhiza* vs. *T. graomogolensis* vs. *T. streptocarpa*; *Vriesea atropurpurea* vs. *V. sp. 1*; *V. crassa* vs. *V. hoehneana* vs. *V. saxicola*; *V. gradata* vs. *V. ensiformis*; *V. guttata* vs. *V. pardalina*; *V. jonesii* vs. *V. minor*; *V. monacorum* vs. *V. schwackeana*; and *V. neoglutinosa* vs. *V. procera* and its varieties vs. *V. segadas-viannaiae* vs. *V. vagans*.

Typification Problems

Some of the species that occur in MG present typification problems and are listed here to call attention to the need for additional study. *Ananas comosus* and *Quesnelia liboniana* need lectotypes. *Billbergia macrocalyx*, *B. vittata*, *B. zebrina*, and *Vriesea scalaris* are typified by “clonotypes” that do not accord with the ICBN (Greuter et al. 2000).

Erroneously Reported and Excluded Taxa

Alcantarea geniculata (Wawra) J.R.Grant, Trop. Subtrop. Pflanzenwelt 91: 13. 1995.—*Platystachys geniculata* Wawra, Oesterr. Bot. Z. 11: 345. 1862. Synonym: *Vriesea geniculata* (Wawra) Wawra, Bot. Ergebni. 156. 1866. TYPE: Brazil—Rio de Janeiro, Petrópolis, Wawra & Maly 419 (Holotype: W lost). Lectotype: Bot. Ergebni. 156, t. 25, 1866 designated by Smith & Downs (1977).

DISTRIBUTION: Rio de Janeiro state (RJ).

NOTE: According to Leme (1997b), *Alcantarea geniculata* is endemic to the Órgãos mountain range and adjacent areas in Rio de Janeiro state. The material cited by Smith and Downs (1977) for Minas Gerais state (MG) is identified here as *Alcantarea turgida*.

Dyckia reitzii L.B.Sm., Anais Bot. Herb. “Barbosa Rodrigues” 2: 14. 1950. TYPE: Brazil—Santa Catarina, Reitz 2690 (Holotype: US!, Isotype: HBR).

DISTRIBUTION: PR, RS, SC.

NOTE: The specimens cited by Smith & Downs (1974) for the Caparaó range are identified here as *Dyckia bracteata*.

Dyckia sellowiana Mez, in C. DC., Monogr.

phan. 9: 520. 1896. TYPE: Brazil—*Sellow Brom.* Paris 52 (Holotype: P).

DISTRIBUTION: DF.

NOTE: The type material lacks provenance, except Brazil. No material was found to certify its occurrence at MG.

Hohenbergia vestita L.B.Sm., Phytologia 24: 446. 1972. TYPE: Brazil—Bahia, H.S. Irwin 32287 (Holotype: NY, US photo!).

DISTRIBUTION: BA.

NOTE: Wrongly reported for MG because of an error in the type collector's numeration. The species is native to Bahia, where it occurs in Jacobina and Mucugê municipalities.

Pitcairnia flammea var. *spinulosa* E.Pereira, Bradea 2(25): 174. 1977. TYPE: Brazil—Minas Gerais, serra do Cipó, G. Hatschbach et al. 28816 (Holotype: MBM!).

DISTRIBUTION: MG.

NOTE: New synonym of *Pitcairnia curvidens* (Versieux & Wendt unpubl. data).

Vriesea ouroensis W.Weber, Feddes Repert. 97: 106. 1986. TYPE: Brazil—Minas Gerais, Ouro Preto, A. Seidel 929 (Holotype: WEB 623 lost).

DISTRIBUTION: MG.

NOTE: New synonym of *Vriesea minarum* (Versieux & Wendt unpubl. data).

Vriesea platynema Gaudich., Voy. Bonite, Bot. 3: t. 66. 1843. TYPE: Brazil—Rio de Janeiro, Gaudichaud s.n. (Holotype: P!).

DISTRIBUTION: CE?, PR, RJ, RS, SC, SP.

NOTE: The only material cited by Smith & Downs (1977) is identified here as *Vriesea minor*.

BROMELIAD CHECKLIST FOR MINAS GERAIS, BRAZIL

Note: — = basionym; fl. cult. = flowered in cultivation. Grid cell letter, number, and Roman numeral (see TABLE 1); two-letter state abbreviations (see page 109). Bold state abbreviations = at least one voucher specimen for that state deposited at herbarium RB; herbaria abbreviations in parentheses.

Acanthostachys strobilacea (Schult. & Schult. f.) Klotzsch in Link, Klotzsch & Otto, Icon. pl. rar. hort. berol. 1: 21. 1840.—*Hohenbergia strobilacea* Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1252. 1830. TYPE: Brazil—Minas Gerais, *Martius s.n.* (Holotype: M).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 190–800 m; epiphytic, saxicolous. C8i; E7iii; E9ii; F7i, iii, iv; F8iii, v, vi, viii, xi, xviii, xxi; F9ii, v, viii; G6iii; G8i, vi, xi; G9v, viii, xi, xii; H8vi, xiv; H9v, vi, I8. ES, MA?, MG, PR, RJ, SP.

BLOOMING: September to February peaking November.

VOUCHER: Nova Lima, *Versieux* 94 (SP).

Aechmea alba Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 375. 1892. Synonym: *Machrochordion alba* (Mez) L.B.Sm. & Kress, Phytologia 66(1): 77. 1989. TYPE: Brazil—Bahia, *Blanchet* 2276 (Holotype: G).

DISTRIBUTION: Atlantic Forest; 170–250 m; epiphytic, terrestrial. C11ii, C12. BA, MG, RJ.

BLOOMING: June. Fruit August to February.

VOUCHER: Salto da Divisa, *Lombardi* 5094 (BHCB).

NOTE: This species often is confused with *Aechmea lamarchei* Mez.

Aechmea alopecurus Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 367. 1892. Synonym: *Pothuava alopecurus* (Mez) L.B.Sm. & Kress, Phytologia 66(1): 75. 1989. TYPE: Brazil—*Pohl* 5230 (Holotype: W).

DISTRIBUTION: Atlantic Forest; 100–200 m; epiphytic. C12. BA, MG.

BLOOMING: August.

VOUCHER: Salto da Divisa, *Lombardi* 5285 (BHCB).

NOTE: The specimen cited here also presents the curved scape as seen by Till (1987) on the holotype.

Aechmea bambusoides L.B.Sm. & Reitz, Bull. Bromeliad Soc. 14: 31. 1964. TYPE: Brazil—Minas Gerais, between Muriaé and

Ponte Nova, A. Seidel 526 (Holotype: US!, Isotype: HBR!).

DISTRIBUTION: Atlantic Forest; 140–210 m; epiphytic. H9i, iv. MG, RJ.

BLOOMING: July to October.

VOUCHER: Além Paraíba, *Martinelli* 1551 (RB, US).

Aechmea bromeliifolia (Rudge) Baker var. *bromeliifolia* in Benth. & Hook. f., Gen. pl. 3: 664. 1883.—*Tillandsia bromeliaefolia* Rudge, Pl. Guian. 4: 32. 1807. Synonym: *Machrochordion bromeliifolia* (Rudge) Beer, Phytologia 66(1): 77. 1989. TYPE: French Guiana—*Martin s.n.* (Holotype: BM).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 600–1700 m; epiphytic, terrestrial, saxicolous. A8ii; C9i, ii; D7iii; E2ii; E5; E7iii; E8iv, v, x, xi; F4i, iv; F7iii, iv; F8iii, v, ix, xi, xii, xviii; G5iii; G7iii, iv, v; G8ii, iii, vii, viii, ix, x; H6iii; H7xiii; H8iii, x. AM, AP, BA, CE, DF, GO, MA, MG, MT, PA, PB, PR, RJ, RO, SC, SP.

BLOOMING: May to September peaking August. Fruit from June to December.

VOUCHER: Diamantina, *Pereira* 1675 (HB, RB).

Aechmea bromeliifolia var. *albobracteata* Philcox, Ashingtonia 1(8): 92. 1974. TYPE: Brazil—Mato Grosso, km 264, Xavantina highway—Cachimbo, *Philcox* 4605 (Holotype: K).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 800–1200 m; terrestrial, epiphytic. E8ix, H6iii. MG, MT.

BLOOMING: August.

NOTE: This taxon differs from the typical variety by white scape bracts and olive-green corolla. Although rare in collections, several populations were observed in the Parque Estadual do Pico do Itambé growing in the understory of a semideciduous forest.

VOUCHER: Lambari, *Pereira* 10615 (HB, MBM).

Aechmea brueggeri Leme, Bromélia 3(3): 22. 1996. TYPE: Brazil—Minas Gerais, Rio Preto, E.M.C. Leme 3404 fl. cult. (Holotype: HB!, Isotype: CESJ!).

DISTRIBUTION: Atlantic Forest; 400–450 m; terrestrial. I8. Endemic.

BLOOMING: June to September.

VOUCHER: Rio Preto, *Pires* s.n. (CESJ 30665).

Aechmea burle-marxii E.Pereira, Bradea 2: 307. 1979. Synonym: *Ortgiesia burle-marxii* (E.Pereira) L.B.Sm. & Kress, Phytologia 66(1): 72. 1989. TYPE: Brazil—Mi-

nas Gerais, Teófilo Otoni, *Burle Marx s.n.* fl. cult. (Holotype: HB!).

DISTRIBUTION: Atlantic Forest; terrestrial?. D10. BA, MG.

BLOOMING: September.

NOTE: For MG, the species is only known from the type collection.

Aechmea distichantha Lem. var. **distichantha**, Jard. Fleur. 3: t. 269. 1853. Synonym: *Platyaechmea distichantha* (Lem.) L.B.Sm. & Kress, Phytologia 69(4): 272. 1990. TYPE: Brazil—São Paulo, serra d'Ypanema, *De Jonghe Hortus s.n.* (Holotype: BR?).

DISTRIBUTION: Rocky fields, Atlantic Forest; 700–2200 m; epiphytic, saxicolous, terrestrial. F8xviii; G5v; H5iii; H7i, vi, vii, xi, xiii; I5i, iv; I6ii, iii; I7ii. MG, PR, RJ, RS, SC, SP.

BLOOMING: June to October peaking July to August.

VOUCHER: Toledo, Stehmann 2445 (BHCB, SEL).

Aechmea distichantha var. **glaziovii** (Baker) L.B.Sm., Arq. Bot. Estado São Paulo 1: 102. 1943.—*Aechmea glaziovii* Baker, J. Bot. 17: 133. 1879. Synonym: *Platyaechmea distichantha* var. *glaziovii* (Baker) L.B.Sm. & Kress, Phytologia 69(4): 272. 1990. TYPE: Brazil—Rio de Janeiro, pico do Itatiaia, *Glaziou* 8986 (Holotype: K).

DISTRIBUTION: Atlantic Forest; 800–1200 m; epiphytic. H5iii; I6i, v. MG, PR, RJ, SP.

BLOOMING: September to October.

VOUCHER: Delfim Moreira, Kuhlmann 2431 (SP).

Aechmea distichantha var. **schlumbergeri** E.Morren ex Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 343. 1892. Synonym: *Platyaechmea distichantha* var. *schlumbergeri* (E.Morren ex Mez) L.B.Sm. & Kress, Phytologia 69(4): 273. 1990. TYPE: Morren *Hortus s.n.* (Holotype: LG, Isotype: B!).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 800–1500 m; epiphytic, saxicolous. G5v; H5i, iii; H7ix, xiii. MG.

BLOOMING: June to August.

VOUCHER: Poços de Caldas, Viégas 6653 (SP).

Aechmea gamosepala Wittm., Bot. Jahrb. Syst. 13(29): 3. 1891. Synonym: *Ortgiesia gamosepala* (Wittm.) L.B.Sm. & Kress, Phytologia 66(1): 72. 1989. TYPE: Brazil—Santa Catarina, *Schimpfer* 231 (Holotype: LG).

DISTRIBUTION: Atlantic Forest; 635 m?; epiphytic. G9ix. MG, PR, RS, SC, SP.

BLOOMING: unknown.

VOUCHER: Manhuaçu, Seidel 897 (SEL).

NOTE: Doubtful occurrence for MG. The only specimen is from cultivated material. This taxon is frequent in the southern regions of Brazil.

Aechmea lamarchei Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 370. 1892. Synonym: *Machrochordion lamarchei* (Mez) L.B.Sm. & Kress, Phytologia 66(1): 77. 1989. TYPE: *Lamarche Hortus in Morren Hortus s.n.* (Holotype: LG).

DISTRIBUTION: Rocky fields, Atlantic Forest; 300–1500 m; terrestrial, saxicolous, rarely epiphytic. E8vii; F8iii, iv, v, ix, xvi, xviii; F9iii, iv, v, viii; G8ii, ix, xi; G9iii, iv, vii, viii, xviii; H8vi, xv; H9ii, v. BA, ES, MG, RJ.

BLOOMING: May to August.

VOUCHER: Jequeri, *Salino* 3763 (BHCB).

Aechmea maculata L.B.Sm., Smithsonian Misc. Collect. 126: 15. 1955. Synonym: *Machrochordion maculata* (L.B.Sm.) L.B.Sm. & Kress, Phytologia 66(1): 77. 1989. TYPE: Brazil—Minas Gerais, Caeté, serra da Piedade, M.B. Foster 561 (Holotype: GH, Isotypes: US!, BHCB!).

DISTRIBUTION: Rocky fields; 1200–1350 m; saxicolous. F8iv, xvi. Endemic.

BLOOMING: July. Fruit in February.

VOUCHER: Caeté, Foster 561 (BHCB, SP, US).

Aechmea nudicaulis (L.) Griseb. var. **nudicaulis**, Fl. Brit. W. I. 593. 1864.—*Bromelia nudicaulis* L., Sp. pl. 1: 286. 1753. TYPE: West Indies—*Plumier* s.n. (Holotype: P).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 200–1700 m; epiphytic, saxicolous. E8i, x, xi; F8iv, xvi, xviii; F9vii, viii; G8ii, viii, ix, x. BA, ES, MG, PR, RJ, SC, SP.

BLOOMING: Peaking September to November. Fruit from February to March.

VOUCHER: Caeté, Siqueira 25 (BHCB).

NOTE: Most material identified under this name in Brazil may correspond to the variety *cuspidata*.

Aechmea nudicaulis var. **aureorosea** (Antoine) L.B.Sm., Smithsonian Misc. Collect. 126: 17. 1955.—*Hoplophytum aureo-roseum* Antoine, Wiener Ill. Gart.-Zeitung 6: 97. 1881. Synonym: *Pothuava nudicaulis* var. *aureorosea* (Antoine) L.B.Sm. & Kress, Phytologia 66(1): 76. 1989. TYPE: Original description and plate.

DISTRIBUTION: Rocky fields, Atlantic Forest; 500–2000 m; epiphytic, saxicolous. E8iii, iv; F8iv; G8ix; G9viii, xii; H7xiii; H8vi, x; I6iv. ES, MG, RJ, SP.

BLOOMING: December to January.
 VOUCHER: Diamantina, *Hatschbach* 29048 (MBM).

Aechmea nudicaulis var. **cuspidata** Baker, J. Bot. 17: 234. 1879. Synonym: *Pothuava nudicaulis* var. *cuspidata* (Baker) L.B.Sm. & Kress, Phytologia 66(1): 76. 1989. TYPE: Brazil—São Paulo, *Burchell* 3150 (Holotype: K).

DISTRIBUTION: Rocky fields, Atlantic Forest; 500–1200 m; epiphytic, saxicolous. E8ix, xi; F8ix; F9viii; G8vii, x; H5i; H7xiii; I6v. **BA, ES, MG, PR, RJ, RS, SC, SP.**

BLOOMING: February.
 VOUCHER: Ouro Preto, *Ule* 341 (R).

Aechmea organensis Wawra, Oesterr. Bot. Z. 30: 116. 1880. Synonym: *Ortgiesia organensis* (Wawra) Smith & Kress, Phytologia 66(1): 73. 1989. TYPE: Brazil—Rio de Janeiro, Teresópolis, serra dos Órgãos, *Wawra* 317. (Lectotype and Isolectotypes: W) designated by Till (1994).

DISTRIBUTION: High altitude grassland, Atlantic Forest; 1500–1600 m; epiphytic, saxicolous. G9iii, xvi. **MG, RJ, RS, SC, SP.**

BLOOMING: October to February.
 VOUCHER: Araponga, *Paula* 1004 (VIC).

Aechmea phanerophlebia Baker, Handb. Bro-mel. 47: 1889. TYPE: Brazil—Rio de Janeiro, *Glaziou* 16412 (Holotype: K).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 200–2100 m; epiphytic, saxicolous terrestrial. D7ii, iii; E8iii, iv, v, x, xi; F9vii, viii; G9iv, xi, xiv, xviii; H7i; H8x, xiv. **ES, MG, RJ, SP.**

BLOOMING: Peaking January to April. Fruit from April to September.
 VOUCHER: Serro, *Mota* 1852 (BHCB).

NOTE: Some specimens from areas of rocky fields presented an anomalous dilatation in the inflorescence base.

Aechmea pineliana (Brongn. ex Planch.) Baker, J. Bot. 17: 232. 1879.—*Echinostachys pineliana* Brong. ex Planch., Hort. donat. 25. 1858. Synonyms: *Aechmea triticina* var. *capensis* L.B.Sm., Smithsonian Misc. Collect. 126: 19. 1955. *Pothuava triticina* var. *capensis* (L.B.Sm.) L.B.Sm. & Kress, Phytologia 66(1): 77. 1989. *Pothuava pineliana* (Brongn. ex Planch.) L.B. Sm. & Kress, Phytologia 66(1): 77. 1989. TYPE: Brazil—Rio de Janeiro, Guanabara, *Pinel* s.n. (Holotype: P).

DISTRIBUTION: Atlantic Forest; 500–1000 m;

epiphytic, terrestrial. G9iii, xiii; H8vi. **ES, MG, RJ.**

BLOOMING: May to September.
 VOUCHER: Rosário da Limeira, *Paula* 1345 (VIC).

NOTE: The only specimen cited for MG by Smith and Downs (1979) as *Aechmea triticina* var. *capensis*, *Mello Barreto* 2106 (BHMG), could not be found; however, we adopt the synonymy proposed by Wendt (1997).

Aechmea purpureorosea (Hook. f.) Wawra, Oesterr. Bot. Z. 30: 148. 1880. TYPE: Original description and plate.

DISTRIBUTION: Atlantic Forest; 400 m; epiphytic. G9viii. **MG, RJ, ES.**

BLOOMING: March.
 VOUCHER: Jequeri, *Salino* 4193 (BHCB).

NOTE: First record for MG since the specimen previously reported by Smith and Downs (1979), *Schwacke* 11969 (RB), is identified here as *Aechmea phanerophlebia*. Known from a single locality and threatened by the construction of a dam.

Aechmea ramosa Mart. ex Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1272. 1830. TYPE: Brazil—Minas Gerais, *Martius* 1036 (Holotype: M).

DISTRIBUTION: Atlantic Forest; 200–1200 m; epiphytic, saxicolous, terrestrial. D10; E9i; F9i, ii, iii, viii; G9vii, xviii; H8vi, vii, ix, xiv; H9ii. **ES, MG, RJ.**

BLOOMING: Peaking March. Fruit in September.

VOUCHER: Marliéria, *Stehmann* 2946 (BHCB).

NOTE: Very frequent in the Rio Doce drainage basin valley. According to specimen annotations, the corolla can have three colors: yellow (ES, MG, RJ), pinkish (ES, RJ), and white (RJ).

Aechmea vanhoutteana (Van Houtte) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3) 366. 1892.—*Echinostachys vanhoutteana* Van Houtte, Catal. 1878. Synonym: *Pothuava vanhoutteana* (Van Houtte) L.B.Sm. & Kress, Phytologia 66(1): 77. 1989. TYPE: Description and plate of Edouard Morren, Belgique Hort. 31: 163 t. 18. 1881 (Smith & Downs 1979).

DISTRIBUTION: Atlantic Forest; 800–1300 m; epiphytic, saxicolous, terrestrial. G9iii, G10i. **MG, RJ, SP.**

BLOOMING: Peaking August to October.
 VOUCHER: Alto Caparaó, *Brügger* FPNC 361 (CESJ, RB).

Aechmea weilbachii Didr., Ann. Sci. Nat. Bot. 2: 375. 1854. Synonym: *Lamprococcus wei-*

bachii (Didr.) E.Morren, Phytologia 66(1): 71. 1989. TYPE: Brazil—Rio de Janeiro, Corcovado, *Didrichsen s.n.* (Holotype: C).

DISTRIBUTION: Atlantic Forest; > 730 m?; epiphytic. H8x. ES, MG, RJ.

BLOOMING: June.

VOUCHER: Lima Duarte, *Silva* 6 (VIC).

Alcantarea burle-marxii (Leme) J.R.Grant, Bromélia 2(3): 24. 1996.—*Vriesea burle-marxii* Leme, Pabstia 4(3): 4. 1993. TYPE: Brazil—Minas Gerais, Pedra Azul, *R. Burle Marx s.n.* (Holotype: HB!).

DISTRIBUTION: Granitic inselbergs in transitional area between Atlantic Forest and low drought-deciduous forest; 620–1000 m; saxicolous. C10vi. Endemic.

BLOOMING: December to January.

VOUCHER: Pedra Azul, *Burle Marx s.n.* fl. cult. (HB 77777).

Alcantarea duarteana (L.B.Sm.) J.R.Grant, Trop. Subtrop. Pflanzenwelt 91: 13. 1995.—*Vriesea duarteana* L.B.Sm., Phytologia 18: 80. 1968. TYPE: Brazil—Minas Gerais, Diamantina, *A.P. Duarte* 9017 (Holotype: HB!, Isotypes: RB!, US!).

DISTRIBUTION: Rocky fields; 1000–1450 m; saxicolous. E8iv. Endemic.

BLOOMING: Peaking December to January.

VOUCHER: Diamantina, *Hatschbach* 28977 (HB, MBM, US).

Alcantarea extensa (L.B.Sm.) J.R.Grant, Trop. Subtrop. Pflanzenwelt 91: 13. 1995.—*Vriesea extensa* L.B.Sm., Arq. Bot. Estado São Paulo, 1: 116. 1943. TYPE: Brazil—Espírito Santo, Cachoeiro do Itapemirim, *M.B. Foster* 163 (Holotype: GH).

DISTRIBUTION: High altitude grassland, Atlantic Forest; 450–1600 m; saxicolous. G9iii, iv, vii, ix, xvi; D11iii. ES, MG, RJ.

BLOOMING: December to February. Fruit from April to September.

VOUCHER: Manhuaçu, *Hatschbach* 48595 (MBM).

Alcantarea hatschbachii (L.B.Sm. & Read) Leme, Bromélia 2(3): 22. 1995.—*Vriesea hatschbachii* L.B.Sm. & Read, Phytologia 30: 292. 1975. TYPE: Brazil—Minas Gerais, Gouvea, *G. Hatschbach* 29085 (Holotype: US!), Isotypes: MBM!, SPF!, Z!).

DISTRIBUTION: Rocky fields; 1100 m; saxicolous. E8v. Endemic.

BLOOMING: January.

VOUCHER: Gouvea, *Hatschbach* 29085 (MBM, SPF, US, Z).

Alcantarea imperialis (Carrière) Harms in Engl. & Prantl., Nat. Pflanzenfan. 15a: 126. 1930.—*Vriesea imperialis* Carrière, Rev. Hort. 60: 58. 1888. TYPE: *Hortus Paris Museum s.n.* (Holotype: P?).

DISTRIBUTION: Atlantic Forest; 600 m; saxicolous, terrestrial?. H8ix. MG, RJ.

BLOOMING: September to March peaking October.

VOUCHER: Juiz de Fora, *Caiafa* s.n. (CESJ 30424).

Alcantarea odorata (Leme) J.R.Grant, Trop. Subtrop. Pflanzenwelt 91: 13. 1995.—*Vriesea odorata* Leme, Bradea 5(16): 166. 1989. TYPE: Brazil—Rio de Janeiro, próximo a Raposo, *E.M.C. Leme* 262. (Holotype: HB!).

DISTRIBUTION: Atlantic Forest; 210 m; saxicolous. H9v. MG, RJ.

BLOOMING: December to January.

VOUCHER: Leopoldina, *Hatschbach* 61610 (BHCB, MBM).

Alcantarea sp. 1.

DISTRIBUTION: Atlantic Forest, saxicolous. H9i, ii, iii, v. Endemic.

BLOOMING: December to February.

VOUCHER: Leopoldina, *Duarte* 14058 (RB).

Alcantarea turgida Versieux & Wand., Unpublished. TYPE: Brazil—Minas Gerais, Conceição do Mato Dentro, *L.M. Versieux* 260 (Holotype: SP, Isotypes: BHCB, MBM, RB, SPF, VIC).

DISTRIBUTION: Rocky fields, Atlantic Forest; 700–1300 m; saxicolous, terrestrial. F8v, vii, xviii, xix. Endemic.

BLOOMING: December to February. Fruit in April.

VOUCHER: Santana do Riacho, *Wanderley* 2488 (SP).

Ananas ananassoides (Baker) L.B.Sm., Bot. Mus. Leafl. 7: 70. 1939.—*Acanthostachys ananassoides* Baker, Handb. Bromel. 25. 1889. TYPE: Brazil—Minas Gerais, Uberaba, *Regnell* III-1261 in part (Holotype: Pl!, Isotype: US!).

DISTRIBUTION: Rocky fields, savanna, rare in the Atlantic Forest; 500–1000 m; terrestrial, rarely saxicolous. A5; B9vi; C5i; C8iii; C9ii; D7v; E3; E6ii; E7iii; E8iv, x; F4iv, v; F7iii; F8i, iii, v, ix, xi, xvi, xviii; G8vii, x, xii; G9xviii; H7xi; H8ix; I8. AM, AP, DF, GO, MG, MS, MT, PA, PB, RJ, RO, SP, TO.

BLOOMING: September to February peaking November. Fruit from March to May.

VOUCHER: Lagoa Santa, *Lombardi* 207 (BHCB, US).

Ananas bracteatus (Lindl.) Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1286. 1830.—*Ananassa bracteata* Lindl. Bot. Reg. 13: t. 1081. 1827. TYPE: *Lindley s.n.* (Holotype: CGE?).

DISTRIBUTION: Atlantic Forest; 300–750 m; terrestrial. G9vi, viii, ix; H8ix; H9ii. ES, MG, PR, RJ, RS, SC, SP.

BLOOMING: August to February.

VOUCHER: Manhuaçu, *Wendt* 318 (RB).

Ananas comosus (L.) Merr., Interpr. Rumph. Herb. Amboin. 133. 1917.—*Bromelia comosa* L. in Stickman, Herb. Amboin. 21. 1754. TYPE: Not yet selected.

DISTRIBUTION: Savanna, Atlantic Forest; 500–1000 m; terrestrial. F9viii. Cultivated at several localities.

BLOOMING: All year.

VOUCHER: Marliéria, *Heringer* 15058 (US).

Ananas nanus (L.B.Sm.) L.B.Sm., Bull. Bremeliad Soc. 12: 54. 1962.—*Ananas ananassoides* var. *nanus* L.B.Sm., Bot. Mus. Leafl. 7: 79. 1939. TYPE: Brazil—Paraíba, Baker *s.n.* (Holotype: GH).

DISTRIBUTION: Rocky fields, Atlantic Forest; 800–1000 m; terrestrial. E8ix. BA, MG, PA, PI.

BLOOMING: August to September.

VOUCHER: Santo Antônio do Itambé, *Versieux* 153 (RFA).

Andrea selloana (Baker) Mez in C. DC., Monogr. phan. 9: 114. 1896.—*Quesnelia selloana* Baker, Handb. Bromel. 87. 1889. Synonyms: *Nidularium selloanum* (Baker) E.Pereira & Leme, Bradea 4: 235. 1986. *Canistropsis selloana* (Baker) Leme, Canistropsis Brom. Mata Atl. 55. 1998. TYPE: Sellow 1414 (Holotype: B).

DISTRIBUTION: Rocky fields (gallery forest); 770–1700 m; saxicolous, terrestrial. F8ix, xvi, xvii; G8ii, x, xii. Endemic.

BLOOMING: August to February peaking January. Fruit in July.

VOUCHER: Conceição do Mato Dentro, *Versieux* 264 (SP).

Billbergia amoena (G.Lodd.) Lindl. var. *amoena*, Bot. Reg. 13: t. 1068. 1827.—*Tillandsia amoena* G.Lodd., Bot. Cab. 1: 76. 1818. TYPE: *Loddiges Hortus in Lindley s.n.* (Holotype: CGE).

DISTRIBUTION: Rocky fields, Atlantic Forest; 300–1650 m; saxicolous, epiphytic, terrestrial. E8ii, iv, x, xi; F8v, xvi, xvii, xix; G7ii; G8ii;

G9iii, xii, xvii, xviii; H10i; H8iii. BA, ES, MG, GO, RJ, SP, PR, SC.

BLOOMING: July to November.

VOUCHER: Diamantina, *Anderson* 8972 (HB, US).

Billbergia amoena var. *carnea* E.Pereira, Bradea 2: 32. 1975. TYPE: Brazil—Minas Gerais, Botumirim, A. Seidel 707 (Holotype: HB!).

DISTRIBUTION: Rocky fields; 1300 m; epiphytic, saxicolous. C8i, H7xii. Endemic.

BLOOMING: Between January to February.

VOUCHER: Botumirim, *Seidel* 707 (HB).

Billbergia amoena var. *minor* (Antoine & Beer) L.B.Sm., Arq. Bot. Estado São Paulo. 1: 104. 1943.—*Billbergia pyramidalis* var. *minor* Antoine & Beer ex Beer, Fam. Bromel. 108. 1857. TYPE: Berlin Hortus *s.n.* (Holotype: B?).

DISTRIBUTION: Rocky fields, Atlantic Forest; 1300–1720 m; saxicolous, terrestrial. F8iv. MG, RJ?

BLOOMING: April to July.

VOUCHER: Caeté, *Mota* 339 (BHCB).

Billbergia distachia (Vell.) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 417. 1892.—*Tillandsia distachia* Vell., Fl. Flum. 136. 1825. TYPE: Plate of Vellozo, Icon. 3: t. 141. 1831 (Smith & Downs 1979).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 700–1900 m; epiphytic, terrestrial. F7ii; F8iii, v, xi; G5iii; H7i, v, vi; H8vii, x; H9vii; I5i; I6i, ii; I7iii. MG, PR, RJ, SC, SP.

BLOOMING: Peaking September to October.

VOUCHER: Aiuruoca, *Tameirão-Neto* 2957 (BHCB, SEL).

Billbergia elegans Mart. ex Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1265. 1830. TYPE: Brazil—Minas Gerais, Ouro Preto, *Martius s.n.* (Holotype: M, SEL photo!, Isotype: B).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 900–1700 m; epiphytic, saxicolous, terrestrial. F7iii; F8iii, xi, xiv, xviii; G7i, iii, v; G8vii, viii, x; H7xi, xiii; H8iii. ES, MG.

BLOOMING: July to December peaking October.

VOUCHER: Belo Vale, *Versieux* 92 (RFA).

NOTE: The species can appear erroneously determined as *Billbergia minarum* or *B. sanderiana*.

Billbergia euphemiae E.Morren, Belgique Hort. 22: 11. 1872. TYPE: *Liège Hortus s.n.* (Holotype: LG).

DISTRIBUTION: Atlantic Forest, one occurrence for rocky fields; 340–1400 m; epiphytic, saxicolous. G7iii; G9iii, vi, xviii; Gg10i; H8ix, vi; H9ii, iv. **BA, ES, MG, RJ.**

BLOOMING: May to October peaking September.

VOUCHER: Araponga, *Paula* 1099 (VIC).

Billbergia horrida Regel, Ind. Sem. Hort. Petrop. 1856: 17. 1857. TYPE: *St. Petersburg Hortus s.n.* (Holotype: LE?).

DISTRIBUTION: Atlantic Forest; 300–1300 m; epiphytic. F9iii, iv; G8viii; G9vii, xviii; H8ix. **BA, ES, MG, RJ.**

BLOOMING: September to October.

VOUCHER: Caratinga, *Lombardi* 2354 (BHCB).

Billbergia iridifolia (Nees & Mart.) Lindl., Bot. Reg. 13: t. 1068. 1827.—*Bromelia iridifolia* Nees & Mart., Nova Acta. Acad. Phys.-Med. Caes. Leop.-Carol. German. Nat. Cur. 11: 16. 1823. TYPE: Brazil—Bahia, *Wied-Neuwied s.n.* (Holotype: BR).

DISTRIBUTION: Rocky fields, Atlantic Forest; 200–810 m; epiphytic, saxicolous. C9ii; C11ii; D10; E9i; F9viii; G8vi; G9x, xviii. **BA, ES, MG, RJ.**

BLOOMING: Mainly August.

VOUCHER: Marliéria, *Borba* 27 (BHCB).

Billbergia leptopoda L.B.Sm., Contr. Gray Herb. 154: 33. 1945. TYPE: Brazil—Minas Gerais, Governador Valadares, *M.B. Foster* 765. (Holotype: GH).

DISTRIBUTION: Atlantic Forest; 150–650 m; epiphytic, terrestrial. F9iii. **ES, MG.**

BLOOMING: March to May.

VOUCHER: Caratinga, *Paula* s.n. (BHCB 17821, US).

Billbergia lymanii E.Pereira & Leme, Bradea 4: 72. 1984. TYPE: Brazil—Espírito Santo, Domingos Martins, *R. Kautsky* 670 (Holotype: HB, Isotype: RB!).

DISTRIBUTION: Atlantic Forest; 1000–1600 m; epiphytic. G9ii, iii, xiii, xiv. **ES, MG, RJ.**

BLOOMING: March to July.

VOUCHER: Fervedouro, *Leme* 2760 fl. cult. (HB).

Billbergia macrocalyx Hook. f., Bot. Mag. 85: t. 5114. 1859. TYPE: Brazil—Bahia, *Wetherell, Kew Hortus s.n.* (“Clonotype”: LG, NY).

DISTRIBUTION: habitat, elevation, and habit unknown. F8iii?. **BA, MG?**

BLOOMING: Unknown.

VOUCHER: Belo Horizonte, *Foster* 542 fl. cult. (US).

NOTE: Doubtful occurrence for MG.

Billbergia meyeri Mez, Bot. Jahrb. 30: 148. 1902. TYPE: Brazil—Mato Grosso, *Pilger* 705 (Holotype: B).

DISTRIBUTION: Savanna; 300–770 m; epiphytic. D5i, E2ii, F4i. **MG, MT, RO, SP.**

BLOOMING: March to August.

VOUCHER: Ituiutaba, *Macedo* 3223 (US).

Billbergia minarum L.B.Sm., Smithsonian Misc. Collect. 126: 22. 1955. TYPE: Brazil—Minas Gerais, Governador Valadares, *M.B. Foster* 766 (Holotype: GH).

DISTRIBUTION: Atlantic Forest; 600–730 m; epiphytic, terrestrial. H8ix, x. **ES, MG.**

BLOOMING: July to September.

VOUCHER: Juiz de Fora, *Krieger* 9143 (RB, CESJ).

Billbergia nutans H.Wendl. ex Regel, Gartenflora 18: 162, t. 617. 1869. TYPE: *Herrenhaunsen hortus s.n.* LE?.

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 640–1000 m; epiphytic. F8xviii, G5iii, G9xviii. **MG, PR, SC.**

BLOOMING: August.

VOUCHER: Santana do Riacho, *Vidal* s.n. (R 190241).

Billbergia pohliana Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 403. 1892. TYPE: Brazil—Minas Gerais, *Pohl* 5508 (Holotype: W lost).

DISTRIBUTION: Atlantic Forest; ca. 480 m; habitat unknown. H8vi. Endemic.

BLOOMING: June.

VOUCHER: Coronel Pacheco, *Heringer* 1919 (SP).

Billbergia porteana Brongn. ex Beer, Fam. Bromel. 115. 1857. TYPE: Brazil—Bahia, *Morel in Paris Hortus s.n.* (Holotype: P?).

DISTRIBUTION: Rocky fields, savanna; 550–1200 m; epiphytic, saxicolous. C8iv; E7ii; E8iv; F7iii; F8iii, v. **BA, CE, DF, ES, MG, MT, PB, PI, SP.**

BLOOMING: August to April peaking September.

VOUCHER: Belo Horizonte, *Magalhães* s.n. (HB 33835).

Billbergia richardtii Wawra, Oesterr. Bot. Z., 30: 115. 1880. TYPE: Brazil—Minas Gerais, Juiz de Fora, *Wawra II-197* (Holotype: W lost). Brazil, Minas Gerais, de Juiz de Fora para a serra da Mantiqueira, *Warming* 2172 (Neotype: C).

DISTRIBUTION: Atlantic Forest; 480–700 m; epiphytic. H8iv, ix. ES, MG.

BLOOMING: June to July.

VOUCHER: Coronel Pacheco, *Gomes* 62 (HB, RFA).

Billbergia sanderiana E.Morren, Belgique Hort. 34: 17. 1884. TYPE: Brazil—Rio de Janeiro, *Sander* 1 (Holotype: LG).

DISTRIBUTION: Atlantic Forest; ca. 270 m; epiphytic. G9xvii. **ES, MG, RJ.**

BLOOMING: Unknown. Fruit in July.

VOUCHER: Tombos, *Leitman* 181 (RB).

NOTE: Two specimens, *Duarte* 9025 (RB), and *Irwin* 19808 (MBM, R), cited under this name by Smith & Downs (1979) are identified here as *Billbergia elegans*.

Billbergia saundersii W.Bull, Gard. Chron. n.s. 1: 78. 1874. Synonyms: *Billbergia chlorosticta* Saunders, Gard. Chron. 1425. 1871. *Billbergia fosteriana* L.B.Sm., Smithsonian Misc. Collect. 126(1): 21. 1955. *Billbergia debilis* E.Pereira, Bradea 1(25): 279. 1972. NEOTYPE: Plate 106 Floral Magazine n.s. 1874, designated by Read & Philcox (1985).

DISTRIBUTION: Atlantic Forest; ca. 270 m; saxicolous. G9xvii. **BA, MG.**

BLOOMING: July.

VOUCHER: Tombos, *Leitman* 166 (RB).

Billbergia tweedieana Baker, Handb. Bromel. 73. 1889. TYPE: Brazil—Rio de Janeiro, *Tweedie* 1313 (Holotype: K).

DISTRIBUTION: Atlantic Forest; 400–650 m; epiphytic. G9iv, xviii; H8vi. **ES, MG, RJ.**

BLOOMING: October.

VOUCHER: Carangola, *Leoni* 464 (RB).

Billbergia vittata Brongn., Portef. Hort. 2: 353. 1848. TYPE: *Morel* Hortus s.n. (“Clonotype”: P!).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 520–2000 m; epiphytic, saxicolous, terrestrial. E8iii, iv, vii, ix, xi; F8iii, v, ix, xiii, xvi, xviii; G8ii, viii; G9iii, vi; G10i; H8ii. **ES, MG, RJ.**

BLOOMING: Peaking March to May.

VOUCHER: Catas Altas, *Vasconcelos* s.n. (BHCB 32042, 53705).

Billbergia zebrina (Herb.) Lindl., Bot Reg. 13: t. 1068.—*Bromelia zebrina* Herb., Bot. Mag. 53: t. 2686. 1826. TYPE: *Lindley* Hortus s.n. (“Clonotype”: K).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 200–1100 m; epiphytic. C9ii; D10; E8iv;

F7iii; F8ix, xviii; G8vi, xi; G9iv, xi; H8iii, vi; H9ii, vi. **MG, PR, RJ, RS, SC, SP.**

BLOOMING: September to February.

VOUCHER: Diamantina, *Forzza* 659 (SPF).

Bromelia antiacantha Bertol., Virid. Bonon. Veg. 4. 1824. TYPE: Original description and plate.

DISTRIBUTION: Atlantic Forest; 400–1040 m; terrestrial. F8vi; G9iii, iv, ix. **MG, PR, RJ, RS, SC, SP.**

BLOOMING: December.

VOUCHER: Manhuaçu, *Wendt* 319 (RB).

Bromelia balansae Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 191. 1891. TYPE: Paraguay, *Balansa* 608 (Holotype: G).

DISTRIBUTION: Rocky fields, savanna; 480–1100 m; terrestrial. B7i; B9iii; C10iv; D7v; D8i, ii; E6ii; E7ii; E8vii, x; F7iii; F8ix, xi, xiv, xviii; G5ii. AM, DF, **GO, MG, MT, PA, PR, SC, SP, RS.**

BLOOMING: August to February peaking October. Fruit from March to May.

VOUCHER: Bocaiúva, *Azevedo* s.n. (BHCB 49485).

Bromelia glaziovii Mez, Bot. Jahrb. Syst. 30(67): 1. 1901. TYPE: Brazil—Goiás, Campos do Rio Gama, *Glaziou* 22189 (Holotype: B!).

DISTRIBUTION: Savanna; 640–820 m; terrestrial. C8iv, G5v. **DF, GO, MG.**

BLOOMING: September.

VOUCHER: Montes Claros, *Castellanos* 24425 (US).

Bromelia interior L.B.Sm., Smithsonian Misc. Collect. 126: 23. 1955. TYPE: Brazil—Goiás, Quintas, A. *Macedo* 3260 (Holotype: US!).

DISTRIBUTION: Savanna; 540–830 m; terrestrial. B7i, E2ii, G5iii. **AM, GO, MG, MT.**

BLOOMING: October.

VOUCHER: Januária, *Lombardi* 2055, 2065 (BHCB).

Bromelia regnellii Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 194. 1891. TYPE: Brazil—Minas Gerais, Caldas, *Regnell* II-285 (Holotype: B!, Isotypes: S, US!).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 700–1100 m; terrestrial. E8iv, F8iii, H5i. **BA, DF, GO, MA, MG, MT, PA, RO, SP.**

BLOOMING: November.

VOUCHER: Caldas, *Regnell* II-285 (US).

Bromelia serra Griseb., Symb. Argent. in

Goett. Abh. 24: 328. 1879. TYPE: Argentina, *Lorentz s.n.* (Lectotype: GOET).

DISTRIBUTION: Rocky fields, savanna; 700–1250 m; terrestrial. C9ii, E7vi, F4iv, G7iii. DF, GO, MG.

BLOOMING: November.

VOUCHER: Brumadinho, *Hatschbach* 27744 (MBM, US).

Bromelia villosa Mez, Bot. Jahrb. Syst. 30(67): 3. 1901. TYPE: Brazil—Goiás, *Glaziou 22191* (Holotype: B).

DISTRIBUTION: Savanna; ca. 560 m; terrestrial. E2i. GO, MG, MT.

BLOOMING: July.

VOUCHER: Capinópolis, *Macedo* 4957 (US).

Canistrum auratum Leme, Pabstia 4(3): 2. 1993. TYPE: Brazil—Minas Gerais, Manhuaçu, E.M.C. Leme 1679 fl. cult. (Holotype: HB!), Isotypes: RB!, SEL!.

DISTRIBUTION: Atlantic Forest, 700–900 m, epiphytic. C11ii, G9ix. BA, MG.

BLOOMING: August to October.

VOUCHER: Santa Maria do Salto, *Salino* 9214 (BHCB).

Cryptanthus caracensis Leme & E. Gross, J. Bromeliad Soc. 7(4): 12. 1992. TYPE: Brazil—Minas Gerais, Santa Bárbara, E.M.C. Leme 1853 (Holotype: HB!). *Ibidem*, E.M.C. Leme 1544 (Paratypes: HB!, HEID).

DISTRIBUTION: Rocky fields; 1200–1600 m; saxicolous. F8ii, xvi, G8ii. Endemic.

BLOOMING: February to March. Fruit in July.

VOUCHER: Catas Altas, *Mota* 1870 (BHCB).

Cryptanthus glaziovii Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 202. 1891. TYPE: Brazil—Minas Gerais, Caraça, *Glaziou* 15672a (Holotype: B!, Isotype: P).

DISTRIBUTION: Rocky fields; 1000–1600 m; saxicolous. F8xvi. Endemic.

BLOOMING: February to March.

VOUCHER: Santa Bárbara, *Magalhães* 2693 (BHCB).

NOTE: The spelling “*glazioui*” is not concordant with article 60.7 of the ICBN (Greuter et al. 2000).

Cryptanthus leopoldo-horstii Rauh, Trop. Subtrop. Pflanzenwelt 65: 68. 1988. TYPE: Brazil—Minas Gerais, Diamantina, W. Rauh 67221 (Holotype: HEID).

DISTRIBUTION: Rocky fields; 1000–1250 m; saxicolous, terrestrial. E8iv, v. Endemic.

BLOOMING: November to January.

VOUCHER: Gouvea, *Hatschbach* 29079 (MBM, US).

NOTE: It can appear erroneously determined as *C. schwackeanus*.

Cryptanthus minarum L.B.Sm., Smithsonian Misc. Collect. 126: 24. 1955. TYPE: Brazil—Minas Gerais, pico de Itabira, A.M. Matos s.n. (Holotype: R!, Isotype: US!).

DISTRIBUTION: Rocky fields, Atlantic Forest?; 100–1500 m?; terrestrial. F8vii, F10iii?. Endemic.

BLOOMING: June to July.

VOUCHERS: Itabira, *Matos s.n.* (R 46186, US). Itueta, *Tameirão-Neto* 2430 (BHCB) “aff.”.

NOTE: *Cryptanthus minarum* until recently was known only from the type collection. The type locality (pico de Itabira) has been totally altered by iron ore mining. The second collection presented above, which closely resembles the type specimen, is identified here as *Cryptanthus* aff. *minarum*, because it presents smaller flowers, and sepals connate for ca. 7 mm (vs. 4 mm).

Cryptanthus schwackeanus Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 203. 1891. TYPE: Brazil—Minas Gerais, Itabira, pico de Itabira do Campo, *Glaziou* 17823 (Lectotype: B!, Isolectotype: P!).

DISTRIBUTION: Rocky fields; 600–2000 m; saxicolous. F8iii, iv, v, vii; G8ii, vii, viii, x; H7xi, xiii. Endemic.

BLOOMING: December to February. Fruit between April to July.

VOUCHER: Itabirito, *Krieger* 21106 (BHCB, CESJ, SPF).

Cryptanthus warasii E.Pereira, Bradea 2(36): 252. 1978. TYPE: Brazil—Minas Gerais, Diamantina, *E. Waras* s.n. (Holotype: HB!, Isotypes: US!, K, MBM).

DISTRIBUTION: Rocky fields; ca. 1100 m; saxicolous. E8iv. Endemic.

BLOOMING: August.

VOUCHER: Diamantina, *Waras* s.n. (HB 66022, US).

Dyckia argentea Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 492. 1894. TYPE: Brazil—Minas Gerais, *Glaziou* 17280a (Holotype: B).

DISTRIBUTION: Rocky fields; 1300–1400 m; saxicolous. H7xiii. Endemic.

BLOOMING: February.

VOUCHER: Tiradentes, *Brina* s.n. (BHCB 39550).

Dyckia brachyphylla L.B.Sm., Phytologia 19: 282. 1970. TYPE: Brazil—Minas Gerais, Diamantina, *H.S. Irwin* 22383 (Holotype: US!, Isotypes: NY!, SP!, Z!).

DISTRIBUTION: Rocky fields; 800–1300 m; saxicolous, terrestrial. D8ii; E8i, iii, iv, vi, xi. Endemic.

BLOOMING: February.

VOUCHER: Diamantina, *Hatschbach* 31702 (MBM, US).

NOTE: This species is usually confused with *Dyckia macedoi*.

Dyckia bracteata (Wittm.) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 470. 1894.—*Dyckia dissitiflora* var. *bracteata* Wittm., Bot. Jahrb. Syst. 13 (29): 16. 1891. TYPE: Brazil—Minas Gerais, serra do Ouro Branco, Schenck 3510 (Lectotype: B!).

DISTRIBUTION: High altitude grassland, rocky fields; 1000–2500 m; saxicolous, terrestrial. E8iv; G8ii, ix, x; G10i, ii. Endemic.

BLOOMING: August to November.

VOUCHER: Catas Altas, *Vasconcelos* s.n. (BHCB 49224, 52688).

NOTE: This species can be misidentified as *Dyckia reitzii* or *D. minarum*.

Dyckia brevifolia Baker in Saunders, Refug. bot. 4: t. 236. 1871. TYPE: Original description and plate.

DISTRIBUTION: Rocky fields, savanna; ca. 1300 m; saxicolous. H7xii. MG, RJ, SC, SP.

BLOOMING: October to November.

VOUCHER: São Tomé das Letras, *Mello-Silva* s.n. (SPF 37843).

NOTE: *Dyckia brevifolia* usually grows close to rivers or watercourses in southern Brazil (Reitz 1983). The two specimens found for MG may be an undescribed or overlooked species.

Dyckia cinerea Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 469. 1894. TYPE: Brazil—Glaziou 18570 (Holotype: B!, Isotype: K).

DISTRIBUTION: High altitude grassland, rocky fields; 900–1700 m; saxicolous. F8xvi, xix; G8viii, x; G9i, iii, vii; G10ii. Endemic.

BLOOMING: April to May.

VOUCHER: Mariana, Goldschmidt 42 (SPF, VIC).

Dyckia consimilis Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 479. 1894. TYPE: Brazil—Minas Gerais, Weddel 1407 (Lectotype: P!).

DISTRIBUTION: Rocky fields; 900–1600 m; saxicolous, terrestrial. F8iii, xiv; G7iii, v; G8viii. Endemic.

BLOOMING: August to January.

VOUCHER: Moeda, *Grandi* s.n. (BHCB 16908, BHZB 1081).

NOTE: It can be misdetermined as *Dyckia macedoi*, *D. saxatilis*, and *D. schwackeana* in herbaria. Mez (1894) cited two syntypes. Smith and Downs (1974) chose Weddel 1407 as lectotype.

Dyckia densiflora Schult. & Schult. f. in Roem.

& Schult., Syst. veg. 7(2): 1194. 1830.

TYPE: Brazil—Minas Gerais, Ouro Preto, *Martius* s.n. (Holotype: M).

DISTRIBUTION: Rocky fields; 1000–1800 m; saxicolous. F8iii, iv, xvi; G8x. Endemic.

BLOOMING: October to April.

VOUCHER: Ouro Preto, *Vasconcelos* s.n. (BHCB 52435).

Dyckia dissitiflora Schult. & Schult. f. in Roem.

& Schult., Syst. Veg. 7(2): 1194. 1830.

TYPE: Brazil—Bahia, *Martius* s.n. (Holotype: M).

DISTRIBUTION: Rocky fields, savanna; 550–1300 m; saxicolous, terrestrial. C8iv, E7vi, E8v, F8iii, I7v. BA, MG, PI.

BLOOMING: September to November.

VOUCHER: Montes Claros, *Castellanos* 24294 (HB, US).

Dyckia elata Mez in C. DC., Monogr. phan. 9:

508. 1896. TYPE: Brazil—Minas Gerais, Ouro Preto, serra de Antônio Pereira, Schawcke 8739 (Holotype: B!).

DISTRIBUTION: Rocky fields; ca. 1200 m; terrestrial. G8x. Endemic.

BLOOMING: October to December.

VOUCHER: Ouro Preto, *Silveira* 2275 (R).

Dyckia glandulosa L.B.Sm. & Reitz, Phytologia 14: 484. 1967. TYPE: Brazil—Minas Gerais, Itambé, G.M. Magalhães 18959

(Holotype: HBR!, Isotypes: US!, NY!).

DISTRIBUTION: Rocky fields; ca. 1500 m; saxicolous. E8ix. Endemic.

BLOOMING: March.

NOTE: Only known from the type collection.

Dyckia goehringii Rauh, Trop. Subtrop. Pflanzenwelt. 75: 12. 1991. TYPE: Brazil—Minas Gerais, Diamantina, W. Rauh 67622 fl. cult.

(Holotype: HB!).

DISTRIBUTION: Rocky fields; ca. 1300 m; saxicolous, terrestrial. E8iv. Endemic.

BLOOMING: Unknown.

NOTE: Only known from the type collection.

Dyckia granmogulensis Rauh, Trop. Subtrop.

Pflanzenwelt 65: 11. 1988. TYPE: Brazil—Minas Gerais, Grão Mogol, Milagro, W. Rauh 56484 (Holotype: HEID).

DISTRIBUTION: Rocky fields; ca. 1000 m; saxicolous. C8i, C9ii. Endemic.

BLOOMING: Unknown.
 VOUCHER: Botumirim, *Rapini* 762 (SPF)
 "cf.".

Dyckia lagoensis Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 483. 1894.
 TYPE: Brazil—Minas Gerais, Lagoa Santa, Warming 2171 (Holotype: C).

DISTRIBUTION: Savanna; 730–1200 m; terrestrial, saxicolous, epiphytic?. E6ii, F4iv, F7iii, G5v, H7ix, H8ii. Endemic.

BLOOMING: August to April.

VOUCHER: Paraopeba, *Heringer* s.n. (HB 32882, 32887).

Dyckia leptostachya Baker, Gard. Chron. 1884(2): 198. 1884. TYPE: Brazil—Paraná, Kew Hortus s.n. (Holotype: K).

DISTRIBUTION: Savanna; 440–560 m; terrestrial. E2ii, B9iv. MG, MT, PR, SC, RS.

BLOOMING: September to October.

VOUCHER: Ituutaba, *Macedo* 11, 1242 (US).

NOTE: Without any new record during the last 50 years.

Dyckia linearifolia Baker, Handb. Bromel. 131. 1889. TYPE: Brazil—Minas Gerais, Saint-Hilaire 1010 (Holotype: P!).

DISTRIBUTION: Savanna; 500–900 m; terrestrial. F3, I5iii. MG, SP.

BLOOMING: September to October.

VOUCHER: Ouro Fino, *Forzza* 114 (SPF).

Dyckia macedoi L.B.Sm., Arq. Bot Estado São Paulo 2: 195. 1952. TYPE: Brazil—Minas Gerais, serra do Cipó, A. Macedo 2974 (Holotype: US!).

DISTRIBUTION: Rocky fields; 800–1100 m; saxicolous, terrestrial. E8iv; F8v, ix, xi, xviii. Endemic.

BLOOMING: October to April. Fruit from August to October.

VOUCHER: Santana do Riacho, *Arrais* CFSC 9170 (RB, SPF).

Dyckia macropoda L.B.Sm., Phytologia 14: 485. 1967. TYPE: Brazil—Minas Gerais, Di-amantina, rio das Pedras, E. Pereira 1622 in part (Holotype: RB!, Isotype: US!).

DISTRIBUTION: Rocky fields; ca. 1100 m; terrestrial. E8iv. Endemic.

BLOOMING: May to June.

NOTE: Only known from the type collection.

Dyckia marnier-lapostollei L.B.Sm., Bull. Bro-meliad Soc. 16: 102. 1966. TYPE: Brazil—Minas Gerais?, *Marnier-Lapostolle* s.n. (Holotype: US!).

DISTRIBUTION: Savanna; 965 m; saxicolous.

E4. GO, MG.

BLOOMING: Unknown.

VOUCHER: Patrocínio, *Irwin* 25819 (US).

Dyckia mello-barretoi L.B.Sm., Phytologia 7: 109. 1960. TYPE: Brazil—Minas Gerais, es-trada de Conceição do Mato Dentro, ponte Santo Antônio, H.L. Mello-Barreto 2122 (Holotype: BHCB!, Isotype: US!).

DISTRIBUTION: Rocky fields; 800–1300 m; saxicolous, terrestrial. E7v; F8v, xviii. Endemic.

BLOOMING: August to February.

VOUCHER: Conceição do Mato Dentro, *Mello-Barreto* 2122 (BHCB, US).

Dyckia minarum Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 483. 1894. TYPE: Brazil—Minas Gerais, Caldas, *Reg-nell* II-283. (Lectotype: S, Isolectotypes: NY!, R!, US!).

DISTRIBUTION: Rocky fields, savanna; 630–1400 m; saxicolous, terrestrial. E4; E7ii, iii, vi; E8iv, v; F4ii, iv, v; F8iii, iv; G5v; G7iii; G8viii; H5i, iii; H6iv; H7v. GO, MG, SC, SP.

BLOOMING: Peaking October to November.

VOUCHER: Iraí de Minas, *Teixeira* s.n. (BHCB 27780).

Dyckia monticola L.B.Sm. & Reitz, Sellowia 14: 104. 1962. TYPE: Brazil—Santa Catari-na, Campo Alegre, morro do Iquererim, R. Reitz 4789 (Holotype: US!, Isotype: HBR).

DISTRIBUTION: Savanna; ca. 1250 m; saxico-lous. MG, SC.

BLOOMING: June.

VOUCHER: São Tomé das Letras, *Pabst* 4258 (HB).

Dyckia orobanchoides Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 475. 1894. TYPE: Brazil—Minas Gerais, *Tamberlick* s.n. (Lectotype: B!).

DISTRIBUTION: Habitat, elevation, and habit unknown. Endemic.

BLOOMING: Unknown.

NOTE: Only known from a fragmented isotype collection.

Dyckia pectinata L.B.Sm. & Reitz, Phytologia 14: 486. 1967. TYPE: Brazil—Minas Gerais, between Conceição do Rio Verde e Cam-buquira, G.F.J. Pabst 4129. (Holotype: HBR!, Isotype: US!).

DISTRIBUTION: Savanna; 850–950 m; saxico-lous. H6i, ii. Endemic.

BLOOMING: June, February.

VOUCHER: Cambuquira, *Davidae* 10658a (SP, US).

Dyckia princeps Lem., Jard. Fleur. 3: t. 224, 225. 1853. TYPE: Original description and plate.

DISTRIBUTION: Habitat, elevation, and habit unknown. Endemic.

BLOOMING: Unknown.

VOUCHER: Rio Preto, *Grandi* 2682 (BHCB). "cf."

Dyckia rariflora Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1195. 1830. TYPE: Brazil—Minas Gerais, Ouro Preto, *Martius s.n.* (Holotype: M).

DISTRIBUTION: Rocky fields, savanna; 800–1200 m; saxicolous, terrestrial. E8iv; F8iii, xviii, G8vii. Endemic.

VOUCHER: Itabirito, *Teixeira s.n.* (BHCB 26146).

Dyckia remotiflora Otto & A. Dietr., Allg. Gartenzeitung 1: 129. 1833. TYPE: Brazil—*Sellow s.n. in Berlin Hortus* (Holotype: B!, Isotype: K).

DISTRIBUTION: Rocky fields, savanna; 540–1400 m; saxicolous, terrestrial. E2ii, G5iv, G7iii. MG, PR, RS, SP.

BLOOMING: July to October.

VOUCHER: Brumadinho, *Martsen* 104 (BHCB).

Dyckia saxatilis Mez in C. DC., Monogr. phan. 9: 518. 1896. Synonyms: *Dyckia hilaireana* Mez in C. DC., Monogr. phan. 9: 530. 1896. *Dyckia oligantha* L.B.Sm., Arq. Jard. Bot. Rio de Janeiro. 15: 329. 1958. *Dyckia oligantha* var. *cristallina* Rauh, Trop. Subtrop. Pflanzenwelt 65: 17. 1988. TYPE: Brazil—Minas Gerais, Ouro Preto, serra de Caçoeira do Campo, W. Schwacke 8948 (Holotype: B!).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 330–1500 m; saxicolous, terrestrial. D10; D7iii; D8ii; E7vi; E8i, iv, v, vi, xi; F7iii, iv; F8iii, iv, v, ix, xiv, xviii; G7iii; G8ii, x; H7xii. BA, MG, MT, GO.

BLOOMING: October to January.

VOUCHER: Santana do Riacho, *Duarte* 2674 (RB, US).

Dyckia schwackeana Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 478. 1894. TYPE: Brazil—Minas Gerais, Itabira, pico de Itabira do Campo, W. Schwacke 5857 (Holotype: B, Isotype: P!).

DISTRIBUTION: Rocky fields, 1100–1500 m, saxicolous. F8iii, vii, xiv. Endemic.

BLOOMING: July to December.

VOUCHER: Nova Lima, *Tameirão-Neto* 3399 (BHCB).

Dyckia simulans L.B.Sm., Arq. Bot. Estado São Paulo 1: 108. 1943. TYPE: Brazil—Minas Gerais, Caeté, serra da Piedade, M.B. Foster 570 (Holotype: GH, Isotype: SP!).

DISTRIBUTION: Rocky fields; 1100–1650 m; saxicolous, terrestrial. F8iv, G7v, G8xii. Endemic.

BLOOMING: November to May.

VOUCHER: Moeda, *Grandi s.n.* (BHZB 192).

Dyckia sordida Baker, Handb. Bromel. 132. 1889. Synonym: *Dyckia duarteana* L.B. Sm., Phytologia 14: 480. 1967. TYPE: Brazil—Minas Gerais, *Saint-Hilaire* 402 (Holotype: P!).

DISTRIBUTION: Rocky fields; 1050–2200 m; saxicolous, terrestrial. E8ix; F8v, ix, xvi, xviii; G8ii, viii. Endemic.

BLOOMING: Peaking October to February.

VOUCHER: Santana do Riacho, *Duarte* 2106 (RB, US).

Dyckia sp. 1.

DISTRIBUTION: Rocky fields; 800–1300 m; saxicolous, terrestrial. F8ii, xvi; G8ii, viii, x. Endemic.

BLOOMING: Peaking September. Fruit collected all year long.

VOUCHER: Barão de Cocais, *Marques-Leitão s.n.* (BHCB 45741, SPF).

Dyckia sp. 2.

DISTRIBUTION: Rocky fields; ca. 1400–2250 m; saxicolous. E8vii, ix. Endemic.

BLOOMING: August to February.

VOUCHER: Rio Vermelho, *Fiaschi* 418 (SPF).

Dyckia sp. 3.

DISTRIBUTION: Rocky fields; ca. 720 m; saxicolous, terrestrial. H8x. Endemic.

BLOOMING: August and October.

VOUCHER: Lima Duarte, *Sousa s.n.* (BHCB 13728).

Dyckia sp. 4.

DISTRIBUTION: Rocky fields; 1100 m; terrestrial. E8iv. Endemic.

BLOOMING: November.

VOUCHER: Diamantina, *Stehmann s.n.* (BHCB 20778).

Dyckia sp. 5.

DISTRIBUTION: Rocky fields; > 1000 m?; saxicolous, terrestrial. G8ix. Endemic.

BLOOMING: March to April.

VOUCHER: Ouro Branco, *Paula s.n.* (VIC 27394).

NOTE: This taxon has often been identified as

Dyckia tenebrosa, but appears to be a microendemic undescribed species of the Ouro Branco mountain range.

Dyckia spinulosa L.B.Sm. & Reitz, Phytologia 14: 486. 1967. TYPE: Brazil—Minas Gerais, Várzea da Palma, fazenda Mãe d'Água, A.P. Duarte 7409 (Holotype: HBR!, Iso-types: RB!, US!).

DISTRIBUTION: Savanna; ca. 515 m; saxicolous. D7vi. Endemic.

BLOOMING: November.

NOTE: Only known from the type collection.

Dyckia tenebrosa Leme & H.Luther, Selbyana 19(2): 183. 1999. TYPE: Brazil—Minas Gerais, estrada de Tombador para Andrequicé, serra de Andrequicé, E.M.C. Leme 2895 (Holotype: HB!). Próximo à Diamantina, H.E.Luther s.n. fl. cult. (Paratype: SEL 76701!).

DISTRIBUTION: Rocky fields; 1000–1300 m; terrestrial. E8iv. Endemic.

BLOOMING: January.

NOTE: Only known from the type collections.

Dyckia trichostachya Baker, Handb. Bromel. 133. 1889. TYPE: Brazil—Minas Gerais, Sellow Brom. Paris 59. (Holotype: P!).

DISTRIBUTION: Rocky fields; 900–1850 m; saxicolous, terrestrial. F8xvi, G7iii, G8x. Endemic.

BLOOMING: February to June. Fruit from May to September.

VOUCHER: Santa Bárbara, Kawasaki 988 (SPF).

Dyckia tuberosa (Vell.) Beer, Fam. Bromel. 157. 1857.—*Tillandsia tuberosa* Vell., Fl. Plumb. 135. 1825. TYPE: Original illustration of Vellozo, Icon. 3. t. 136. 1835. (Smith & Downs 1974).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 330–1300 m; terrestrial. D10, G5iii, H7xii. MG, PR, SC, SP.

BLOOMING: June to November.

VOUCHER: Carmo do Rio Claro, Mello-Filho 628 (R).

Dyckia ursina L.B.Sm., Arq. Bot. Estado São Paulo 1: 109. 1943. TYPE: Brazil—Minas Gerais, Jaboticatubas, serra do Cipó, M.B. Foster 636 (Holotype: GH, Isotype: SP!).

DISTRIBUTION: Rocky fields; 800–1300 m; saxicolous, terrestrial. F8ix, xviii. Endemic.

BLOOMING: April to July. Fruit from September to March.

VOUCHER: Santana do Riacho, Mello-Silva 1086 (SPF).

Dyckia warmingii Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 481. 1894. TYPE: Brazil—Minas Gerais, Lagoa Santa, Warming s.n. (Holotype: C).

DISTRIBUTION: Savanna; ca. 760 m; terrestrial. F8xi. Endemic.

BLOOMING: Unknown. Fruit in November.

VOUCHER: Lagoa Santa, Hoehne 6363 (R). “cf.”

Dyckia weddelliana Baker, Handb. Bromel. 132. 1889. TYPE: Brazil—Weddell 2584 (Holotype: P!).

DISTRIBUTION: Savanna; 540–1600 m; saxicolous. E2ii. Endemic.

BLOOMING: January to June. Fruit in July.

VOUCHER: Ituiutaba, Macedo 1673 (SPF, US).

NOTE: This name has been applied erroneously to specimens of *Dyckia cinerea*.

Edmundoa lindenii var. *rosea* (E.Morren) Leme, Canistrum Bromel. Mata Atl. 50. 1997.—*Canistrum roseum* E.Morren, Belgique Hort. 29: 301. 1879. Synonyms: *Canistrum blockii* hortus ex Chevalier, Bull. Mens. Soc. Nat. Hort. France 4: 692. 1931. *Canistrum lindenii* var. *roseum* (E.Morren) L.B.Sm., Anais Bot. Herb. “Barbosa Rodrigues” 2: 14. 1950. *Canistrum lindenii* var. *roseum* f. *exiguum* Reitz, Anais Bot. Herb. “Barbosa Rodrigues” 2: 38. 1950. *Canistrum lindenii* var. *roseum* f. *humile* Reitz, Anais Bot. Herb. “Barbosa Rodrigues” 4: 19. 1952. *Canistrum lindenii* var. *roseum* f. *procerum* Reitz, Anais Bot. Herb. “Barbosa Rodrigues” 4: 19. 1952. TYPE: Comte de Germiny s.n. (Lectotype: LG).

DISTRIBUTION: Atlantic Forest; ca. 1200 m; saxicolous. G9vii. ES, MG, PR, RJ, RS, SC, SP.

BLOOMING: March.

VOUCHER: Fervedouro, Paula 1023 (VIC).

Encholirium belemii L.B.Sm. & Read, Bradea 5(27): 229. 1989. TYPE: Brazil—Minas Gerais, próximo à BR 4, R.P. Belém 3797 (Holotype: US!, Isotype: NY!).

DISTRIBUTION: Atlantic Forest; elevation unknown; saxicolous, D10?. Endemic.

BLOOMING: June.

NOTE: Doubtful species only known from the type collection.

Encholirium biflorum (Mez) Forzza, Bol. Bot. Univ. São Paulo 23(1): 16. 2005.—*Dyckia biflora* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 486. 1894. TYPE: Brazil—Minas Gerais, without locality, Glaziou 19919 (Holotype: B!).

DISTRIBUTION: Rocky fields; ca. 1100 m; saxicolous, terrestrial. E8iv. Endemic.

BLOOMING: October to January. Fruit in January.

VOUCHER: Diamantina, *Forzza 1466* (BHCB, MBM, SPF).

Encholirium bradeanum L.B.Sm., Smithsonian Misc. Collect. 126: 26. 1955. TYPE: Brazil—Minas Gerais, região de Diamantina, *L.B. Smith 5652* fl. cult. (Holotype: US!, Isotype: RB not found).

DISTRIBUTION: Habitat, elevation, and habit unknown. E8iv. Endemic.

BLOOMING: Unknown.

NOTE: Only known from the type collection.

Encholirium gracile L.B.Sm., Phytologia 16(2): 69. 1968. TYPE: Brazil—Minas Gerais, rodovia Nanuque—Teófilo Otoni, *R.P. Belém 1620* (Holotype: US!, Isotypes: CEPEC, NY!, UB).

DISTRIBUTION: Atlantic Forest; saxicolous. ES, MG.

BLOOMING: July to August.

NOTE: It is only known for MG from the type collection.

Encholirium heloisae (L.B.Sm.) Forzza & Wand., Bol. Bot. Univ. São Paulo 17: 264. 1998.—*Dyckia heloisae* L.B.Sm., Smithsonian Misc. Collect. 126: 26. 1955. Synonym: *Encholirium sazimae* Rauh, Trop. Subtrop. Planzenwelt 60: 99. 1987. TYPE: Brazil—Minas Gerais, Jaboticatubas, serra do Cipó, *L.B. Smith 6698*. (Holotype: US!, Isotypes: R!, NY!).

DISTRIBUTION: Rocky fields; 1000–1300 m; saxicolous, terrestrial. F8ix, xviii. Endemic.

BLOOMING: January to February.

VOUCHER: Jaboticatubas, *Hatschbach 28785* (HB, MBM, US).

Encholirium horridum L.B.Sm., Contr. Gray Herb. 129: 32. 1940. TYPE: Brazil—Espírito Santo, *M.B. Foster 193* (Holotype: GH).

DISTRIBUTION: Atlantic Forest; ca. 160 m; saxicolous. D11i. ES, MG, RJ?.

BLOOMING: July.

VOUCHER: Carlos Chagas, *Forzza 923* (BHCB, SPF).

Encholirium irwinii L.B.Sm., Phytologia 19: 284. 1970. TYPE: Brazil—Minas Gerais, ca. 10 km oeste de Grão Mogol, rio Itacamburuçu, *H.S. Irwin 23573* (Holotype: US!, Isotype: NY!).

DISTRIBUTION: Rocky fields; 650–900 m; saxicolous. C9ii. Endemic.

BLOOMING: September to February. Fruit from November to May.

VOUCHER: Grão-Mogol, *Pirani CFCR 13263* (MBM, SPF).

Encholirium longiflorum Leme, Selbyana 16(1): 110. 1995. TYPE: Brazil—Minas Gerais, Jaíba, serra Azul, *M.C.B. Teixeira 380* (Holotype: MBM!, Isotype: HB!, HXBH?).

DISTRIBUTION: Caatinga, savanna; 450–500 m; saxicolous. B7ii, B8i. BA, MG.

BLOOMING: October. Fruit in February.

VOUCHER: Varzelândia, *Silva 1076* (R).

Encholirium luxor L.B.Sm. & Read, Bradea 5(27): 299. 1989. Synonym: *Encholirium piresianum* L.B.Sm. & Read, Bradea 5(27): 301. 1989. TYPE: Brazil—Minas Gerais, 15 km oeste de Januária, estrada para serra das Araras, *W.R. Anderson 9259* (Holotype: US!, Isotypes: HB!, IAN, MO, NY!).

DISTRIBUTION: Caatinga, savanna; 500–700 m; saxicolous. B7i, D8i, E7vii. DF, GO, MG.

BLOOMING: May to August.

VOUCHER: Santo Hipólito, *Forzza 940* (BHCB, SPF).

Encholirium magalhaesii L.B.Sm., Phytologia 13: 152. 1966. Synonyms: *Encholirium suzannae* Rauh, Trop. Subtrop. Pflanzenwelt 65: 19. 1988. *Encholirium crassiscapum* E. Gross, Trop. Subtrop. Pflanzenwelt 95: 7. 1997. TYPE: Brazil—Minas Gerais, Diamantina, *G.M. Magalhães 18056* (Holotype: IAN, Isotype: US!).

DISTRIBUTION: Rocky fields; 700–1400 m; saxicolous, terrestrial. C8i, C9i, E8ii, iii, iv, v, x. Endemic.

BLOOMING: December to March. Fruit from January to March.

VOUCHER: Diamantina, *Forzza 1509* (MBM, SPF).

NOTE: Highly variable in size.

Encholirium pedicellatum (Mez) Rauh, Trop. Subtrop. Pflanzenwelt 60: 15. 1987.—*Dyckia pedicellata* Mez in C. DC., Mongraph. phan. 9: 515. 1896. TYPE: Brazil—Minas Gerais, Diamantina, serra dos Cristais, *W. Schwacke 8413* (Lectotype: B!, Isolectotype: RB!).

DISTRIBUTION: Rocky fields; ca. 1100 m; terrestrial. E8iv. Endemic.

BLOOMING: November to February. Fruit in March.

VOUCHER: Diamantina, *Forzza 1504* (SPF).

Encholirium reflexum Forzza & Wand., Novon 11: 40. 2001. TYPE: Brazil—Minas Gerais,

DISTRIBUTION: Rocky fields; 1000–1300 m; saxicolous, terrestrial. E8iii, iv, xi; F8xviii. Endemic.

BLOOMING: Peaking February.

VOUCHER: Serro, Salino 5084 (BHCB).

Encholirium subsecundum (Baker) Mez in C. DC., Monogr. phan. 9: 540. 1896.—*Dyckia subsecunda* Baker, Handb. Bromel. 135. 1889. Synonym: *Encholirium glaziovii* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 505. 1894. TYPE: Brazil—Minas Gerais, Serro, Milho Verde, Saint-Hilaire E-496 (Holotype: P!).

DISTRIBUTION: Rocky fields, savanna; 550–1400 m; saxicolous, terrestrial. D7i, iii, iv; D8ii; E8i, iii, iv, vi, vii, ix, xi; F8v, ix, xviii. Endemic.

BLOOMING: December to March. Fruit throughout the year.

VOUCHER: Congonhas do Norte, Forzza 700 (BHCB, SPF).

Encholirium vogelii Rauh, Trop. Subtrop. Pflanzenwelt 60: 95. 1987. TYPE: Brazil—Minas Gerais, Santana do Riacho, serra do Cipó, km 132, S. Vogel 209. (Holotype: HEID, Isotype: UEC).

DISTRIBUTION: Rocky fields; 1100–1480 m; saxicolous, terrestrial. F8xviii. Endemic.

BLOOMING: October to March. Fruit in May.

VOUCHER: Santana do Riacho, Pereira 1051 (BHCB).

Fernseea itatiaiae (Wawra) Baker, Handb. Bromel. 20. 1889.—*Bromelia itatiaiae* Wawra, Oesterr. Bot. Z. 30: 114. 1880. TYPE: Brazil—Rio de Janeiro, pico de Itatiaia, Wawra II-442. (Holotype: W lost).

DISTRIBUTION: High altitude grassland; 1900–2400 m; saxicolous. I7ii. **MG, RJ, SP.**

BLOOMING: May to September.

VOUCHER: Itamonte, Pereira 5781 (HB, RB).

Hohenbergia augusta (Vell.) E.Morren, Catal.

9. 1873. LECTOYPE: Illustration of Vellozo, Icon. 3, t. 135. 1831 (Smith & Downs 1979).

DISTRIBUTION: Atlantic Forest; ca. 330 m; saxicolous. D10. **ES, MG, PR, RJ, SC, SP.**

BLOOMING: December.

VOUCHER: Teófilo Otoni, Matos 10959 (SP).

Hohenbergia catingae Ule, Bot. Jahrb. Syst.

42: 195. 1908. TYPE: Brazil—Bahia, Caldeirão, E. Ule 7042 (Holotype: B).

DISTRIBUTION: Atlantic Forest; 550–780 m; epiphytic, saxicolous, terrestrial. C10ii. **BA, MG.**

BLOOMING: August to September.

VOUCHER: Itaobim, Martinelli 9227 (RB).

Hohenbergia pabstii L.B.Sm. & Read, Phyto-

logia, 33: 439. 1976. TYPE: Brazil—Bahia, a 16 km de Santa Cruz da Vitória, A. Castellanos 27049 (Holotype: HB!).

DISTRIBUTION: Atlantic Forest; ca. 330 m; epiphytic. D10. **BA, MG.**

BLOOMING: January.

VOUCHER: Teófilo Otoni, Baker 7313 (HB).

Hohenbergia ramageana Mez in C. DC., Mon-

ogr. phan. 9: 127. 1896. TYPE: Brazil—Per-

nambuco, Recife, Dois Irmãos, Ridley s.n.

(Holotype: BM).

DISTRIBUTION: Caatinga, Atlantic Forest; 610–770 m; epiphytic, saxicolous. C10vi, C11ii. **BA, MG, PB, PE, RN, SP.**

BLOOMING: August to September.

VOUCHER: Santa Maria do Salto, Lombardi 5507 (BHCB).

Neoglaziovia variegata (Arruda) Mez, in Mart.

Eichler & Urban, Fl. Bras. (Martius) 3(3): 427. 1894.—*Bromelia variegata* Arruda, Diss. pl. brasili. 7. 1810. TYPE: Original de-

scription and plate.

DISTRIBUTION: Caatinga; 270–755 m; terrestri-

al. A8i, B7i, B8i, B9iv, C10ii, iii. **BA, CE, MG,**

PB, PI, RN, SP.

BLOOMING: September to November. Fruit from November to February.

VOUCHER: Manga, Costa s.n. (BHCB 21736, US).

Neoregelia bahiana (Ule) L.B.Sm., Proc. Amer.

Acad. Arts 70: 152. 1935.—*Nidularium bahianum* Ule, Bot. Jahrb. Syst. 42: 195. 1908. Synonyms: *Neoregelia bahiana* for-

ma *viridis* L.B.Sm., Smithsonian. Misc.

Collect. 126: 27. 1955. *Neoregelia bahiana* forma *bahiana* (Ule) L.B.Sm., Phytologia 15: 190. 1967. *Neoregelia hatschbachii* L.B.Sm., Phytologia 24: 447. 1972. *Neoregelia pabstiana* E.Pereira, Bradea 1(18): 162. 1972. *Neoregelia diamantinensis* E.Pereira, Bradea 2(7): 25. 1975. *Neoregelia intermedia* E.Pereira, Bradea 2(7): 29. 1975. TYPE: Brazil—Bahia, E. Ule 7105 (Holotype: B).

DISTRIBUTION: Rocky fields; 1100–1700 m; saxicolous, terrestrial. C9ii; D7iii; E8iii, iv, ix, xi; F8ii, iii, iv, ix, xviii; G8ii, x. **BA, MG.**

BLOOMING: October to December. Fruit from January to April.

VOUCHER: Serro, Mota 1849 (BHCB).

Neoregelia brigadirensis Paula & Leme, Pabstia 8(1): 2. 1997. TYPE: Brazil—Minas Gerais, Araponga, Parque Estadual da Serra do Brigadeiro, E.M.C. Leme 3567 fl. cult. (Holotype: VIC!, Isotype: HB, GFJP).

DISTRIBUTION: Atlantic Forest; 1200–1500 m; saxicolous, terrestrial. G9iii. Endemic.

BLOOMING: September to February.

VOUCHER: Araponga, Paula 1268 (VIC).

Neoregelia brownii Leme, Pabstia 8(1): 3. 1997. TYPE: Brazil—Minas Gerais, Fervedouro, Parque Estadual da Serra do Brigadeiro, Pedra do Pato, E.M.C. Leme 2174 (Holotype: GFJP, Isotype: HB!).

DISTRIBUTION: Atlantic Forest; 1140–1800 m; epiphytic, saxicolous. G9iii, iv. Endemic.

BLOOMING: February to May.

VOUCHER: Araponga, Goldschmidt 37 (VIC).

Neoregelia chlorosticta (Baker) L.B.Sm., Phytologia 10: 486. 1964.—*Karatás chlorosticta* Baker, Hand. Bromel. 7. 1889. TYPE: Edouard Morren's icon (Lectotype: K) (Smith & Downs 1979).

DISTRIBUTION: Atlantic Forest; ca. 800 m; epiphytic. G9vii. MG, PR, RJ, SP.

BLOOMING: Unknown.

VOUCHER: Fervedouro, Leme 1945 fl. cult. (HB).

Neoregelia cyanea (Beer) L.B.Sm., Contr. Gray Herb. 124: 9. 1939.—*Hoplophytum cyaneum* Beer, Fam. Bromel. 131. 1857. TYPE: Berlin Hortus s.n. (Holotype: B!).

DISTRIBUTION: Atlantic Forest; ca. 400 m; epiphytic. F9iv, H8xv. Endemic.

BLOOMING: July to October.

VOUCHER: Coronel Fabriciano, Foster 732 (US).

Neoregelia farinosa (Ule) L.B.Sm., Contr. Gray

Herb. 124: 9. 1939. TYPE: Brazil—Rio de Janeiro, serra de Macaé, E. Ule 4961 (Holotype: B).

DISTRIBUTION: Atlantic Forest, ca. 340 m, epiphytic. H9ii. **ES, MG, RJ.**

BLOOMING: November.

VOUCHER: Descoberto, Almeida 22 (CESJ).

Neoregelia ibitipocensis (Leme) Leme, Canistropsis Bromel. Mata Atl. 67. 1998.—*Wittrockia ibitipocensis* Leme, Bradea 5(42): 393. 1991. TYPE: Brazil—Minas Gerais, Lima Duarte, Parque Estadual do Ibitipoca, E.M.C. Leme 1485 (Holotype: HB!).

DISTRIBUTION: Atlantic Forest, 1500–1600 m, epiphytic, saxicolous, terrestrial. H8x. MG, RJ.

BLOOMING: September to December.

VOUCHER: Lima Duarte, Leme 1790 (HB).

Neoregelia leprosa L.B.Sm., Smithsonian Misc. Collect. 126: 29. 1955. TYPE: Brazil—Minas Gerais, Conceição do Mato Dentro, M.B. Foster 656 (Holotype: GH, Isotype: US!).

DISTRIBUTION: Habitat, elevation, and habit unknown. F8v. Endemic.

BLOOMING: July.

NOTE: Only known from the type collection.

Neoregelia lymaniana R.Braga & Sucre, Rev. Brazil. Bio. 34(4): 491. 1974. TYPE: Brazil—Rio de Janeiro, Itaipava-Petrópolis, R. Braga 32 fl. cult. (Holotype: RB).

DISTRIBUTION: Atlantic Forest; 700–1500 m; epiphytic, terrestrial, saxicolous. G9iii, vii; H8x. MG, **RJ.**

BLOOMING: October, March.

VOUCHER: Fervedouro, Leme 2167 fl. cult. (HB, SEL).

Neoregelia oligantha L.B.Sm., Smithsonian Misc. Collect. 126: 30. 1955. TYPE: Brazil—Minas Gerais, Parque Nacional, próximo à Ipatinga, M.B. Foster 742 (Holotype: GH, Isotype: US!).

DISTRIBUTION: Atlantic Forest; ca. 240 m; epiphytic?. F9vi?. Endemic.

BLOOMING: July.

NOTE: Only known from the type collection.

Neoregelia sarmentosa (Regel) L.B.Sm., Contr. Gray Herb. 104: 79. 1934.—*Nidularium sarmentosum* Regel, Gartenflora 19: 268. 1870. TYPE: Brazil—Petrograd Hortus ex Berlin Hortus s.n. (Holotype: LE).

DISTRIBUTION: Atlantic Forest; 140–1600 m; epiphytic. H8v, x, xvi; H9i; I7v. **ES, MG, RJ, SP.**

BLOOMING: Peaking November to December.
VOUCHER: Rio Novo, Schwacke 11966 (RB).

Neoregelia simulans L.B.Sm., Phytologia 15: 187. 1967. TYPE: Brazil—Espírito Santo, entre Castelo e Fruteira, Morro Pinga-Fogo, A. Seidel 62–8. (Holotype: HBR).

DISTRIBUTION: Atlantic Forest; 1000–1500 m; epiphytic, saxicolous, terrestrial. G9vii. ES, MG.

BLOOMING: February to April.
VOUCHER: Fervedouro, Paula 1033 (VIC).

Nidularium antoineanum Wawra, Oesterr. Bot. Z. 30(4): 113. 1880. Synonyms: *Nidularium antoineanum* var. *angustifolium* Wawra, Oesterr. Bot. Z. 30(4): 113. 1880. *Nidularium pedicellatum* E.Pereira & Leme, Bradea 4(11): 70. 1984. LECTOTYPE: Plate 35-C, Wawra, Itin. princ. S. Coburgi. 1883, selected by Leme (2000).

DISTRIBUTION: Atlantic Forest; 1200–1600 m; epiphytic, saxicolous. G9iii, iv, vii. MG, RJ, SP.

BLOOMING: January to April.
VOUCHER: Fervedouro, Paula 1034 (VIC).

Nidularium azureum (L.B.Sm.) Leme, Nidularium Bromel. Mata Atl. 94. 2000.—*Wittrockia azurea* L.B.Sm., Smithsonian Misc. Collect. 126: 36. 1955. TYPE: Brazil—Minas Gerais, Coronel Pacheco, fazenda da Companhia, E.P. Heringer 1536 (Holotype: SP!, Isotype: US!).

DISTRIBUTION: Atlantic Forest; ca. 480 m; epiphytic. H8vi. Endemic.

BLOOMING: July to August.
VOUCHER: Coronel Pacheco, Pereira 10596 (HB).

Nidularium bicolor (E.Pereira) Leme, Nidularium Bromel. Mata Atl. 49. 2000.—*Nidularium innocentii* var. *bicolor* E.Pereira, Bradea 1(29): 316. 1973. TYPE: Brazil—Espírito Santo, Castelo, Pedra Azul, A. Seidel 644 (Holotype: HB).

DISTRIBUTION: Atlantic Forest; 1100–2030 m; epiphytic, terrestrial. F8xvi, G8ii. ES, MG, RJ.

BLOOMING: Peaking November to February.
VOUCHER: Catas Altas, Vasconcelos s.n. (BHCB 52544, CESJ).

NOTE: This species can appear identified erroneously as *Nidularium rosulatum* Ule.

Nidularium ferdinando-coburgii Wawra, Oesterr. Bot. Z. 30: 112. 1880. LECTOTYPE: Plate 36-C, Wawra, Itin. princ. S. Coburgi. 1883, selected by Leme (2000).

DISTRIBUTION: Atlantic Forest; 610?–1000–1600 m; epiphytic. G10iv?, H8x. MG, RJ.

BLOOMING: June to December.

VOUCHER: Lima Duarte, Leme 1466 (R).

Nidularium linehamii Leme, J. Bromeliad Soc. 43(5): 199. 1993. TYPE: Brazil—Minas Gerais, Santa Bárbara, serra do Caraça, E.M.C. Leme 1540 (Holotype: HB!, “Clonotype”; RB!).

DISTRIBUTION: Rocky fields; ca. 1100 m; saxicolous. F8xvi. Endemic.

BLOOMING: January to February. Fruit in April (Leme 2000).

NOTE: Only known from the type collection.

Nidularium longiflorum Ule, Ber. Deutsch. Bot. Ges. 14: 408. 1896. TYPE: Brazil—Rio de Janeiro, Floresta da Tijuca, E. Ule 4036 (Holotype: B, Isotype, R!).

DISTRIBUTION: Atlantic Forest; ca. 400 m; epiphytic. G9xviii, H9ii. ES, MG, RJ, SP.

BLOOMING: November to April.

VOUCHER: Rosário da Limeira, Palhais 150 (VIC).

Nidularium marigoi Leme, J. Bromeliad Soc. 41(3): 112. 1991. TYPE: Brazil—Rio de Janeiro, próximo à divisa com Minas Gerais, Parque Nacional do Itatiaia, E.M.C. Leme 937 (Holotype: HB, Isotype: RB).

DISTRIBUTION: Rocky fields, Atlantic Forest; 1100–2000 m; saxicolous, terrestrial. G8x, H7i, H8x, I7iii. ES, MG, RJ, SP.

BLOOMING: December to March.

VOUCHER: Ouro Preto, Grandi 2366 (BHCB).

Nidularium purpureum Beer, Fam. Bromel. 75. 1856. TYPE: Neotypified by plate 25, Antoine Phyto-Iconogr. Bromel. 1884, designated by Leme (2000).

DISTRIBUTION: Atlantic Forest; ca. 700; epiphytic, saxicolous, terrestrial. H8ix. MG, RJ.

BLOOMING: January to April (Leme 2000).

NOTE: Cited for Juiz de Fora municipality by Leme (2000: 123).

Nidularium meeicum Leme, Wand. & Mollo, Fl. Fan. I. Cardoso 3: 108. 1992. TYPE: Brazil—Rio de Janeiro, Parati, próximo à divisa com São Paulo, E.M.C. Leme 751 fl. cult. (Holotype: HB, Isotype: RB).

DISTRIBUTION: Atlantic Forest; ca. 1200 m; epiphytic. I7i. MG, RJ, SP.

BLOOMING: November to March (Leme 2000).

VOUCHER: Bocaina de Minas, Leme. 1110 fl. cult. (HB).

Nidularium rutilans E.Morren, Belgique Horticole. 35: 81. 1885. TYPE: Edouard Morren's icon (Lectotype: K), designated by Leme (2000).

DISTRIBUTION: Atlantic Forest; ca. 1300 m; epiphytic, terrestrial. G9iii, vii. MG, **RJ, SP.**

BLOOMING: November to January (Paula 1998).

VOUCHER: Fervedouro, *Paula 1037* (VIC).

Orthophytum benzingii Leme & H.Luther, J. Bromeliad Soc. 48(4): 150. 1998. TYPE: Brazil—Minas Gerais, Almenara, E.M.C. Leme 3661 (Holotype: HB, Isotype: SEL!, “Clonotype”: SEL!).

DISTRIBUTION: Atlantic Forest; 450 m; saxicolous. C11i. Endemic.

BLOOMING: December.

VOUCHER: Almenara, *Luther s.n.* (SEL 78705).

Orthophytum compactum L.B.Sm., Phytologia 13: 462. 1966. TYPE: Brazil—Minas Gerais, margem da rodovia Nanuque–Teófilo Otoni, R.P. Belém 1626 (Holotype: US!, Isotype: CEPEC!, NY!, UB).

DISTRIBUTION: Rocky fields, Atlantic Forest; 820–1000 m; saxicolous, terrestrial. C9ii. Endemic.

BLOOMING: August to September. Fruit in May.

VOUCHER: Grão-Mogol, *Mello-Silva CFCR 10139* (MBM, SP, SPF).

Orthophytum disjunctum L.B.Sm. var. **disjunctum**, Bromeliad Soc. Bull. 12: 32. 1962. TYPE: Brazil—Paraíba, Queimadas, estrada de Campina Grande para Caruaru, M.B. Foster 2419 (Holotype: US!).

DISTRIBUTION: Atlantic Forest; 590–650 m; saxicolous. C10v, vi. MG, PB, PE.

BLOOMING: January to March.

VOUCHER: Pedra Azul, *Duarte 10614* (HB).

Orthophytum disjunctum var. **angustobracteatum** Rauh, Trop. Subtrop. Pflanzenwelt 58: 56. 1986. TYPE: Brazil—Minas Gerais, Iacquareti, W. Rauh 55328 (Holotype: HEID).

DISTRIBUTION: Habitat unknown; 500 m; saxicolous, terrestrial. Endemic.

BLOOMING: Unknown.

NOTE: Only known from the type collection. Cited for MG in the original description. Doubtful origin and doubtfully conspecific with type variety. Possibly collected in Bahia.

Orthophytum disjunctum var. **variegatum** Rauh, Trop. Subtrop. Pflanzenwelt 58: 58. 1986. TYPE: Brazil—Minas Gerais, Urundi, W. Rauh 56432 (Holotype: HEID).

DISTRIBUTION: Habitat unknown; 800 m; saxicolous. Endemic.

BLOOMING: Unknown.

NOTE: Only known from the type collection. Cited for MG in the original description. Doubtful origin and doubtfully conspecific with type variety.

Orthophytum disjunctum var. **viridiflorum**

Rauh, Trop. Subtrop. Pflanzenwelt 58: 60. 1986. TYPE: Brazil—Minas Gerais?, Botanical Garden Heidelberg 33052 (Holotype: HEID).

DISTRIBUTION AND BLOOMING: Unknown.

NOTE: Only known from the type collection. Cited for MG in the original description. Doubtful origin and doubtfully conspecific with type variety. Possibly collected in Bahia.

Orthophytum duartei L.B.Sm., Phytologia 13:

462. 1966. TYPE: Brazil—entre o norte do Espírito Santo e Nanuque no Estado de Minas Gerais, A.P. Duarte 3910 (Holotype: US!, Isotype: RB!).

DISTRIBUTION: Atlantic Forest; >330 m?; saxicolous. D11ii. **ES, MG.**

BLOOMING: December.

NOTE: Only known from the type collection.

Orthophytum eddie-estevesii Leme, J. Bromeliad Soc. 50(2): 55. 2000. TYPE: Brazil—Minas Gerais, Monte Azul, E.M.C. Leme 4693 fl. cult. (Holotype: HB!, Isotype: UFG).

DISTRIBUTION: Rocky fields; ca. 1300 m; saxicolous. B9ii. Endemic.

BLOOMING: September?.

NOTE: Only known from the type collection.

Orthophytum estevesii (Rauh) Leme, J. Bromeliad Soc. 54(1): 37. 2004.—*Orthophytum fosterianum* var. *estevesii* Rauh, Trop. Subtrop. Pflanzenwelt 79: 27. 1991. TYPE: Brazil—Minas Gerais, entre Mantena e Palmeira, E. Esteves Pereira s.n. (Holotype: HB, “Clonotype”: E.M.C. Leme 1906 fl. cult. HB).

DISTRIBUTION: Atlantic Forest; elevation unknown; saxicolous. E10. **ES, MG.**

BLOOMING: April.

NOTE: Only known from the type collection. Cited for MG by Leme (2004).

Orthophytum foliosum L.B.Sm., Arq. Bot. Estado São Paulo 1: 58. 1941. TYPE: Brazil—Espírito Santo, Santa Tereza, M.B. Foster 288 (Holotype: GH, Isotypes: R, US).

DISTRIBUTION: Atlantic Forest; ca. 360 m; saxicolous. E10. **ES, MG.**

BLOOMING: August.

VOUCHER: Itambacuri, *Magalhães 18001* (HB).

- Orthophytum glabrum** (Mez) Mez in C. DC., Monogr. phan. 9: 117. 1896.—*Prantleia glabra* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 258. 1891. TYPE: Brazil—Minas Gerais, fazenda Inhumas, São Miguel, *Pohl* 3436 (Lectotype: BR, Isototype: W) designated by Smith & Downs (1979), also cf. Till (1994).

BLOOMING: November.

VOUCHER: Conceição do Mato Dentro, Hatschbach 35400 (MBM, US).

Pepinia bradei (Markgr.) G.S.Varad. & Gilmar-tin, Syst. Bot. 13: 297. 1988.—*Pitcairnia bradei*, Notizbl. Bot. Gart. Berlin—Dahlen. 15: 215. 1940. TYPE: Brazil—Minas Gerais, Montes Claros, córrego das Mortes, sul de Grão Mogol, Markgraf 3918 (Holotype: B!, Isotype: RB).

DISTRIBUTION: Rocky fields, savanna; 700–1175 m; saxicolous, terrestrial. C9i, ii, E10. DF, MG.

BLOOMING: September to November. Fruit in May.

VOUCHER: Cristália, *Carvalho 576* (BHCB, US).

Pitcairnia carinata Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 448. 1894.
TYPE: Brazil—Rio de Janeiro, Nova Friburgo, *Glaziou 13256* (Holotype: B).

DISTRIBUTION: High altitude grassland, Atlantic Forest; 1040–1800 m; saxicolous. G9iii, vii, xviii, G10i. MG, RJ.

BLOOMING: Peaking January to March.

VOUCHER: Alto Caparaó, *Lutz 1194* (R).

Pitcairnia curvidens L.B.Sm. & Read, Phytologia 41(5): 331. 1979. TYPE: Brazil—Minas Gerais, Serra do Cipó, *H.S. Irwin 20338* (Holotype: UB).

DISTRIBUTION: Rocky fields, Atlantic Forest; 750–1500 m; saxicolous, terrestrial. E8i, ix; F8ix, xviii; H7i; H8x. Endemic.

BLOOMING: December to March. Fruit February.

VOUCHER: Santana do Riacho, *Coffani-Nunes CFSC 14003* (SPF).

Pitcairnia decidua L.B.Sm., Arq. Bot. Estado São Paulo 1: 110. 1943. TYPE: Brazil—Espírito Santo, Cuiubiçá, *M.B. Foster 893* (Holotype: GH).

DISTRIBUTION: High altitude grassland, Atlantic Forest; 1040–1800 m; saxicolous, terrestrial. G9iii, vii, xvii; G10i. ES, MG.

BLOOMING: February to June.

VOUCHER: Alto Caparaó, *Krieger 23559* (CESJ, RB, SPF).

Pitcairnia flammea Lindl. var. **flammea**, Bot. Reg. 13: t. 1092. 1827. TYPE: Brazil—Rio de Janeiro, Guanabara, *Harrison s.n.* (Holotype: CGE).

DISTRIBUTION: Rocky fields, Atlantic Forest; 340–1600 m; saxicolous, terrestrial. E8iv, xi, F8iv, v, x; G8ii, x; G9vii; H7xi; H8ix, x; H9ii; I6iii; I8. ES, MG, RJ, SP.

BLOOMING: Peaking January to April.

VOUCHER: Juiz de Fora, *Caiafa s.n.* (CESJ, SPF 148728).

Pitcairnia flammea var. **floccosa** L.B.Sm., Arq. Bot. Estado São Paulo 1: 112. 1943. TYPE: Brazil—São Paulo, Atibaia, *R. Ostermeyer s.n.* (Holotype: SP 24498!).

DISTRIBUTION: Rocky fields, Atlantic Forest; 460–1550 m; saxicolous. E8iv, ix; G8x; H8x?; xiii. BA, CE, MG, PB, PR, RJ, SC, SP.

BLOOMING: January to February.

VOUCHER: Piau, *Heringer 1732* (SP, US).

Pitcairnia flammea var. **glabrior** L.B.Sm., Arq. Bot. Estado São Paulo 1: 112. 1943. TYPE: Brazil—São Paulo, Alto da Serra, estrada do Vergueiro, *F.C. Hoehne s.n.* (Holotype: SP 4711!, Isotype: GH).

DISTRIBUTION: Rocky fields, Atlantic Forest; 1200–1300; saxicolous, terrestrial. D7iii, G8x, H8x. MG, PR, RJ, SP.

BLOOMING: September to March.

VOUCHER: Joaquim Felício, *Irwin 27096* (US, RB).

Pitcairnia flammea var. **macropoda** L.B.Sm. & Reitz, Phytologia 15: 194. 1967. TYPE: Brazil—Minas Gerais, Tombos, *G.M. Magalhães, s.n.* (Holotype: HB 33834!, Isotype: NY!).

DISTRIBUTION: Atlantic Forest, >270 m?; saxicolous. G9xvii. ES, MG, RJ.

BLOOMING: April to May.

VOUCHER: Tombos, *Magalhães s.n.* (HB 17948, 38105).

NOTE: Two herbarium sheets (HB 17948, 38105) also may be type material, as they have the same collector, collection date, and origin.

Pitcairnia lanuginosa Ruiz & Pav., Fl. Peruv. 3: 35. 1802. TYPE: Peru—Huanuco, Pozuzo, *Ruiz s.n.* (Holotype: MA).

DISTRIBUTION: Rocky fields, savanna, Atlantic

Forest; 540–1200 m; saxicolous, terrestrial. E2ii; F8iii, vii, xv; G8x; H5i; H7xiii. AM, DF, **GO, MG, MT, PA.**

BLOOMING: December to March.

VOUCHER: Sabará, *Versieux* 156 fl. cult. (RFA).

NOTE: This species also can be found determined as *Pitcairnia caldasiana* Baker.

Portea petropolitana (Wawra) Mez var. **petropolitana** in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 296. 1892.—*Aechmea petropolitana* Wawra, Oesterr. Bot. Zeitschr. 30: 116. 1880. TYPE: Brazil—Rio de Janeiro, Petrópolis, *Wawra II-63* (Holotype: W lost, Lectotype and Isolectotype: W) designated by Till (1994).

DISTRIBUTION: Atlantic Forest; 140–695 m; epiphytic. F9viii, G8xi, H8ix, H9ii. ES, **MG, RJ.**

BLOOMING: September to October.

VOUCHER: Descoberto, *Castro* 599 (CESJ).

Portea petropolitana var. **noettigii** (Wawra) L.B.Sm., Arq. Bot. Estado São Paulo 1: 113. 1943.—*Aechmea noettigi* Wawra, Oesterr. Bot. Z. 30: 117. 1880. TYPE: Brazil—Rio de Janeiro, Entre Rios, *Wawra 108* (Holotype: W).

DISTRIBUTION: Atlantic Forest; 430–695 m; epiphytic. F9vii; H8vi, ix. **MG, RJ.**

BLOOMING: July to October.

VOUCHER: Coronel Pacheco, *Pereira* 10593 (HB).

Portea silveirae Mez, Bot Jahrb. Syst. 30(67): 4. 1901. TYPE: Brazil—Minas Gerais, serra da Conceição, Mantiqueira, A.A. Silveira 8 (Holotype: B!, Isotype: R).

DISTRIBUTION: Atlantic Forest; 240–1100 m; epiphytic, saxicolous, terrestrial. C10iv; E8x; F9vi, viii; H8vi, ix. **BA, MG.**

BLOOMING: July to January.

VOUCHER: Jequitinhonha, *Mello-Silva* 436 (SPF).

Pseudananas sagenarius (Arruda) Camargo, Revista Agric. (Piracicaba) 14(7,8): 4. 1939.—*Bromelia sagenaria* Arruda, Diss. pl. Brazil 13. 1810. TYPE: Original description.

DISTRIBUTION: Savanna, Atlantic Forest; 140–1500 m; terrestrial. B7i; C12; E6i; F8xvi; G6i; G8ii, viii. **AL, BA, ES, MG, MT, PE, PR, RJ, SC, SP.**

BLOOMING: Peaking October to November.

VOUCHER: Catas Altas, *Viana* s.n. (BHCB 18392, US).

Quesnelia arvensis (Vell.) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 381. 1892.—*Bromelia arvensis* Vell. Fl. Flum. 130. 1825. TYPE: Lectotypification by the plate of Vellozo, Icon. 3, t. 141, 1831, suggested by Smith & Downs (1979).

DISTRIBUTION: Atlantic Forest; ca. 340 m; epiphytic. H9ii. **MG, PR, RJ, SP.**

BLOOMING: August.

VOUCHER: Descoberto, *Almeida* 8 (CESJ).

Quesnelia augusto-coburgii Wawra, Oesterr. Bot. Z. 30: 150. 1880. TYPE: Brazil—Minas Gerais, Juiz de Fora, *Wawra II-185, Wawra II-196* (Syntypes: W lost, Lectotype: plates 28 and 35-B, *Wawra, Itin. princ. S. Coburgi*. 1883, designated by Smith & Downs 1979).

DISTRIBUTION: Atlantic Forest; ca. 340–1000 m; epiphytic, saxicolous. G9ii, H9ii. **MG, RJ.**

BLOOMING: April to July. Fruit July to December.

VOUCHER: Amparo da Serra, *Palhais* 149 (VIC).

Quesnelia indecora Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 384. 1892. TYPE: Brazil—*Schott 5506* (Holotype: W lost, Lectotype: plate 74 of Mez, Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 1892, designated by Smith & Downs 1979).

DISTRIBUTION: Rocky fields, Atlantic Forest; 695–1600 m; epiphytic, saxicolous, terrestrial. F8xvi; G8ii, viii, x; H8ix; I7v. ES, MG.

BLOOMING: May to July.

VOUCHER: Catas Altas, *Mota* 219 (BHCN, MBM).

Quesnelia kautskyi C.M.Vieira, Bradea 8(23): 131. 1999. TYPE: Brazil—Espírito Santo, Marechal Floriano, estrada para Parajú, C.M. Vieira 967 (Holotype: RB!). Paratypes: Brazil—Espírito Santo, Castelo, A. Seidel 651 (HB). Minas Gerais, Alto Caparaó, Parque Nacional do Caparaó, Vale Verde, ao lado do córrego, L.S. Leoni 3384 (HB!, GFJP). Minas Gerais, Caparaó, Parque Nacional do Caparaó, R. Simão-Bianchini 272 (SPF!).

DISTRIBUTION: Atlantic Forest; 1100–2000 m; epiphytic, saxicolous. G9xvii; G10i, ii. **ES, MG.**

BLOOMING: June to September. Fruit in December.

VOUCHER: Alto Caparaó, Krieger FPNC 217 (CESJ, RB, SPF).

NOTE: Usually confused with *Quesnelia strobilispica* Wawra.

Quesnelia liboniana (De Jonghe) Mez in Budnowski, Bot. Arch. 1: 66. 1922.—*Billbergia*

liboniana De Jonghe, J. Hort. Prat. Belgique 9: 1, 2. 1851. TYPE: Lectotype not yet selected.

DISTRIBUTION: Atlantic Forest; 650–1300 m; epiphytic, saxicolous. F8xvi, G9xviii, H7vi. MG, RJ, SP.

BLOOMING: August to September.

VOUCHER: Caxambú, *Pereira* 10619 (HB, US).

Quesnelia quesneliana (Brongn.) L.B.Sm., Arq. Bot. Estado São Paulo 2(2): 196. 1952.—*Billbergia quesneliana* Brongn., Ann. Sci. Nat. (Paris) 2(15): 371. 1841. TYPE: Brazil—*Hort. Paris s.n.* (Holotype: P).

DISTRIBUTION: Atlantic Forest; ca. 700 m; epiphytic, saxicolous, terrestrial. G9. **ES, MG, RJ.**

BLOOMING: September to November.

NOTE: Only records from the literature were found. Specimens cited for eastern MG by Vieira (1999): Bom Jesus do Boné, *Leoni* 3015 (GFJP); Carangola, *Leoni s.n.* (GFJP); and Tombos, *Leoni s.n.* (GFJP).

Quesnelia strobilispica Wawra, Oesterr. Bot. Z. 30: 149. 1880. Synonyms: *Bromelia blanda* Schott ex Beer, Fam. Bromel. 43. 1856. *Quesnelia blanda* Schott ex Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 383. 1892. TYPE: Neotyppified by plate 25, Wawra, Itin. princ. S. Coburgi. 1883 (Vieira 1999).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 700–1400 m; saxicolous, epiphytic, terrestrial. F8v, xviii; G9iii, vii. **ES, MG, RJ.**

BLOOMING: July to October.

VOUCHER: Conceição do Mato Dentro, *Mello Barreto* 2104 (BHCB).

NOTE: This species can appear identified as *Quesnelia blanda*.

Racinaea aerisincola (Mez) M.A.Spencer & L.B.Sm., Phytologia 74: 157. 1993.—*Vriesea aerisincola* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 555. 1894. Synonym: *Tillandsia aerisincola* (Mez) Mez in C. DC., Monogr. phan. 9: 759. 1896. TYPE: Brazil—Lhotsky s.n. (Lectotype: G).

DISTRIBUTION: Rocky fields, Atlantic Forest; 945–1500 m; epiphytic. F8iv, v; G8ii, x; H8x. **ES, MG, PR, RJ, SC, SP.**

BLOOMING: May to September. Fruit in December.

VOUCHER: Catas Altas, *Mota* 1108 (BHCB).

Tillandsia arhiza Mez in C. DC., Monogr. phan. 9: 855. 1896. Synonym: *Tillandsia retrorsa* Silveira, *Floral. Mont.* 2: 25. 1931.

TYPE: Paraguay—*Balansa* 4747 (Holotype: P!).

DISTRIBUTION: Rocky fields; ca. 1100 m; saxicolous. E8iv. MG.

BLOOMING: Unknown.

VOUCHER: Diamantina, *Versieux* 90 fl. cult. (RFA).

Tillandsia chapeuensis Rauh, Trop. Subtrop. Pflanzenwelt 58: 24. 1986. TYPE: Brazil—Bahia (Holotype: HEID).

DISTRIBUTION: Rocky fields; 1200–1300 m; saxicolous. H8x. BA, MG.

BLOOMING: December.

VOUCHER: Lima Duarte, *Leme* 1470 (HB).

Tillandsia copynii Gouda, J. Bromeliad Soc. 38: 81. 1988. TYPE: Brazil—Minas Gerais, Paracatu, A.N. *Copijn* s.n. fl. cult. (Holotype: U 495840!).

DISTRIBUTION: Caatinga, savanna; 560 m; epiphytic. B8ii, D5ii. Endemic.

BLOOMING: Unknown. Fruit in October.

VOUCHER: Verdelândia, *Lombardi* 4464 (BHCB).

Tillandsia gardneri Lindl., Bot. Reg. 28: t. 63. 1842. TYPE: Brazil—Guanabara, Rio de Janeiro, *Gardner* 134 (Holotype: K).

DISTRIBUTION: Rocky fields, Atlantic Forest; 410–1900 m; epiphytic, saxicolous. C9i, ii; E8x; F8iii, iv, v, xiv, xvi; G7iii; G8ii, vii, ix; G9vii, viii, xvi; H5i; H7iii, x, xi, xiii; H8iii, x. **BA, CE, ES, MG, PB, PE, PI, PR, RJ, RS, SC, SE, SP.**

BLOOMING: Peaking March to July. Fruit May to January.

VOUCHER: Bom Jardim de Minas, *Grandi* s.n. (BHCB 17578, US).

Tillandsia gemmiflora Brongn. in Duperrey, Voy. monde 186. 1829. TYPE: Brazil—Santa Catarina, Florianópolis, Ilha de Santa Catarina, *D'Urville* s.n. (Holotype: P!).

DISTRIBUTION: Atlantic Forest, rocky fields, savanna; 340–1620 m; epiphytic, rarely saxicolous. C8i; E6iii; F8iv, v, ix, xvi, xviii; G5iii; G8ix, xi; G9iii, vii, xv; G10ii; H7ii, iii, iv, xi; H8iii, ix, x; H9ii; I5i; I7v. **DF, ES, GO, MG, MT, PR, RJ, RS, SC, SP.**

BLOOMING: Peaking July to November. Fruit May to November.

VOUCHER: Santa Rita de Jacutinga, *Urbano* 8923 (BHCB, CESJ, MBM).

Tillandsia globosa Wawra, Oesterr. Bot. Z. 30: 222. 1880. TYPE: Brazil—Rio de Janeiro, Entre Rios, *Wawra* 142-B (Holotype: W lost, Lectotype and Isolectotype: W) designated by Till (1994).

DISTRIBUTION: Atlantic Forest; 270–550 m; epiphytic. G8xi; G9iv, xi, xvii; H8vi; I7v. BA, ES, MG, PB, RJ.

BLOOMING: August to November.

VOUCHER: Carangola, *Leoni* 956 (RB).

Tillandsia graomogolensis Silveira, Flora Mont. 2: 26. 1931. Synonym: *Tillandsia kurt-horstii* Rauh, Trop. Subtrop. Pflanzenwelt 60: 69. 1987. TYPE: Brazil—Minas Gerais, Grão Mogol, Pedra Rica, A.A. Silveira 800 (no preserved specimen).

DISTRIBUTION: Rocky fields, Atlantic Forest; 330–1000 m; saxicolous, rarely epiphytic. C8i, C9ii, C10vi, D10, E8iv, H8x. BA, MG.

BLOOMING: August to December. Fruit in May. VOUCHER: Lima Duarte, *Leme* 1489 (HB).

Tillandsia horstii Rauh, Trop. Subtrop. Pflanzenwelt 27: 5. 1979. TYPE: Brazil—Minas Gerais, L. Horst s.n. (Holotype: HEID, Iso-type: US!).

DISTRIBUTION: Habitat, elevation, and habit unknown. BA, MG?.

BLOOMING: Unknown.

NOTE: This species is considered to be a natural hybrid (Heidt 1992). Cited for MG (doubtful origin) in the original description.

VOUCHER: Minas Gerais (without municipality), *Horst* s.n. (US 2848094).

Tillandsia leonamiana E.Pereira, Bradea 1: 437. 1974. Synonyms: *Tillandsia meridionalis* var. *subsecundifolia* Weber & Ehlers, Feddes Repert. 94: 615. 1983. *Tillandsia recurvifolia* var. *subsecundifolia* (W.Weber & Ehlers) W.Till, J. Bromeliad Soc. 45: 268. 1995. TYPE: Brazil, Minas Gerais, extremo norte do estado, A. Seidel 668 (Holotype: HB!).

DISTRIBUTION: Habitat and elevation unknown; saxicolous. MG, PR.

BLOOMING: October?.

VOUCHER: Minas Gerais (extreme north), *Seidel* 668 (HB).

Tillandsia loliacea Mart. ex Schult. & Schult. f. in Roem. & Schult., Syst. Veg. 7(2): 1204. 1830. TYPE: Brazil, Bahia, Joazeiro, Monte Santo, *Martius* s.n. (Holotype: M).

DISTRIBUTION: Caatinga, savanna; 270–1110 m; epiphytic, rarely saxicolous. A8i; B7i; C10ii, iii; D5i; E2ii; E8iv; F7ii, iii; F8xi, xviii; F10i; G6iii. BA, CE, DF, ES, GO, MG, MT, PB, PE, PI, RN, SP.

BLOOMING: February to October with peak in May.

VOUCHER: Pains, *Melo* 5 (BHCB, RFA).

Tillandsia mallemontii Glaziou ex Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 608. 1894. TYPE: Brazil—Guanabara, Tijuca, *Glaziou* 14345 (Holotype: B, Iso-type: K).

DISTRIBUTION: Atlantic Forest; 1300 m; epiphytic. I5i. BA, MG, PR, RJ, RS.

BLOOMING: January.

VOUCHER: Camanducaia, *Gentry* 21499 (US).

Tillandsia parvispica Baker, J. Bot. 25: 244. 1887. TYPE: Brazil—Serra do Picu, Boa Vista, *Glaziou* 13258 (Holotype: P!).

DISTRIBUTION: Caatinga, Atlantic Forest; 270–1300 m; epiphytic. C10ii, vi; F8xvi; H8vi. BA, MG, MT, PE.

BLOOMING: August to October.

VOUCHER: Pedra Azul, *Magalhães* 14136 (HB).

Tillandsia pohliana Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 597. 1894. TYPE: Brazil—Minas Gerais, São Miguel, *Pohl* 3658. Lectotype: W, designated by Smith & Downs (1977).

DISTRIBUTION: Rocky fields, savanna; 500–1500 m; epiphytic, rarely saxicolous. C8i; C9ii; C10ii, iii; E2ii; E3; E5; E8iv; F2; F4iii; F7iii; F8xi; G5iv; H5ii; H7iv; I8. CE, GO, MG, MT, SP.

BLOOMING: September to December.

VOUCHER: Uberlândia, *Tameirão-Neto* 1955 (BHCB).

Tillandsia polystachia (L.) L., Sp. pl. 1: 410. 1762.—*Renealmia polystachia* L., Sp. pl. 1: 286. 1753. TYPE: West Indies—*Plumier* s.n. (Holotype: P).

DISTRIBUTION: Rocky fields, Atlantic Forest; 420–930 m; epiphytic. F9ii, vii; G8xi; G9xviii; H7xiii; H8ix. AC, BA, CE, ES, MG, MT, PB, PE, PR, RJ.

BLOOMING: July to December peaking October. Fruit in April.

VOUCHER: Tiradentes, *Alves* 15 (RB).

NOTE: Brazilian material is all *Tillandsia parvispica* fide H. Luther.

Tillandsia pruinosa Sw., Fl. Ind. Occ. 1: 594. 1797. TYPE: Jamaica—*Swartz* s.n. (Holotype: S).

DISTRIBUTION: Atlantic Forest; ca. 430 m; epiphytic. G9xi. ES, MG, RJ.

BLOOMING: August to November.

VOUCHER: Ponte Nova, *Goldschmidt* 48 (VIC).

Tillandsia recurvata (L.) L., Sp. pl. 1: 410. 1762.—*Renealmia recurvata* L., Sp. pl. 1:

287. 1753. TYPE: Jamaica—*Sloane s.n.* (Holotype: BM, Isotypes: B, GOET, M, P).

DISTRIBUTION: Atlantic Forest, caatinga, rocky fields, savanna; 400–1650 m; epiphytic, saxicolous. C8ii; C9ii; C10vi; D7iii; E3; E4; E7iii; E8iv, x, xi; E9iii; F4iii, iv; F8iii, iv, ix, xi, xv, xvii, xviii, xx; F10ii; G7iii, vi; G8ii, ix, xi; G9iii, iv, vii, xviii; H6iv; H7i, iii, xi, xiii; H8ii, iii, vi, ix, x, xvi; I6ii; I7v; I8. AL, BA, CE, MG, PA, PB, PE, PR, RJ, RN, RS, SC, SP.

BLOOMING: September to March. Fruit all year.

VOUCHER: Santa Luzia, *Williams 6761* (R, RB, SP, US).

Tillandsia sp. 1.

DISTRIBUTION: Savanna, ca. 660 m, saxicolous. G6iii. Endemic?.

BLOOMING: October.

VOUCHER: Iguatama, *Melo 94* (RFA).

Tillandsia aff. sprengeliana Klotzsch ex Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 596. 1894. TYPE: Brazil—without collector and locality (Holotype: B).

DISTRIBUTION: Atlantic Forest; 770–940 m; epiphytic. C11ii. BA, MG.

BLOOMING: August to September.

VOUCHER: Santa Maria do Salto, *Lombardi 5448* (RFA) “aff.”.

NOTE: This species might be *Tillandsia heubergeri* Ehlers sensu Luther.

Tillandsia streptocarpa Baker, Jour. Bot. 25: 241. 1887. TYPE: Paraguay—Luque, *Balsansia 615* (Holotype: K, Isotypes: P!, S).

DISTRIBUTION: Caatinga, rocky fields, savanna; 500–1500 m; epiphytic, saxicolous. A8i; B8i; B9i, iv; C9ii; D7iii; E2ii; E6iii; E8iii, iv, x, xi; F7iii; F8v, xviii; G5iii, v; G8ix; H7xi; H8x. BA, DF, GO, MG, MS, MT, PB, PE, PI, PR, RN, RS, SP.

BLOOMING: September to January. Fruit March to May.

VOUCHER: Diamantina, *Cordeiro CFCR 522* (SPF, BHCB, SP, RB).

Tillandsia stricta Sol. in Sims, Bot. Mag. 37: t. 1529. 1813. TYPE: Brazil—Rio de Janeiro, *Banks s.n.* (Holotype: BM).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 330–1700 m; epiphytic, rarely saxicolous. C9ii; D9i; E8iii, iv, v; F8iii, iv, v, ix, x, xii, xvii; F9viii, xix; G10i; G5v; G7iv, v; G8ii, vii, viii, ix, x; G9iii, iv, vi, vii, xvi, xviii; H5i; H7i, ix, xi, xii, xiii; H8ii, viii, ix, x, xiv; H9ii; I7iii, v. BA, ES, MG, PE, PR, RJ, RS, SC, SP.

BLOOMING: July to March with peaks in September and February. Fruit April to May.

VOUCHER: Diamantina, *Irwin 21868* (HB, RB, SP, US).

Tillandsia tenuifolia L. var. **tenuifolia**, Sp. pl. 1: 286. 1753. TYPE: Without locality, *Royer s.n.* (Holotype: L).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 420–1340 m; epiphytic, saxicolous. C10vi; E3; E8iv, viii; F4iv; F5i; F8iv, v, xviii; G5v; G9iii, xviii; H7i, iv, xiii; H8iii, x, xii, xiv; I5i, ii. BA, CE, DF, ES, MG, MT, PA, PE, PR, RJ, RS, SC, SP.

BLOOMING: August to March. Fruit March to July.

VOUCHER: Pedra Azul, *Harley 25190* (BHCB, SPF).

Tillandsia tenuifolia var. **surinamensis** (Mez) L.B.Sm., Phytologia 8: 220. 1962.—*Tillandsia pulchella* var. *surinamensis* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 603. 1894. Synonym: *Tillandsia apariciana* E.Pereira, Rodriguésia 38: 114. 1971. TYPE: Suriname—*Hostmann 592-A* (Holotype: U).

DISTRIBUTION: Rocky fields, Atlantic Forest; 610–1200 m; epiphytic, saxicolous. E7iv, E8xi, F8xviii, H8x. BA, CE, DF, ES, GO, MG, PB, PE, PR, RJ, RS, SC, SP.

BLOOMING: October to April.

VOUCHER: Lima Duarte, *Andrade 1131* (BHCB, MBM).

Tillandsia tenuifolia var. **vaginata** (Wawra) L.B.Sm., Phytologia 8: 220. 1962.—*Tillandsia pulchra* var. *vaginata* Wawra, Oesterr. Bot. Z. 30: 224. 1880. TYPE: Brazil—Juiz de Fora, *Wawra II-212* (Holotype: W lost, Lectotype: plate 24-B, Wawra, Itin. princ. S. Coburgi. 1883, designated by Smith & Downs 1977).

DISTRIBUTION: Rocky fields, Atlantic Forest; 400–1160 m; epiphytic. B9v; F7ii, iii; F8xviii; G7ii; G9iv; H5i; H6iv; H7vi; H8ii, vi, x; I7iii. BA, ES, GO, MG, PB, PI, PR, RJ, RN, SP.

BLOOMING: Peaking November.

VOUCHER: Lima Duarte, *Brandão s.n.* (R 190567).

Tillandsia tricholepis Baker, J. Bot. 16: 237. 1878. TYPE: Bolívia—La Paz, Larecaja, *Mandon 1179 in part* (Lectotype: K, Isolectotypes: W, P!, cf. Till 1994).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 470–1110 m; epiphytic. E8iv; F8xi, xviii; G9iv; H8iv, ix, xi. CE, MG, PE, PR, RJ, RS.

BLOOMING: Unknown. Fruit June to October.

VOUCHER: Santana do Riacho, *Pirani* CFSC 13268 (SPF).

Tillandsia usneoides (L.) L., Sp. pl. (ed 2) 1: 411. 1762.—*Renealmia usneoides* L., Sp. pl. 1: 287. 1753. TYPE: Jamaica—*Anonymus in Clifford Herbarium s.n.* (Lectotype: BM).

DISTRIBUTION: Rocky fields, Atlantic Forest; 340–1290 m; epiphytic. C9ii; E8i, iv; F8iii, iv, v, xi, xviii; F9viii; G9iii, v; H7iii, iv, xii, xiii; H8i, ii, iii, x; H9ii; I7iii, v. BA, CE, ES, MA, MG, PA, PB, PE, PR, RJ, RS, SC, SP.

BLOOMING: August to November.

VOUCHER: Bom Sucesso, *Tameirão-Neto* 791 (BHCB, US).

Vriesea arachnoidea A.Costa, J. Bromeliad Soc. 44: 162. 1994. TYPE: Brazil—Rio de Janeiro, Nova Friburgo, Reserva Biológica de Macaé de Cima, Sítio Hum Baccus, A.F. Costa 425 (RB!).

DISTRIBUTION: Atlantic Forest; ca. 1200 m; epiphytic, terrestrial. G9iii, vii. MG, RJ.

BLOOMING: November to January.

VOUCHER: Fervedouro, *Paula* 1027 (VIC).

Vriesea atropurpurea Silveira, Floral. Mont. 2: 3. 1931. Synonyms: *Vriesea glauca* Silveira, Floral. Mont. 2: 3. 1931. *Vriesea albescens* Silveira, Floral Mont. 2. t. 131. 1931. TYPE: Brazil—Minas Gerais, serra do Cipó, em campo arenoso, A.A. Silveira s.n. (no preserved specimen). Lectotype: plate 130, Floral. Mont. 2, 1931, designated by Leme (1999).

DISTRIBUTION: Rocky fields; 1000–1400 m; terrestrial, saxicolous. F8xviii. Endemic.

BLOOMING: July to August.

VOUCHER: Santana do Riacho, *Marques* s.n. (BHCB 42943).

Vriesea billbergioides E.Morren ex Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 534. 1894. TYPE: Brazil—Rio de Janeiro, *Glaziou* 3630 (Holotype: B!, Iso-types: BR, P!).

DISTRIBUTION: Atlantic Forest; 1000–2000 m; epiphytic. G9iii; G10i, ii. MG, RJ.

BLOOMING: September to February.

VOUCHER: Alto Caparaó, *Krieger* FPNC-211 (CESJ, RB, SPF).

Vriesea bituminosa Wawra, Oesterr. Bot. Z. 12: 347. 1862. TYPE: Brazil—Bahia, Ilhéus, *Wawra* 257 (Holotype: W, SEL photo!).

DISTRIBUTION: Rocky fields, Atlantic Forest; 700–1650 m; epiphytic, saxicolous, terrestrial. F8iv, v; G9iii; H8x. BA, CE, ES, MG, RJ, SP.

BLOOMING: June to December. Fruit in April. VOUCHER: Lima Duarte, *Sousa* s.n. (BHCB 13730).

Vriesea cacuminis L.B.Sm., Phytologia 16: 79. 1968. TYPE: Brazil—Minas Gerais, Serinha, próximo à Ibitipoca, *Schwacke* 12296 (Holotype: RB!, Isotype: US!).

DISTRIBUTION: Rocky fields; ca. 1300 m; saxicolous. H8x. Endemic.

BLOOMING: July to October. Fruit in November.

VOUCHER: Lima Duarte, *Krieger* 9298 (BHCB, RB).

Vriesea carinata Wawra, Oesterr. Bot. Z. 12: 349. 1862. TYPE: Brazil—Rio de Janeiro, Petrópolis, *Wawra* 1-443. Lectotype: W, Isolateotype: W, designated by Till (1994).

DISTRIBUTION: Atlantic Forest; 530–1300 m; epiphytic. H7xiii, H8x. ES, MG, PR, RJ, RS, SC, SP.

BLOOMING: February to June.

VOUCHER: Lima Duarte, *Paula* s.n. (VIC 26470).

Vriesea clauseniana (Baker) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 545. 1894.—*Tillandsia clauseniana* Baker, Handb. Bromel. 213. 1889. TYPE: Brazil—Minas Gerais, serra do Caraça, *Claussen* s.n. (Holotype: P!).

DISTRIBUTION: Rocky fields; 1100–2040 m; saxicolous. F8xvi; G8ii, x. Endemic.

BLOOMING: May to June.

VOUCHER: Catas Altas, *Ordones* 183 (BHZB).

Vriesea crassa Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 566. 1894. TYPE: Brazil—Rio de Janeiro, Nova Friburgo, *Glaziou* 13261 (Holotype: K).

DISTRIBUTION: High altitude grassland, rocky fields; 900–1800 m; saxicolous, terrestrial. F8iv, v, xvi, xviii; G8vii, x; G9iii. MG, RJ.

BLOOMING: October to February. Fruit April to August.

VOUCHER: Conceição do Mato Dentro, *Mota* 1867 (BHCB, RFA).

NOTE: This species can be misdetermined as *Vriesea stricta* in herbaria.

Vriesea densiflora Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 567. 1894. TYPE: Brazil—*Glaziou* 15672-B (Holotype: B, US photo!).

DISTRIBUTION: Rocky fields; ca. 2200 m; saxicolous. E8ix. Endemic.

BLOOMING: February.

VOUCHER: Santo Antônio do Itambé, *Anderson* 35757 (US).

Vriesea diamantinensis Leme, J. Bromeliad Soc. 47(4): 168. 1997. TYPE: Brazil—Minas Gerais, Diamantina, BR 259, E.M.C. Leme 1817 (Holotype: HB).

DISTRIBUTION: Rocky fields; 1100–1400 m; saxicolous. E8iii, iv, xi. Endemic.

BLOOMING: August to March. Fruit in January. VOUCHER: Serro, *Vasconcelos* s.n. (BHCB 40171).

NOTE: This species can be misdetermined as *Vriesea stricta* in herbaria.

Vriesea ensiformis (Vell.) Beer, Fam. Bromel. 92. 1857.—*Tillandsia ensiformis* Vell., Fl. Flum. 133. 1825. LECTOTYPE: plate 129, Vellozo, Icon. 3, Fl. Flum. 1831, designated by Smith & Downs (1977).

DISTRIBUTION: Atlantic Forest; 480–1200 m; epiphytic. F9viii; G9vii; H8vi, ix, xii; H9vi; I7v. **BA, ES, MG, PR, RJ, SC, SP.**

BLOOMING: October to March. Fruit in April. VOUCHER: Coronel Pacheco, *Heringer* 1165 (SP, VIC).

Vriesea friburgensis Mez var. **friburgensis** in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 537. 1894. TYPE: Brazil—Rio de Janeiro, Nova Friburgo, *Glaziou* 16467 (Holotype: K, Isotypes: C, P).

DISTRIBUTION: Atlantic Forest, rocky fields, savanna; 700–1400 m; epiphytic, saxicolous, terrestrial. C9ii; E8x; F8iv, v, x, xvi; G7iii; G8ii, iv, ix, x; H7i, xii; H8ii, x. **BA, MG, PR, RS, SC, SP.**

BLOOMING: November to December.

VOUCHER: Conceição do Mato Dentro, *Mota* 1866 (BHCB, RFA).

Vriesea friburgensis var. **tucumanensis** (Mez) L.B.Sm., Anais Bot. Herb. “Barbosa Rodrigues” 4: 68. 1952.—*Vriesea tucumanensis* Mez in C. DC., Monogr. phan. 9: 585. 1896. TYPE: Argentina—Sierra de Tucumán, *F. Schultz* s.n. (Holotype: B).

DISTRIBUTION: Atlantic Forest; ca. 830 m; epiphytic. I6iv. **MG, PR, RS, SC, SP.**

BLOOMING: December.

VOUCHER: Pouso Alegre, *Hoehne* s.n. fl. cult. (SP 24550).

Vriesea gigantea Gaudich., Atl. Voy. Bonite, Bot. 3: t. 70. 1846. TYPE: Brazil—Santa Catarina, Florianópolis, *Gaudichaud* 127 in part (Holotype: P).

DISTRIBUTION: Atlantic Forest; 340 m; epiphytic. H9ii. **ES, MG, PR, RJ, RS, SC, SP.**

BLOOMING: June.

VOUCHER: Descoberto, *Castro* 463 (CESJ, MBM, SP).

Vriesea gradata (Baker) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 523. 1894.—*Tillandsia gradata* Baker, J. Bot. 26: 105. 1888. TYPE: Brazil—Rio de Janeiro, Petrópolis, *Glaziou* 15473 (Holotype: K, Isotype: C).

DISTRIBUTION: Atlantic Forest; 340–800 m; epiphytic. H8ix, xiv; H9ii; I7v; I8. **ES, MG, RJ, SP.**

BLOOMING: December to April peaking February. Fruit in September.

VOUCHER: Santa Rita de Jacutinga, *Marilene* (CESJ 11577, SPF).

Vriesea guttata Linden & André, Ill. Hort. 22: 43. 1875. TYPE: Brazil—Santa Catarina, *Gautier* in *Linden Hortus* s.n. (no preserved specimen). Lectotype original description and plate designated by Smith & Downs (1977).

DISTRIBUTION: Rocky fields, Atlantic Forest; 1000–1700 m; epiphytic. F8ix; G9iii, vi; H9vi. **MG, PR, RJ, SC, SP.**

BLOOMING: September to February. Fruit December to February.

VOUCHER: Jaboticatubas, *Parra* CFSC 12990 (SPF).

Vriesea heterostachys (Baker) L.B.Sm., Phytologia 19: 289. 1970.—*Tillandsia heterostachys* Baker, J. Bot. 26: 106. 1888. TYPE: Brazil—São Paulo, *Glaziou* 13260 in part (Holotype: B!, Isotype: P!).

DISTRIBUTION: Atlantic Forest; 550–1400 m; epiphytic, saxicolous, terrestrial. F8vii; G9iii, iv, vii; H8x; I7v. **ES, MG, RJ, SP.**

BLOOMING: March to May.

VOUCHER: Itabira, *Matos* s.n. (R 46311, US).

Vriesea aff. hieroglyphica (Carrière) E.Morren, Ill. Hort. 31: 41. 1884. TYPE: Brazil—São Paulo, Santos, *Grand* in *Hortus Museum Paris* s.n. (Holotype, P?).

DISTRIBUTION: Rocky fields?, more likely in Atlantic Forest; ca. 650 m; saxicolous. C8ii. **ES, MG, RJ, SP.**

BLOOMING: Unknown.

VOUCHER: Francisco Sá, *Seidel* 1093 fl. cult. (RB) “aff.”.

Vriesea hoehneana L.B.Sm., Proc. Amer. Acad. Arts 68: 150. 1933. TYPE: Brazil—São Paulo, Alto da Serra, Estação Biológica, *L.B. Smith* 1945 (Holotype: GH, Isotype: US!).

DISTRIBUTION: Rocky fields; ca. 1600 m; saxicolous, terrestrial. H8x. **MG, SP.**

BLOOMING: November to December.
 VOUCHER: Lima Duarte, *Krieger* 13227
 (CESJ).

Vriesea itatiaiae Wawra, Oesterr. Bot. Z. 30:
 221. 1880. TYPE: Brazil—Rio de Janeiro,
 Itatiaia, Wawra II-463 (Holotype: W lost).
 Lectotype plate 34-C, Wawra, Itin. princ. S.
 Coburgi. 1883, designated by Smith &
 Downs (1977).

DISTRIBUTION: High altitude grassland; 2030
 m; terrestrial. H7i. MG, **RJ**.

BLOOMING: May to June.
 VOUCHER: Aiuruoca, Vasconcelos s.n. (BHCB
 47860).

Vriesea jonghei (K.Koch) E.Morren, Belgique
 Hort. 28: 257. 1878.—*Encholirion jonghei*
 Libon ex K.Koch, Allg. Gartezeitung. 22.
 1857. TYPE: Brazil—Minas Gerais, Dia-
 mantina, *Libon in De Jonghe Hortus* s.n.
 (probably no preserved specimen).

DISTRIBUTION: Unknown. **BA**, MG, PR, **RJ**,
SP.

BLOOMING: Unknown.
 NOTE: Cited for MG in the original descrip-
 tion of the basionym (*Encholirion jonghei*),
 which was collected by Libon in Diamantina.

Vriesea longicaulis (Baker) Mez in Mart., Ei-
 chler & Urban, Fl. Bras. (Martius) 3(3):
 542. 1894.—*Tillandsia longicaulis* Baker, J.
 Bot. 26: 80. 1888. TYPE: Brazil—Rio de Ja-
 neiro, Petrópolis, morro do Retiro, *Glaziou*
 8988 (Holotype: K).

DISTRIBUTION: High altitude grassland, rocky
 fields, 1200–1650 m, epiphytic, saxicolous.
 F8ix, xvi; G8ii, vii, viii, x; G9iii, vii; H8x. **ES**,
MG, **RJ**, **SC**, **SP**.

BLOOMING: February to July. Fruit April to
 November.

VOUCHER: Itabirito, Vasconcelos 89 (BHCB).

Vriesea longistaminea Paula & Leme, Vidalia
 1(2): 25. 2004. TYPE: Brazil—Minas Gerais,
 Mariana, *E.M.C. Leme* 5363 fl. cult. (Ho-
 lotype: HB).

DISTRIBUTION: Rocky fields; 1000–1400 m;
 saxicolous. G7iii, G8viii. Endemic.

BLOOMING: December to January.
 VOUCHER: Brumadinho, *Martens* 263 (SPF)
 “cf.”.

Vriesea lubbersii (Baker) E.Morren ex Mez in
 Mart., Eichler & Urban, Fl. Bras. (Martius)
 3(3): 533. 1894.—*Tillandsia lubbersii* Bak-
 er, Handb. Bromel. 219. 1889. TYPE: Plate
 of *Edouard Morren* s.n. (Lectotype: K).

DISTRIBUTION: Rocky fields, savanna, Atlantic

Forest; 900–1100 m; epiphytic. F8iv; H7x. **ES**,
MG, **RJ**, **SC**, **SP**.

BLOOMING: February. Fruit in May.
 VOUCHER: Caeté, *Mota* 344 (BHCB, RFA).

Vriesea minarum L.B.Smith, Arq. Bot. Estado
 São Paulo 1: 118. 1943. Synonyms: *Til-*
landsia citrina Baker, Handb. Bromel. 244.
 1889. *Vriesea citrina* E.Morren ex Baker,
 Handb. Bromel. 244. 1889, pro syn. *Vriesea*
citrina (Baker) L.B.Sm., Phytologia 21: 93.
 1971. TYPE: Brazil—Minas Gerais, Caeté,
 pico da Piedade, *M.B. Foster* 564 (Holo-
 type: GH, US photo!).

DISTRIBUTION: Rocky fields; 1000–1800 m;
 saxicolous, terrestrial. F8iv, xiv, xv; G7iii, v;
 G8iii, vii, ix, x. Endemic.

BLOOMING: December to March. Fruit March
 to July.

VOUCHER: Sabará, *Versieux* 176 (RFA).
 NOTE: This species can be misdetermined as
Vriesea atropurpurea or *V. stricta* in herbaria.

Vriesea minor (L.B.Sm.) Leme, J. Bromeliad
 Soc. 46(6): 245. 1996.—*Vriesea bituminosa*
 var. *minor* L.B.Sm., Phytologia 16: 79.
 1968. TYPE: Brazil—Minas Gerais, estrada
 Tijucal e Serro, *E. Pereira* 2861. (Holotype:
 RB!, Isotypes: HB!, US!).

DISTRIBUTION: High altitude grassland, rocky
 fields; 1000–1700 m; saxicolous, terrestrial,
 rarely epiphytic. Endemic.

BLOOMING: September to April peaking Feb-
 ruary. Fruit April to July.

VOUCHER: Datas, *Leme* 1823 (HB).

Vriesea modesta Mez, Bot. Jahrb. Syst. 30(67):
 7. 1901. TYPE: Brazil—Minas Gerais, alto
 da Serra da Mantiqueira, *H. Magalhães*
 1020 (Holotype: B!, Isotype: R!).

DISTRIBUTION: Atlantic Forest; elevation un-
 known; epiphytic. **ES**, MG, **RJ**.

BLOOMING: April.

NOTE: Only known from the type collection.

Vriesea monacorum L.B.Sm., Arq. Bot. Estado
 São Paulo 1: 119. 1943. TYPE: Brazil—Mi-
 nes Gerais, Santa Bárbara, serra do Caraça,
M.B. Foster 693 (Holotype: GH, US photo!,
 Isotype: US!).

DISTRIBUTION: Rocky fields; 1200–1600 m;
 epiphytic, saxicolous. E8x; F8ix, xvi. Endemic.

BLOOMING: December to March. Fruit May to
 July.

VOUCHER: Santa Bárbara, *Hensold* CFCR
 2894 (SPF).

Vriesea morrenii Wawra, Oesterr. Bot. Z. 30:
 219. 1880. TYPE: Brazil—Rio de Janeiro,

Petrópolis, cachoeira de Itamarati, *Wawra* 72 (Holotype: W lost, Isotype: B!).

DISTRIBUTION: Atlantic Forest; 600–1250 m; epiphytic, saxicolous. G9vii, H8xiv. ES, **MG, RJ.**

BLOOMING: September to December.

VOUCHER: Fervedouro, *Paula* 1075 (VIC).

Vriesea nanuzae Leme, J. Bromeliad Soc. 47(4): 172. 1997. TYPE: Brazil—Minas Gerais, Diamantina, BR 259, *E.M.C. Leme* 1820 (Holotype: HB).

DISTRIBUTION: Rocky fields; 1350 m; saxicolous. E8iv. Endemic.

BLOOMING: November.

NOTE: Only known from the type collection. Cited for MG in the original description.

Vriesea neoglutinosa Mez, Pflanzenreich 4(32): 636. 1935. TYPE: Brazil—Rio de Janeiro, Botafogo, *Martius s.n.* (Holotype: M).

DISTRIBUTION: Habitat, elevation, and habit unknown. F8xvi. **ES, MG, PR, RJ, SC, SP.**

BLOOMING: Unknown.

VOUCHER: Santa Bárbara, *Silva s.n.* fl. cult. (SEL 85570).

Vriesea oligantha (Baker) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 544. 1894.—*Tillandsia oligantha* Baker, J. Bot. 25: 345. 1887. TYPE: Brazil—Minas Gerais, serra de Ouro Preto, *Glaziou* 15472 (Holotype: K; Isotype: C).

DISTRIBUTION: Rocky fields; (550?)900–2000 m; epiphytic, saxicolous, terrestrial. B9v; C8i; C9ii; D8ii; E8iii, iv, vii, xi; F8v, xviii; G8ii, ix, x. **BA, MG.**

BLOOMING: November to March. Fruit April to September.

VOUCHER: Santana do Riacho, *Duarte* 1982 (RB, US).

NOTE: Some individuals present pups emerging from the inflorescence (viviparity).

Vriesea paraibica Wawra var. **paraibica**, Itin. princ. S. Coburgi. 160. 1883. TYPE: Brazil—Minas Gerais, Juiz de Fora, *Wawra II-184* (Holotype: W lost, Lectotype and Isolectotype: W designated by Till 1994).

DISTRIBUTION: Atlantic Forest; ca. 700 m; epiphytic. H8ix. **MG, RJ.**

BLOOMING: April to July (Costa 2002).

NOTE: Cited for MG in the original description and in Fl. Neotrop. Monogr. 14(2): 1222. 1977.

Vriesea paraibica var. **interrogatoria** (L.B.Sm.) A.Costa, Unpublished—*Vriesea interrogatoria* L.B.Sm, Arq. Bot. Estado

São Paulo 1: 117. 1943. TYPE: Brazil—Rio de Janeiro, Itatiaia, *M.B. Foster* 1039 (Holotype: GH, Isotype: SP!).

DISTRIBUTION: Atlantic Forest; 1000–1900 m; epiphytic. H7i. **MG, RJ, SP.**

BLOOMING: May to June. Fruit in February.

VOUCHER: Aiuruoca, *Tameirão-Neto* 2887 (BHCB).

Vriesea pardalina Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 523. 1894. TYPE: Brazil—Rio de Janeiro?, morro de São Vicente para Cachoeira, *Glaziou* 15474 (Holotype: B!, Isotype: P!).

DISTRIBUTION: Rocky fields, Atlantic Forest; 730–1330 m; epiphytic. F8iv, xviii; H8x; I6v. **MG, RJ.**

BLOOMING: August to February peaking October.

VOUCHER: Santana do Riacho, *Duarte* 2233 (RB, US).

Vriesea pauperrima E.Pereira, Bradea 1(25): 274. 1972. TYPE: Brazil—Espírito Santo, entre Castelo e Cachoeiro do Itapemirim, *A. Seidel* 631 fl. cult. (Holotype: HB).

DISTRIBUTION: Atlantic Forest; 340–580 m; epiphytic. F9iii, viii; H9ii. **BA, ES, MG, PR, RJ, RS, SP.**

BLOOMING: February. Fruit in June.

VOUCHER: Caratinga, *Costa s.n.* (BHCB 22153).

NOTE: The species can appear identified erroneously as *Vriesea carinata*.

Vriesea penduliflora L.B.Sm., Arq. Bot. Estado São Paulo 1: 120. 1943. TYPE: Brazil—Rio de Janeiro, Itatiaia, cascata da Maromba, *M.B. Foster* 135 (Holotype: GH).

DISTRIBUTION: Atlantic Forest; 1600 m; epiphytic, rarely terrestrial or saxicolous. H8x. **MG, RJ.**

BLOOMING: December.

VOUCHER: Lima Duarte, *Leme* 1483 (HB).

Vriesea procera (Mart. ex Schult. & Schult. f.) Wittm., Bot. Jahrb. Syst. 13(29): 21. 1891. TYPE: Brazil—Bahia, rio Itaipé, *Martius s.n.* (Holotype: M).

DISTRIBUTION: Atlantic Forest, rocky fields; 450–1120 m; epiphytic, terrestrial. C10iv, D11iii, E8iv, H7xiii, H9vi. **BA, CE, ES, MG, PB, PE, PI, PR, RJ, SE, SP.**

BLOOMING: September to April.

VOUCHER: Serra dos Aimorés, *Martinelli* 14839 (RB).

Vriesea racinæ L.B.Sm., Lilloa 6: 387. 1941.

TYPE: Brazil—Espírito Santo, Santa Teresa, M.B. Foster 270 (Holotype: GH).

DISTRIBUTION: Atlantic Forest; 1300 m?; epiphytic. G9vii. ES, MG.

BLOOMING: December.

VOUCHER: Fervedouro, *Paula s.n.* (VIC 26214).

Vriesea rafaelii Leme, Harvard Pap. Bot. 4(1): 163. 1999. TYPE: Brazil—Minas Gerais, Juiz de Fora, rio do Peixe, E.M.C. Leme 3410 (Holotype: HB!).

DISTRIBUTION: Atlantic Forest; ca. 700 m; epiphytic. H8ix. Endemic.

BLOOMING: June to July.

VOUCHER: Juiz de Fora, *Berg s.n.* fl. cult. (SEL 82089).

Vriesea regnellii Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 548. 1894. TYPE: Brazil—Minas Gerais, Caldas, *Regnell III-1799* (Holotype: B, SEL photo!, Isotypes: US!, S!).

DISTRIBUTION: Atlantic Forest, > 1000 m?; epiphytic. H5i. MG, RJ.

BLOOMING: Unknown.

NOTE: This species is only known from the type collection. The name has been applied incorrectly to *Vriesea* sp. 1.

Vriesea ruschii subsp. **leonii** Leme, Pabstia 4(1): 2. 1993. TYPE: Brazil—Minas Gerais, Carangola, serra da Araponga, fazenda da Neblina, Parque Estadual da Serra do Brigadeiro, L.S. Leoni 1968 (Holotype: GFJP, Isotype: HB!).

DISTRIBUTION: Atlantic Forest; 1300–1600 m; epiphytic. G9iii, iv, vii; G10i. Endemic.

BLOOMING: Peaking November to December.

VOUCHER: Alto Caparaó, Krieger FPNC-829 (CESJ, RB).

Vriesea sazimae Leme, Bromélia 2(4): 26. 1995. TYPE: Brazil—São Paulo, Campos do Jordão, Horto Florestal, M. Sazima 32328 (Holotype: UEC). Ibidem, M. Sazima 32344 (Paratype: HBL).

DISTRIBUTION: Atlantic Forest; 1900 m; epiphytic. I5i. MG, SP.

BLOOMING: February.

VOUCHER: Camanducaia, *França* 258 (BHCB).

Vriesea saxicola L.B.Sm., Phytologia 16: 83. 1968. TYPE: Brazil—Minas Gerais, próximo à São João del Rei, serra do Lenheiro, W. Schwacke 12086 (Holotype: RB!, Isotype: US!).

DISTRIBUTION: Rocky fields; 900–1350 m; saxicolous. H7xi, xiii. Endemic.

BLOOMING: October to December. Fruit in June.

VOUCHER: Tiradentes, *Silva* 730 (HB).

Vriesea scalaris E.Morren, Belgique Hort. 29: 301. 1879. TYPE: Brazil—*E. Morren s.n.* (“Clonotype”: LG).

DISTRIBUTION: Atlantic Forest; 340–1000 m; epiphytic. G9iii, vi; H9ii. BA, ES, MG, PE, RJ, SC.

BLOOMING: Peaking December to January.

VOUCHER: Ervália, *Paula* 1064 (VIC).

Vriesea sceptrum Mez in C. DC., Monogr. phan. 9: 606. 1896. TYPE: Brazil—Minas Gerais, Caldas, Pedra Branca, *Regnell III-1254* in part (Holotype: US!, Isotype: P!).

DISTRIBUTION: Atlantic Forest; 1100–2050 m; epiphytic. H5i, iii; I5i; I6ii; I7iv. MG, RJ, SP.

BLOOMING: September to November.

VOUCHER: Camanducaia, *Mota* 1280 (BHCB).

Vriesea schwackeana Mez in C. DC., Monogr. phan. 9: 590. 1896. TYPE: Brazil—Minas Gerais, serra de Ouro Preto, W. Schwacke 9209 (Holotype: B!, Isotype: RB!).

DISTRIBUTION: Rocky fields, Atlantic Forest; 1300–1500 m; epiphytic, saxicolous. G8x, G9iii. MG, SP.

BLOOMING: October to February.

VOUCHER: Ouro Preto, *Paula s.n.* (VIC 26454).

Vriesea segadas-viannae L.B.Sm., Smithsonian Misc. Collect. 126: 35. 1955. TYPE: Brazil—Minas Gerais, Jaboticatubas, serra do Cipó, Palácio, L.B. Smith 6755. (Holotype: US!, Isotype: R!).

DISTRIBUTION: Rocky fields; 1200 m; epiphytic. F8iv. Endemic.

BLOOMING: Unknown. Fruit April to May.

VOUCHER: Jaboticatubas, Reitz 7857 (HBR).

Vriesea simulans Leme, J. Bromeliad Soc. 47(4): 169. 1997. TYPE: Brazil—Minas Gerais, estrada de Presidente Juscelino para Gouvea, BR 259, km 520, E.M.C. Leme 1802 (Holotype: HB!, Isotype: SEL!).

DISTRIBUTION: Rocky fields; ca. 1250 m; saxicolous. E7vi; E8iii, iv. Endemic.

BLOOMING: November.

VOUCHER: Diamantina, *Giulietti* CFCR 2430 (RB).

Vriesea sp. 1.

DISTRIBUTION: Rocky fields; 1000–1200 m; saxicolous, terrestrial. G5v. Endemic.

BLOOMING: December to March.

VOUCHER: São Roque de Minas, Farney 182 (RB).

NOTE: This taxon often has been identified as *Vriesea regnelli* but appears to be an undescribed species related to *V. atropurpurea*.

Vriesea stricta L.B.Sm., Arq. Bot. Estado São Paulo 1(5): 122. 1943. TYPE: Brazil—Minas Gerais, Jaboticatubas, serra do Cipó, Vacaaria, M.B. Foster 622 (Holotype: GH, Iso-types: SP!, US!).

DISTRIBUTION: Rocky fields; 1000–1500 m; saxicolous, terrestrial. F8v, ix, xviii. Endemic.

BLOOMING: July to January peaking October. Fruit February to April.

VOUCHER: Conceição do Mato Dentro, Ver-sieux 258 (SP).

NOTE: Frequently confused with *Vriesea mi-narum*.

Vriesea vagans (L.B.Sm.) L.B.Sm., Phytologia 13: 118. 1966.—*Vriesea philippocoburgii* var. *vagans* L.B.Sm., Arquivo Bot. Estado São Paulo 1: 121. 1943. TYPE: Brazil—São Paulo, próximo a Apiaí, de São Paulo para Curitiba, M.B. Foster 399. (Holotype: GH, Isotype: US!).

DISTRIBUTION: Rocky fields, savanna, Atlantic Forest; 590–1300 m; epiphytic. F8ix; G8v; H7viii, xiii. BA, ES, MG, PR, RJ, RS, SC, SP.

BLOOMING: November to March. Fruit April to July.

VOUCHER: Diogo de Vasconcelos, Tameirão-Neto 2604 (BHCB).

Wittrockia cyathiformis (Vell.) Leme, Canistrum Bromel. Mata Atl. 67. 1997.—*Tillandsia cyathiformis* Vell., Fl. Flum. 137. 1825. Synonyms: *Canistrum cyathiforme* (Vell.) Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 252. 1891. *Canistrum regnelli* Mez in Mart., Eichler & Urban, Fl. Bras. (Martius) 3(3): 252. 1891. *Canistrum schwackeanum* Mez, Bot. Jahrb. Syst. 30(67): 4. 1901. LECTOTYPE: plate 144 in Vellozo, Icon. 3, Fl. Flum. 1831, designated by Smith & Downs (1979).

DISTRIBUTION: Atlantic Forest; 830–1200 m; epiphytic, saxicolous, terrestrial. G8x; H5i; I5i; I6i, iv. BA, MG, PR, RJ, SC, SP.

BLOOMING: October to April.

VOUCHER: Ouro Preto, Schwacke 10558 (RB).

Wittrockia gigantea (Baker) Leme, Canistrum Bromel. Mata Atl. 70. 1997.—*Nidularium giganteum* Baker, J. Bot. 18: 50. 1880. Synonyms: *Canistrum ingratum* Mez, Bot. Jahrb. Syst. 67: 3. 1901. *Canistrum gigan-*

teum (Baker) L.B.Sm., Arq. Bot. Estado São Paulo 2: 118. 1950. TYPE: Brazil—Rio de Janeiro, Glaziou 11692 (Holotype: K).

DISTRIBUTION: Atlantic Forest; 700–1400 m, epiphytic, terrestrial, saxicolous. F8ix; G9iii, vii; H8x; I7iii. MG, RJ, SP.

BLOOMING: March to July.

VOUCHER: Jaboticatubas, Foster 609 (SP, US).

Wittrockia tenuisepala (Leme) Leme, Canistrum Bromel. Mata Atl., 65. 1997.—*Nidularium tenuisepalum* Leme, Bradea 5(29): 319. 1990. TYPE: Brazil—Minas Gerais, Manhumirim, A. Seidel 1099 fl. cult. (Holotype: HB!, Isotype: RB!, “Clonotype”: HB!, SEL).

DISTRIBUTION: Atlantic Forest; ca. 610 m; habit unknown. G10iv. Endemic.

BLOOMING: Unknown.

VOUCHER: Manhumirim, Leme s.n. fl. cult. (HB 77762, RB).

Wittrockia sp. 1.

DISTRIBUTION: Rocky fields, Atlantic Forest; 1000 m; epiphytic, terrestrial. E8x. BA?, MG.

BLOOMING: March.

VOUCHER: São Gonçalo do Rio Preto, Viana 1734 (BHCB).

NOTE: Undescribed new species.

ACKNOWLEDGMENTS

This paper is a part of the M.Sc. dissertation of LMV undertaken at the Post-Graduate Program in Botany of the Universidade Federal do Rio de Janeiro/Museu Nacional. We acknowledge support from the Brazilian agencies: Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES), and Conselho Nacional de Desenvolvimento Científico e Tecnológico (CNPq), and from the U.S.A.: National Science Foundation (DEB-0129446), Marie Selby Botanical Gardens, and Smithsonian Women's Committee. We thank the Instituto Estadual de Florestas (MG) for permission to collect; A. Hagler for reviewing the English, R. Andreata, and A. Calvente for suggestions on an earlier draft of this manuscript; H. E. Luther, B. K. Holst, and the Mulford B. Foster Bromeliad Identification Center at Marie Selby Botanical Gardens, and W. J. Kress, R. Faden, and the Smithsonian Institution/Research Training Program, where the initial survey was made during an internship by LMV, for all their suggestions and encouragement. Final thanks go to the curators and keepers of the herbaria for access to specimens and data, Selbyana editorial staff and to two anonymous reviewers who contributed to improve the manuscript.
